

Mytelligent Introduces ORAION: The AI Personal Assistant Wearable That Redefines Human-Technology Interaction

Las Vegas, NV – December 7, 2025 – Mytelligent today announced ORAION, a screenless, voice-activated AI wearable that is magnetically attached to your clothing, designed to reduce screen time while keeping users connected. ORAION will be available for pre-order on Indiegogo starting January 8, 2026. Unlike traditional smart devices that demand constant attention, ORAION empowers users to stay present, engaged, and connected by getting technology out of the way. ORAION connects to your smartphone via Bluetooth—no SIM card or subscription required.

In an age of digital distraction, **ORAION** is a powerful alternative to screen-dependency. "We asked: What if technology could improve our lives without pulling us away? What if it could give us intelligence, assistance, and connection... seamlessly?" says Dor Lin, Founder and CEO of Mytelligent. "ORAION is our answer, enabling true presence by being there when you need it, and blending in when you don't."

Mytelligent OS: The OS for an AI-Driven World

The technology behind **ORAION** is **Mytelligent OS**, the intelligent core built specifically for ambient, AI-powered interactions. This proprietary operating system is powered by our hybrid AI system. With a Local AI Engine for offline responsiveness and privacy and secure cloud intelligence when online and needed, ORAION is designed to deliver seamless, intelligent interactions.

Seamless Interaction, Hands-Free by Design

ORAION stands apart with its minimalist, screenless design. It eliminates the need to pull out a phone, resting discreetly and securely on your clothing via a magnetic Anchor. This fundamentally shifts interaction from visual absorption to intuitive, hands-free engagement.

Key Capabilities of ORAION:

- **Information Retrieval:** Instantly access facts and data without breaking your focus.
- **Effortless Communication:** Send messages and make phone calls with just your voice.
- **Object Recognition:** Understand your surroundings, identify objects and gain insights.
- **Live Language Translation:** Break down barriers with real-time understanding across languages.
- **Advanced Media Capture:** Effortlessly record high-quality videos and photos of your moments, hands-free.
- **Instant Note Taking:** Transform spoken thoughts into instant text.
- **Real-time Navigation:** Receive hands-free guidance, keeping your eyes on the world, not your phone.
- **Future capabilities** include the innovative **Vision Assistant**, designed to aid visually impaired users in navigating their environment safely and independently, with more features under development.

From capturing candid moments hands-free to getting real-time translations while traveling, ORAION keeps your eyes on the world, not a screen.

Design, Comfort and Power

ORAION is sleek, circular, and lightweight—just 60mm in diameter, 17mm thin, and 45g in weight. Anchor is just 3mm thin—designed for all-day wear. The charging case provides up to 5 full charges, ensuring all-day reliability.

The Mytelligent App: Your Control Center

Complementing the hardware, the **Mytelligent App** on your smartphone serves as ORAION's intuitive dashboard. Here, users can name their ORAION, manage settings, track location, review interactions and media, and importantly, set privacy controls, putting full control at their fingertips. ORAION includes LED indicators and simple controls for the camera and audio, so people around you know when it's active.

Availability

ORAION will launch for pre-order on Indiegogo on January 8, 2026, with special early bird discounts starting at \$249. Retail pricing for the Standard ORAION Package is \$449. The Complete ORAION Package, which includes Mytelligent Plus benefits, will be available at a campaign price of \$299 (retail \$549). Shipping is anticipated to begin by Q2 2026. Mytelligent Plus benefits include Extended Warranty, Accidental Damage Coverage, Battery Care, and other exclusive perks.

About Mytelligent

Founded in 2024 by Dor Lin, a cybersecurity expert and serial entrepreneur, Mytelligent is at the forefront of redefining human-technology interaction. Guided by its core vision of empowering users with intelligent technology that enables them to live in the moment, **Mytelligent** is dedicated to creating solutions that not only address today's needs but also anticipate tomorrow's challenges—helping individuals live more present, connected, and informed lives.
