

## Security Policy

Regis Maritime Security leverages over a decade of expertise and success in the maritime security industry and was formally registered in 2025. We provide Privately Contracted Armed Security Personnel (PCASP) and Maritime Security Teams (MST) to client vessels transiting high-risk areas where they may be subject to the threat of piracy.

We follow a steady and focused strategy aimed at becoming a leading reference in the security industry by offering our customers solid value for their money.

To meet the requirements of ISO 28000: 2022 and ISO 28007-1:2015, Regis Maritime Security has defined, implemented, and maintains a security system, which will be made available to the public as well as to all interested parties. New clients shall receive this policy after the initial contact, alongside the due diligence.

### POLICY

Regis Maritime Security is committed to the implementation of this Security Management Policy and to ensure that this policy is always observed and effective. The security management system is reviewed regularly and is subject to an annual revision.

Our mission is to maintain an outstanding level of security services to our clients, providing them with highly trained and effective security teams to protect their maritime assets and provide them with peace of mind.

To achieve that, we:

- Develop and maintain security procedures that comply applicable international standards and regulatory requirements, law and code.
- Recruit highly trained and qualified personnel on board and ashore ensuring they are fully aware of the requirements of this policy and procedures.
- Design and implement measures and procedures to reach and maintain the highest standards of training and performance.
- Apply suitable preventative safety and security measures to best suppress or minimize identified risks and incidents.
- Ensure that this policy is available to all internal and external interested parties, to establish a two-way channel of communication for feedback, suggestions and complaints.
- Establish, monitor, review and adapt our relevant security objectives continuously.

### SCOPE OF SECURITY MANAGEMENT SYSTEM

Our Security Management System covers the provision of contracted security personnel. This includes the provision of armed/unarmed security teams during vessel transits across high threat areas in the Red Sea, Gulf of Aden, Indian Ocean, and Arabian Sea.

### SECURITY MANAGEMENT OBJECTIVES

Regis Maritime Security establishes and maintains security measures to help deter and prevent piracy situations on board our client vessels. To achieve our mission statement, we have set clear security objectives to guide our activity:

## Security Policy

### Security objectives:

1. Frequent periodic and ad hoc monitoring of all applicable standards and international and national regulation and other relevant sources to ensure compliance/implementation.
2. Frequent periodic and ad hoc monitoring of quality intelligence sources, and maritime domain awareness which allows us to accurately assess risk for every task.
3. Frequent periodic and ad hoc review of our SOP and daily security procedures at all levels.
4. Develop and implement regular training programs for our staff and MSOs offered to clients.
5. Conduct comprehensive and thorough screenings and regular evaluation processes for all personnel.
6. Conduct thorough training and assessment of our security personnel during induction as well as through refresher courses as needed to comply with clients' needs and requirements.
7. Publish our policy online for all to see and encourage a constructive feedback culture with all our stakeholders and interested parties.
