

HEIGHTENED SENSES LLC | UAS Components, Integration, and Sustainment Support

Company Overview

Heightened Senses LLC is a Service-Disabled Veteran Owned Small Business providing UAS component sourcing, integration support, and sustainment services to U.S. Government, defense, and public safety customers. The company specializes in NDAA-compliant and U.S.-aligned supply chains and operates as an aggregation and fulfillment partner between OEMs and government end users. Heightened Senses is structured to support task-order execution under Blanket Purchase Agreements and other scalable acquisition vehicles.

Core Competencies

- UAS component sourcing and fulfillment
- Flight controllers, avionics, GPS, ESCs, and power distribution
- Secure communications and data link components
- Propulsion and power systems including motors, batteries, and propellers
- Payload components including EO sensors, computing modules, and mission hardware
- Ground control equipment including controllers, radios, and FPV systems
- Non-critical assembly, maintenance, and sustainment consumables
- Logistics coordination, drop-ship, and consolidated fulfillment

Differentiators

- SDVOSB prime capable of direct government contracting
- Preferred vendor relationships with U.S.-based and NDAA-aligned OEMs
- Ability to aggregate multiple OEM product lines under a single contracting vehicle
- Flexible fulfillment model including direct ship to Government or consolidated delivery
- Familiarity with Blue UAS policy boundaries and DCMA procurement requirements
- Veteran-led organization with operational and mission context
- Structured for BPA execution, task-order fulfillment, and sustainment support

Vendor and Supply Chain Approach

Heightened Senses functions as a fulfillment and integration partner rather than a single-product reseller. The company maintains preferred relationships with multiple UAS component and subsystem manufacturers, enabling responsive sourcing across avionics, propulsion, communications, and payload categories. Lead time planning, production alignment, warranty coordination, and RMA support are managed in coordination with OEM partners. Items designated for direct DCMA procurement are excluded in accordance with policy.

Government Alignment

- Focus on NDAA-compliant and U.S.-aligned technologies
- Familiarity with Army and DoD acquisition workflows
- Prepared for BPA execution, task-order invoicing, and WAWF

Company Data
