

NeuroBalance Project

*"Every Brain Deserves to Be Understood —
We Equip Minds to Find Emotional Balance,
Learn, and Build the Strength
to Thrive Through Life's Challenges."*

NeuroBalance Project: Program Pricing & Implementation Overview

Foundational Professional Learning

Foundational Neuropsychology Education – Part 1
Sessions 1–4

- \$750 per session
- \$3,000 total
- 60–90 minutes per session
 - Recommended weekly or biweekly to support scaffolding, reflection, and practical application.
- In-person, all sessions are experiential

Establishes a shared neuroscience foundation for understanding learning readiness, emotional regulation, executive function development, and behavior in school settings.

Advanced Professional Learning

Foundational Neuropsychology Education – Part 2
Sessions 5–8

- \$750 per session
- \$3,000 total
- 60–90 minutes per session
 - Best recommendation is biweekly or monthly for impactful scaffolding, reflection and utilization (spaced differently due to advanced application).
- In-person, all sessions are experiential
- *Each session may be utilized as a stand alone

An advanced continuation series focused on cognition, language, neurodiversity, and systems of support, designed to help schools respond effectively to complex learners and big behaviors.

Part 2 is optional and typically planned as a next-phase or future-year investment.

Coaching & Implementation Support (Optional)

Ongoing Consultation and Support

- \$40 per hour
- Commonly used to support:
 - MTSS teams
 - School leadership
 - Counselors and instructional staff
 - Application of training to real student needs - case load

Supports implementation fidelity, problem-solving for complex learners, and sustainability beyond professional learning sessions.
