Stone Theory Studio

Founded in 2019, Stone Theory Studio is devoted to creating refined, one-of-a-kind furniture and bathware that unite the timeless artistry of Indonesian craftsmanship with the precision of modern design.

Each piece is meticulously handcrafted from premium composite mineral stone, designed to capture the natural depth and texture of stone while ensuring exceptional strength and longevity.

Our collections—ranging from sculptural basins and bathtubs to bespoke tables and décor—celebrate minimal form, sustainable material innovation, and tactile beauty. Every surface, curve, and finish reflects our pursuit of quiet luxury and design integrity.

At Stone Theory Studio, we believe craftsmanship is a dialogue between material and maker—each creation tells a story of balance, texture, and light. From concept to completion, our work transforms spaces into modern sanctuaries of calm and authenticity.
