

**Hexstaxx – Solutions that are out of the box**

## Hexstaxx

Hexbuild have created Hexpod Spaces Hexstaxx Division designed as a fast, affordable system of supplying units constructed using pre used "shipping containers", stacked in many available layouts and square meter configurations, creating fast, deliverable solutions. that utilize and repurpose these containers, bringing new new life to otherwise redundant spaces.

Assembled on site, externally and internally decorated to the highest standards and with all amenities in situ, these Hexstaxx structures are the perfect solution for housing, retail spaces, restaurants, gymnasiums etc.

Requiring only simple base foundations, pre-prepared prior to the structures delivery, each Hexstaxx Space is delivered to site via HIAB low loader truck and is lifted into place via either the onboard vehicles crane or a larger individual one for two or three storey high designs.

- **Fitted with additional ventilation – to ensure condensation is not a problem. • Internal insulation supplied. PU, EPS or Rock Wool in 50, 75 or 100mm thicknesses are available.**
- **Using containers is an environmentally friendly solution. They have fulfilled their primary role of carrying cargo and can then be reused.**

## **Delivering The Project- Important Points To Be Addressed:**

**The Hexbuild Team are always on hand to make the selection of which structure best suits a customer's particular requirements for any project and in order for us to facilitate speedy and smooth progress, we need to address the points as listed below.**

### **General Issues**

- ★ **Landscaping issues and aesthetic appeal on site.**
- ★ **Is the building selected the ideal one for the proposed use by the customer.**
- ★ **Is there a possibility that the customer will wish to add to the Hexbuild structure in the future?**
- ★ **Proposed site layout with regard to existing buildings & finishes required to match other local buildings.**
- ★ **Precise details of customers required layout and exterior and interior finish of Hexbuild structure with illustrative photos from customer of finishes if possible.**

### **Access to Build Site**

- ★ **Access for container lorry to site/or close to site.**
- ★ **Consider possibility of over-lift of the Hexbuild structure to the site.**
- ★ **Distance from proposed site of the Hexbuild structure to the access road.**
- ★ **If the proposed site is to the rear of any building, is there access to the site, and what is the width/height of that access.**
- ★ **Possible Health and Safety Issues/Hazards – Overhead power cables/Public safety concerns/Local Hazards/Traffic conditions/Security on site.**

## Utilities

- ★ Availability of access to deliver/install septic tank
- ★ Local Authority restrictions in connecting to utilities.
- ★ Position of possible sewer connection/site for septic tank
- ★ Quality of supply (Water pressure/Electricity Ampere's available).
- ★ Possibility of customer wanting to enlarge the supplied Hexbuild structure in the future.
- ★ Location of mains water/electricity/sewage and distance from the Hexbuild structure proposed final site.
