

HELPING SCIENTISTS AND ENGINEERS GROW THEIR BUSINESSES.

Sygneus is your outsourced business engine – handling business development, strategy, and operations so you can focus on innovation.

About Us

Sygneus helps scientists, engineers, and innovators grow their businesses without losing focus on their technology.

We act as an outsourced business engine – providing business development, strategy, and operations support to turn innovation into impact.

Our team brings proven experience across defence, nuclear, and advanced technologies including robotics, lasers, AI, and cybersecurity.

Our Mission

To free technical founders from commercial and operational burden so they can focus on the engineering and science only they can do – while we drive growth, secure contracts, and build sustainable businesses.

Industries We Serve

Defence

Nuclear

Aerospace

Critical Infrastructure

Manufacturing

Marine & Offshore

Business Development (BDaaS)

Win more contracts, market insight, opportunity capture, and bid support.

Commercial & Strategic Advisory

Plan go-to-market strategies, secure funding, and build sustainable growth models.

Fractional Operations Support

Strengthen your operational backbone with IT, compliance, marketing, and project management on-demand.

Toolkits & Accelerators

Jump-start progress with pre-built resources like our Opportunity Radar and Proposal Accelerator.

Why Work With Us?

- ✓ **Proven ROI:** clients have achieved >150x returns within 6-12 months.
- ✓ **End-to-end capability:** from first conversation to long-term support.
- ✓ **Deep technical expertise:** led by Chartered Engineers and PhD researchers.
