

## ASSEMBLY INSTRUCTIONS

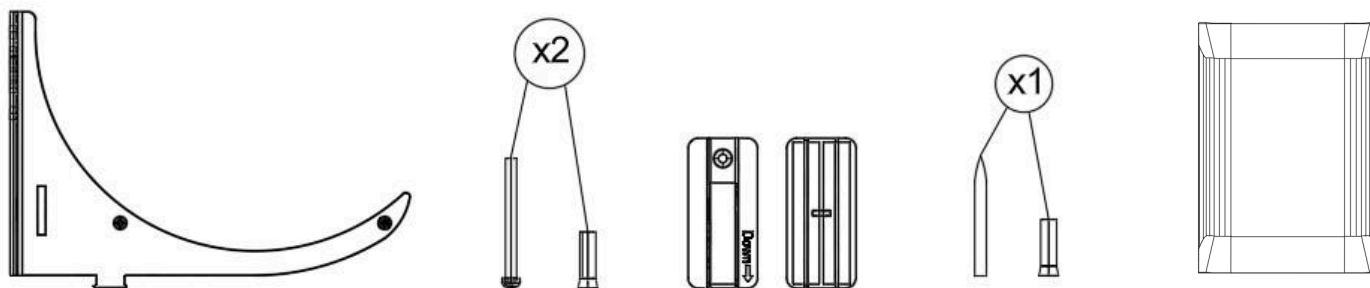

### LEZO CONCEPT Scooter Wall Mount

Pat. U202531773

Thank you for choosing the LEZO CONCEPT scooter wall mount.  
This product has been designed to minimise space usage and integrate elegantly into your home.

#### Included components

- Main scooter mount
- Charger mount: parts A and B
- Rear-wheel support
- 2 screws M5.5 × 38 mm
- 2 wall plugs Ø8 × 40 mm
- 1 screw M3 × 30 mm
- 1 wall plug 5 mm

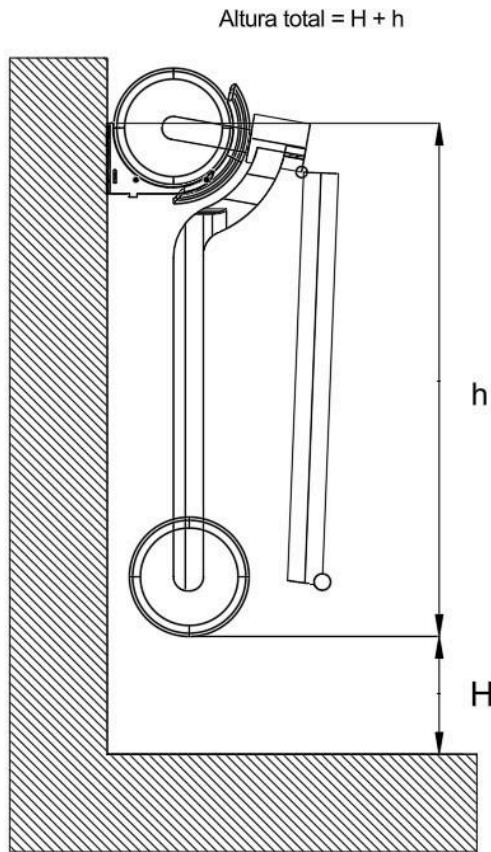

#### Required tools

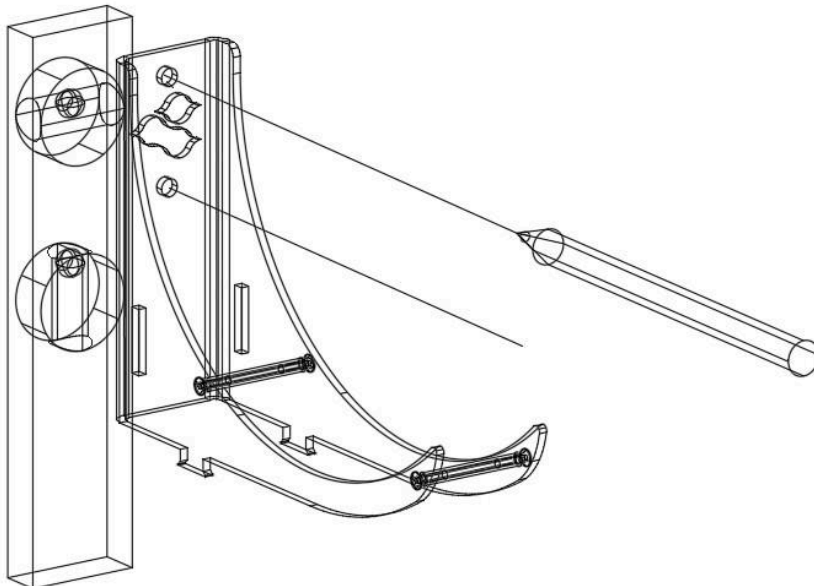

- Electric drill
- 8 mm drill bit
- 6 mm drill bit
- Spirit level
- Phillips screwdriver

# 1. Installing the main mount

1. Determine the desired height from the floor, considering:
  - The minimum height required for the wheel to remain off the ground (H)
  - The length of the scooter (h)

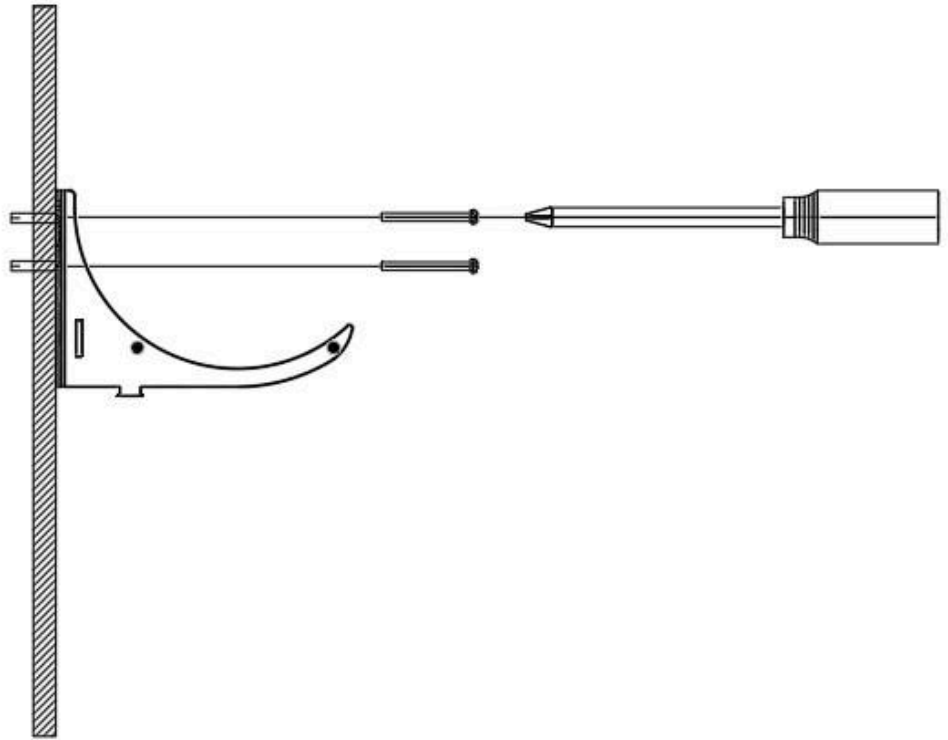

2. Using a level, mark the exact position on the wall and drill the marked points with an 8 mm drill bit.

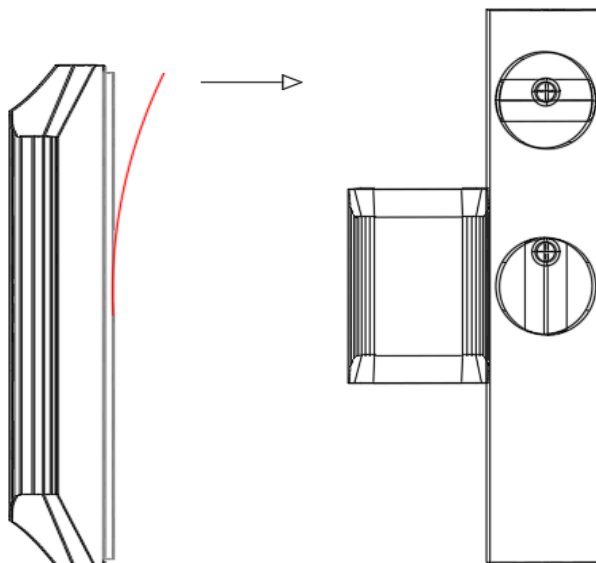

3. Insert the wall plugs into the drilled holes.

Then place the mount over the marks and tighten the M5.5 × 38 mm screws until firmly secured.

## 2. Installing the rear-wheel support

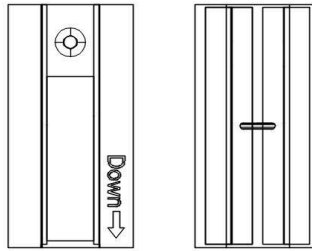

1. With the main mount installed, place the scooter to identify where the rear wheel will rest.
2. Mark that point on the wall.
3. Remove the adhesive film from the rear-wheel support.
4. Align it with the mark using a level and press firmly to activate the adhesive.

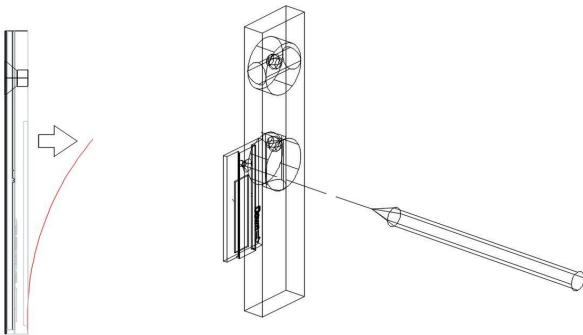

### 3. Installing the charger mount

A

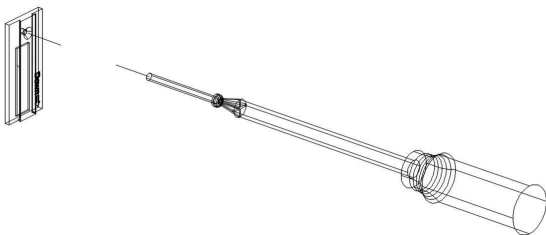

B

1. Determine the height at which you want to place the charger, considering the distance to the power outlet and the scooter.
2. Mark the position with a level and pencil, and drill using a 6 mm drill bit.

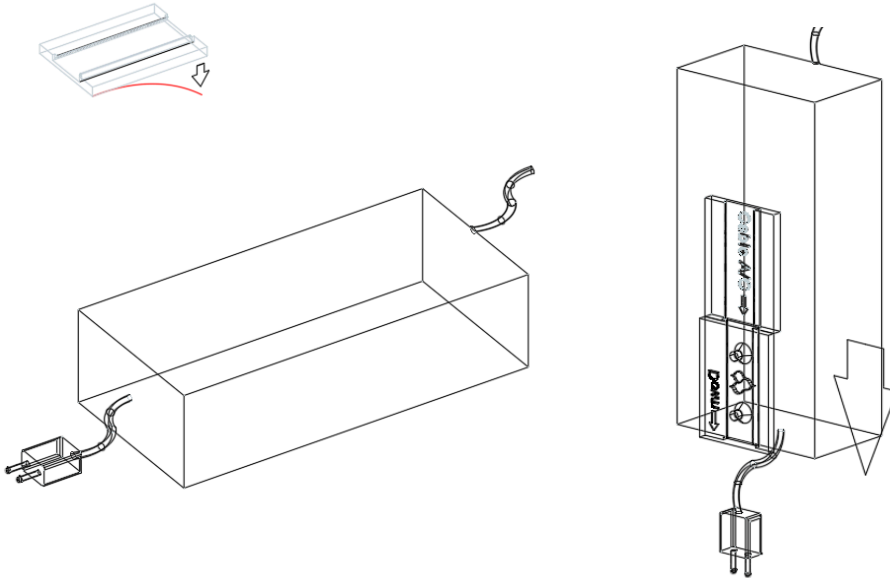

3. Insert the 5 mm wall plug, remove the adhesive film from part A, and secure it with the M3 × 30 mm screw.

## 3.2 Installing part B (charger)

1. Clean the back surface of the charger with alcohol and allow to dry.
2. Remove the adhesive protector from part B.
3. Attach it to the rear side of the charger and press firmly.

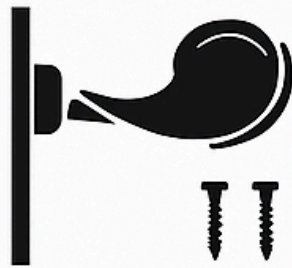

## Maintenance

- Clean the mount with a slightly damp cloth.
- Avoid abrasive products.
- Check periodically that the screws remain tight.

## Warnings & Safety

- Mount only on structurally sound walls.
- Maximum load capacity: 60 kg.
- Do not use the product if damaged.
- Not suitable for children.
- Use proper wall plugs and screws depending on the wall type.
- Designed for electric scooters with 8.5–10 inch wheels.
