FELLOWSHIP IN ETHENTS 12 Months

Program Structure

Orientation (1 Week): Detailed overview of ETHENTS protocols, safety measures, and Dr. Khan's innovations.

Clinical Observations (Months 1-2): Comprehensive observation of a wide range of endoscopic two-handed ENT surgeries.

Hands-On Training (Months 3-4): Intensive sheep head dissections to master surgical techniques.

Assisting in Surgeries (Months 5-8): Active assistance in various surgeries, with increasing levels of responsibility.

Independent Procedures (Months 9-11): Performing surgeries independently under minimal supervision.

Research and Innovation (Month 12): Engaging in research projects related to endoscopic two-handed ENT surgeries and contributing to ongoing innovations.

FELLOWSHIP IN ETHENTS 12 Months

Additional Components

Outpatient Department (OPD) Exposure: Participate in patient consultations to understand pre-operative and post-operative care.

Inpatient Department (IPD) Management: Involvement in the care of hospitalized patients, including post-surgical management.

Workshops and Seminars: Attend regular sessions focusing on the latest advancements in endoscopic ENT surgeries.

Evaluation and Feedback: Regular assessments to monitor progress, with constructive feedback from mentors.

These structured programs are designed to provide fellows with a comprehensive understanding and hands-on experience in endoscopic two-handed ENT surgeries, incorporating Dr. Khan's innovative techniques.
