FRP SEPTIC TANKS

FRP septic tank which is composed by synthetic resin and fiber reinforced plastic, is designed to treat domestic sewage. The major use of FRP septic tank is to store excreta and treat them with anaerobic digestion to decrease the solid content in sewage. It is needed in many fields, including waste disposal, petrochemical, chemical, light, electricity, pharmaceutical, power and civil industries.

Enticing attributes of our FRP Septic Tank:

- Highly efficient performance
- Lightweight, easy to install
- Anti corrosive
- High impact strength
- Smooth internal surface
- Leak proof construction
