

Medical Asset Management Maturity Model

| Level | Description |
|----------------------|---|
| Level 1 – Ad hoc | Equipment records incomplete; maintenance mostly reactive. |
| Level 2 – Basic | Inventory exists; preventive maintenance partly implemented. |
| Level 3 – Structured | Centralized asset registry and CMMS implemented. |
| Level 4 – Integrated | Asset management integrated with procurement and hospital IT systems. |
| Level 5 – Optimized | Predictive maintenance, analytics-driven procurement, and lifecycle governance. |

This maturity model helps hospitals and ministries of health assess their current capability in medical equipment governance and identify pathways toward digitally enabled asset management.
