This team is backed by fully functional support services group comprising of individuals qualified in their respective fields. E-Shack Solutions is professionally and technically equipped to handle projects in any field of design, construction and implementation.

“Innovation is the ability to see change as an opportunity -not a threat”

-Steve Jobs

COMPANY MISSION & VISION

**80%
SAVINGS
On
Electricity
Bills**

At E-Shack Solutions, we aim to build a sustainable future for our global community. In today's high energy consuming world, we offer world class solar energy systems, striving to meet the increasing demand of electricity. Our main mission is to provide cost-effective and economically favorable solar solutions to customers.

Our operational excellence among solar Energy providers has enabled us to pioneer the distribution and commissioning of affordable and modified solar services. From design room to product installation, the goal of our team is to provide need-based optimal solar solutions with customer service as our number 1 priority.

**Low
Price**

Economical Solutions are the main part of our business model. We aim to provide cost-effective and need-based solution to cope up the daily energy needs.

Grid integrated Solar System allows our valuable customers to not only produce their own electricity but also sell excess energy to WAPDA.

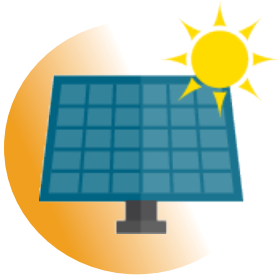

We aim to provide zero or even negative electricity bills to the clients by selling excess electricity units to the WAPDA.

“A mission statement is not something you write overnight. But fundamentally, your mission statement becomes your constitution, the solid expression of your vision and values. It becomes the criterion by which you measure everything else in your life”

-Stephen Covy

OUR SERVICES

E-Shack Solutions is a full-service installer and investor of photovoltaic (PV) systems. Our experience and expertise is in harvesting solar power for commercial and residential utilities and other large applications. We provide the thoughtful design and safe, dependable installation of distributed solar energy systems, including solar PV and solar energy storage systems. We provide expertise and effective on-going system support, focused on maximizing the value of the solar energy assets of our customers and clients.

Innovative Technology

Our technology is on the cutting edge of the solar industry. We set the standards for others to follow.

Always clean energy

We have a strong commitment to sustainability. Going solar is not only affordable; it's responsible.

Trustworthy service

We have the area's most educated and well trained solar technicians.

Renewable Energy

An investment in solar today will pay dividends for you and your family for decades to come.

7 years of Experience

We have been helping go solar to enjoy zero electricity bills since 7 years.

THE PROCESS

How It Works?

In 5 simple steps, you can start saving money and the planet. We will provide support and guidance at every step of the way during your solar installation process.

Consultation

E-Shack Solutions offer you a free consultation for the installation of solar system. When you call our representative, our team will guide you and schedule a free site visit

Design

Our team will design a customized solar solution specifically for your home or business. The plan will maximize your solar panel output and reduce electricity bill to achieve your personal solar energy goals.

Permitting

E-Shack Solutions will ensure all city permits and utility paperwork are in order. With our experience and expertise at work, you have nothing to worry about during this step of solar panel installation.

Installation

At E-Shack Solutions, we prioritize quality installation of solar panels for our customers. On installation day, you can expect clean and courteous installers, a neat and tidy job site and professional installation ensuring high quality solar components.

Commissioning

After installation of system, officials of respective utility company inspect the solar system for final permission of Net-metering service. Once the permission granted, your solar panels are ready to generate clean energy and power your home and building.
