Led light for nano tanks

## Sleek & Stylish design

At LNS, we understand that every aquarium enthusiast desires a tank that looks both visually appealing and functional. That's why we designed the LNS Piccolo to have a sleek and modern look that perfectly complements the aesthetics of any nano planted aquarium, paludarium, or small tank. We have spent countless hours perfecting the compact form factor of the LNS Piccolo, ensuring that it is both aesthetically pleasing and highly functional. It also features splash guard that protects LEDs from accidental water splashes.

## SMT Process using branded leds

The LEDs PCB of the LNS Piccolo undergoes precision manufacturing using CNC and SMT processes, with Industry leading premium LED brands such as Edison and Bridgelux being used. These LEDs are highly efficient, providing a high luminous flux of 150-160 lumens per watt. To ensure longevity, the LNS Piccolo also features a constant current power driver that not only produces less heat but also maximizes lighting output. As a result, you can be confident that the LNS Piccolo will not only provide excellent lighting but also last for a long time.

## Plug n Play design

The LNS Piccolo is designed to be user-friendly, with a simple yet effective design that allows for easy installation and operation. The light comes equipped with a clamp that can fit tanks with a glass thickness of up to 8mm, making it suitable for a wide range of aquariums. Additionally, the compact wall mount driver means that the LNS Piccolo can be installed and operated without any hassle. The plug-and-play functionality of the light makes it ideal for those who are new to aquarium hobby or those who prefer a more straightforward approach.

## Color & Wattage options

The LNS Piccolo comes in two stylish color options: Black and White. Choose the color that best complements your aquarium's aesthetics and overall look. Additionally, the Piccolo light is available in two wattage options: 7W and 10W. Whether you have a small or slightly larger aquarium, you can choose the wattage that fits your needs and provides the perfect amount of lighting for your plants and aquatic life. So, whether you're looking for a sleek black or elegant white light, or a lower or higher wattage option, the Piccolo light has you covered.

## Accessories

We understand that ease of use is essential when it comes to aquarium lighting, and that's why we offer an optional inline switch module for the LNS Piccolo. This convenient feature can be easily inserted between the LED driver and the light, providing you with accessibility and effortless control. The inline switch module offers a simple and efficient solution. With the LNS Piccolo, we strive to provide a hassle-free and enjoyable aquarium experience for all our customers.
