

# Gravesite Preparation And Instructions

A.

1. The gravesite must be accessible.
2. The distance to the gravesite should not be more than 50 m from where the truck can park.
3. If the gravesite is further than 50 m, extra labor will be added.

B.

1. The following must be removed from the grave:
  - a) All rocks and stones
  - b) Concrete and bricks
  - c) Bushes and Trees

**All preparation to be completed and photos sent to us on email or whatsapp 6 weeks before your required date**

C.

1. Areas that is sloping very badly must be build up before hand by the client.

**\*\* Please contact us for instructions on the correct way to do this in order to avoid any future problems. \*\***

D.

1. **ONCE THE GRAVESITE IS CLEAR**, take **four** photos **clearly** showing the gravesite and surrounding area.

**\*\* Stand at the foot of the grave and take 4-6 steps backwards. Take a photo facing the front of the grave, showing the surroundings. Repeat the process for all remaining sides - back, left and right. \*\***
