

THE DATA...

THE FOUNDATION

The EducaciónSÍ Foundation is an interdisciplinary team of professionals, academics, technicians and volunteers united by the desire and commitment to promoting "scientific Evidence-Based Education" (EBE) as a part of the structural reforms that the Spanish educational and research system demands.

OUR MISSION

The EducaciónSÍ Foundation is an initiative of the research group (SEJ-535) "Education, Evaluation and Entrepreneurship" of the UGR, aimed at ensuring that evidence is installed in educational work and used as a mechanism for making decisions on new research and interventions, thus improving the quality and transparency of Educational Research.

OUR PLAN

Our strategy consists of building capacity among educational professionals to improve knowledge, access and use of evidence-based educational practices, programs and policies. We will give priority to the production, synthesis and dissemination of evidence in the basic curricular areas of reading, mathematics, socio-emotional development and digital education*.

*Digital Education = Impact of the use of technology on Education

VOLUNTEERING

EducaciónSÍ Foundation offers a volunteering program for students who want to broaden and deepen their research skills and abilities in Education and Social Sciences.

PHILANTROPY

Collaborate with EducaciónSÍ Foundation and support us in promoting the use of scientific evidence for more effective and equitable education.
