About Us

Anticipation des Matériels Modernes (AMM SARL) is a dynamic and forward-looking energy company based in the Democratic Republic of Congo (DRC), dedicated to delivering reliable, sustainable, and high-quality energy solutions. We currently supply electricity to end-users through energy imported from neighboring countries. However, recognizing the growing energy demand in the DRC, we are actively working on establishing our own **solar energy farm**, which will further enhance local energy independence and support national development goals

01

Our Core Services

02

Energy Supply

We are actively engaged in the importation and distribution of electricity, connecting residential, commercial, and industrial users to a dependable power supply network.

Solar Energy Development

AMM is investing in the construction of a photovoltaic solar farm to generate clean, renewable energy and contribute to the energy security of the DRC.

Infrastructure Installation

We design, install, and maintain electrical infrastructure across all voltage levels:

- » High tension
- » Medium tension
- » Low tension

Our teams ensure compliance with technical standards and work closely with communities to extend the reach of energy access.

Electrical Equipment Supply

We provide essential materials and components for power transmission and distribution, including:

- » Electric cables
- » Insulators and isolators
- » Transformers
- » Circuit breakers
- » Switchgear

This makes us a trusted supplier for both public utilities and private companies involved in energy distribution.

Legal & Regulatory Compliance

AMM SARL operates in full compliance with national and sectoral regulatory frameworks. We possess:

- » Importation license
- » Agrément ministériel
- » Titre d'agrément
- » RCCM (Company Registration)
- » Tax Identification Number (Impot)
- » Numéro d'Identification Nationale (NIN)
- » ARE (Autorité de Régulation de l'Électricité) compliance
- » SNEL registration and approval

Our Clients

We are proud to serve some of the largest mining and industrial operations in the DRC, including:

- » KAMOA COPPER SA
- » CONGO JINJU CHENG MINING COMPANY
- » (CJCMC)
- » COMMUS SA
- » TFM/KFM
- » SOMIDEZ
- » KAMBOVE MINING
- » MJM
- » And others in the energy, mining, and manufacturing sectors.

Ongoing & Completed Projects

04

- » Importation of 10 MW, 30 MW, and 50 MW of electricity in multiple phases
- » Electrification of communities such as Kapolowe Gare, Kapolobwe Mission, and Kiembe
- » Installation of medium and low voltage lines in the Lufira sector
- » Construction of our upcoming solar power plant
- » Supply of electrical infrastructure materials across the DRC
- » DOT MJM – Completed
- » DOT SHITURU – Completed

Our Vision

To drive economic growth and sustainable development in the DRC through clean, accessible, and reliable energy.

Our Promise

We are committed to:

- » Offering sustainable and innovative energy solutions
- » Maintaining high standards of quality & safety
- » Creating local job opportunities
- » Contributing to the social & economic development of the communities we serve

We're a workforce
with an outstanding
reputation
