About Us

With a unique legacy in cosmetology and dermatology as well as a decade of cutting edge science, innovation and research, Gleam is aiming to lead the emerging market of cosmetic industry.

We are experts in developing the products as per client's requirements. We aim to deliver innovative, science-based products across the Aesthetics, Personal Care and Consumer Care.

Our Purpose

Advanced Personal Care Products for All.

Our purpose is to develop and formulate unique, scientifically-backed products in the segment. We also aimed to be the CMO (Contract Manufacturing Organisation) for the quality loving people out there.

Our unique business model is to provide all kinds of support for concept cosmetics.

Our Vision and Mission:

We are keen to help Start-Ups and Brand Owners to become successful through our innovative and quality products.

At Gleam, you will have a large number of options for high-end packaging and branding. With our unique concept in contract manufacturing, to provide a minimum batch size with high-end quality products, we make it easy to turn your vision into reality.

We, also able to help our clients for out of the box services like, Logo Design, Product Design, Web Design, Social Media Posts and Many More.

Private Labelling

Gleam Laboratories welcomes the opportunity to provide cosmetic contract manufacturing, formulating and development of cosmetic products to both local and international markets.
