

A/L ICT 2022 (Gr.13)

Marking Scheme

Term – 5 , 2022 Examination

Field Work Center (FWC)

*This document /scheme has been prepared for the use of marking examination paper.
Some changes and alternative answers would be made by the teachers.*

Amendments to be included.

Part – I – Suggested Answers

Part – II A – Suggested Answers

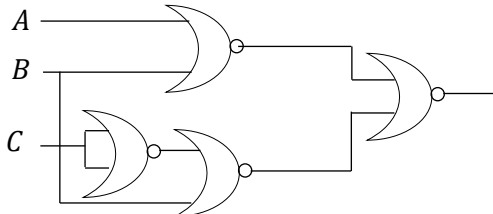

Question No.		Marks																								
(1)(a)	<table><tr><th>No.</th><th>Words</th><th>No.</th><th>Words</th></tr><tr><td>①</td><td>fieldset</td><td>⑥</td><td>textarea</td></tr><tr><td>②</td><td>legend</td><td>⑦</td><td>select</td></tr><tr><td>③</td><td>text</td><td>⑧</td><td>option</td></tr><tr><td>④</td><td>email / text</td><td>⑨</td><td>submit</td></tr><tr><td>⑤</td><td>tel</td><td>⑩</td><td>placeholder</td></tr></table>	No.	Words	No.	Words	①	fieldset	⑥	textarea	②	legend	⑦	select	③	text	⑧	option	④	email / text	⑨	submit	⑤	tel	⑩	placeholder	5 marks [0.5 x 10]
No.	Words	No.	Words																							
①	fieldset	⑥	textarea																							
②	legend	⑦	select																							
③	text	⑧	option																							
④	email / text	⑨	submit																							
⑤	tel	⑩	placeholder																							
(1)(b)(i)	Coffee - black hot drink Milk - white cold drink	2 marks [0.5 for each line]																								
(1)(b)(ii)	<table><tr><td colspan="2">Name</td><td>Age</td></tr><tr><td>John</td><td>Smith</td><td>46</td></tr><tr><td>Eve</td><td>Jackson</td><td>21</td></tr></table>	Name		Age	John	Smith	46	Eve	Jackson	21	3 marks [1 for each line]															
Name		Age																								
John	Smith	46																								
Eve	Jackson	21																								

(2)(a)(i)	brown dog fox jumps lazy over the	2 marks																
(2)(a)(ii)	Splits each word from the string "brown fox jumps over the lazy dog". Displays the words splitted in alphabetical order.	2 marks																
(2)(b)	<p>Error 1: The link between the external entity ‘Student’ and data store ‘Book shelf’.</p> <p>Correction: The link shold be passed through the process “Delivering books”.</p> <p>Error 2: The link between the data store ‘Book title’ and data store ‘Book shelf’.</p> <p>Correction: The link shold be passed through the process “Delivering books”.</p>	4 marks [1 for each]																
(2)(c)(i)	1	0.5 marks																
(2)(c)(ii)	0	0.5 marks																
(2)(c)(iii)	Cannot detect. Because the parity bit method can only detect one bit error, not burst errors (more than one bit errors).	1 marks [0.5+0.5]																
(3)(a)	<table><tr><th>No.</th><th>True / False</th><th>No.</th><th>True / False</th></tr><tr><td>(i)</td><td>False</td><td>(iv)</td><td>True</td></tr><tr><td>(ii)</td><td>True</td><td>(v)</td><td>True</td></tr><tr><td>(iii)</td><td>True</td><td>(vi)</td><td>True</td></tr></table>	No.	True / False	No.	True / False	(i)	False	(iv)	True	(ii)	True	(v)	True	(iii)	True	(vi)	True	3 marks [0.5 for each line]
No.	True / False	No.	True / False															
(i)	False	(iv)	True															
(ii)	True	(v)	True															
(iii)	True	(vi)	True															

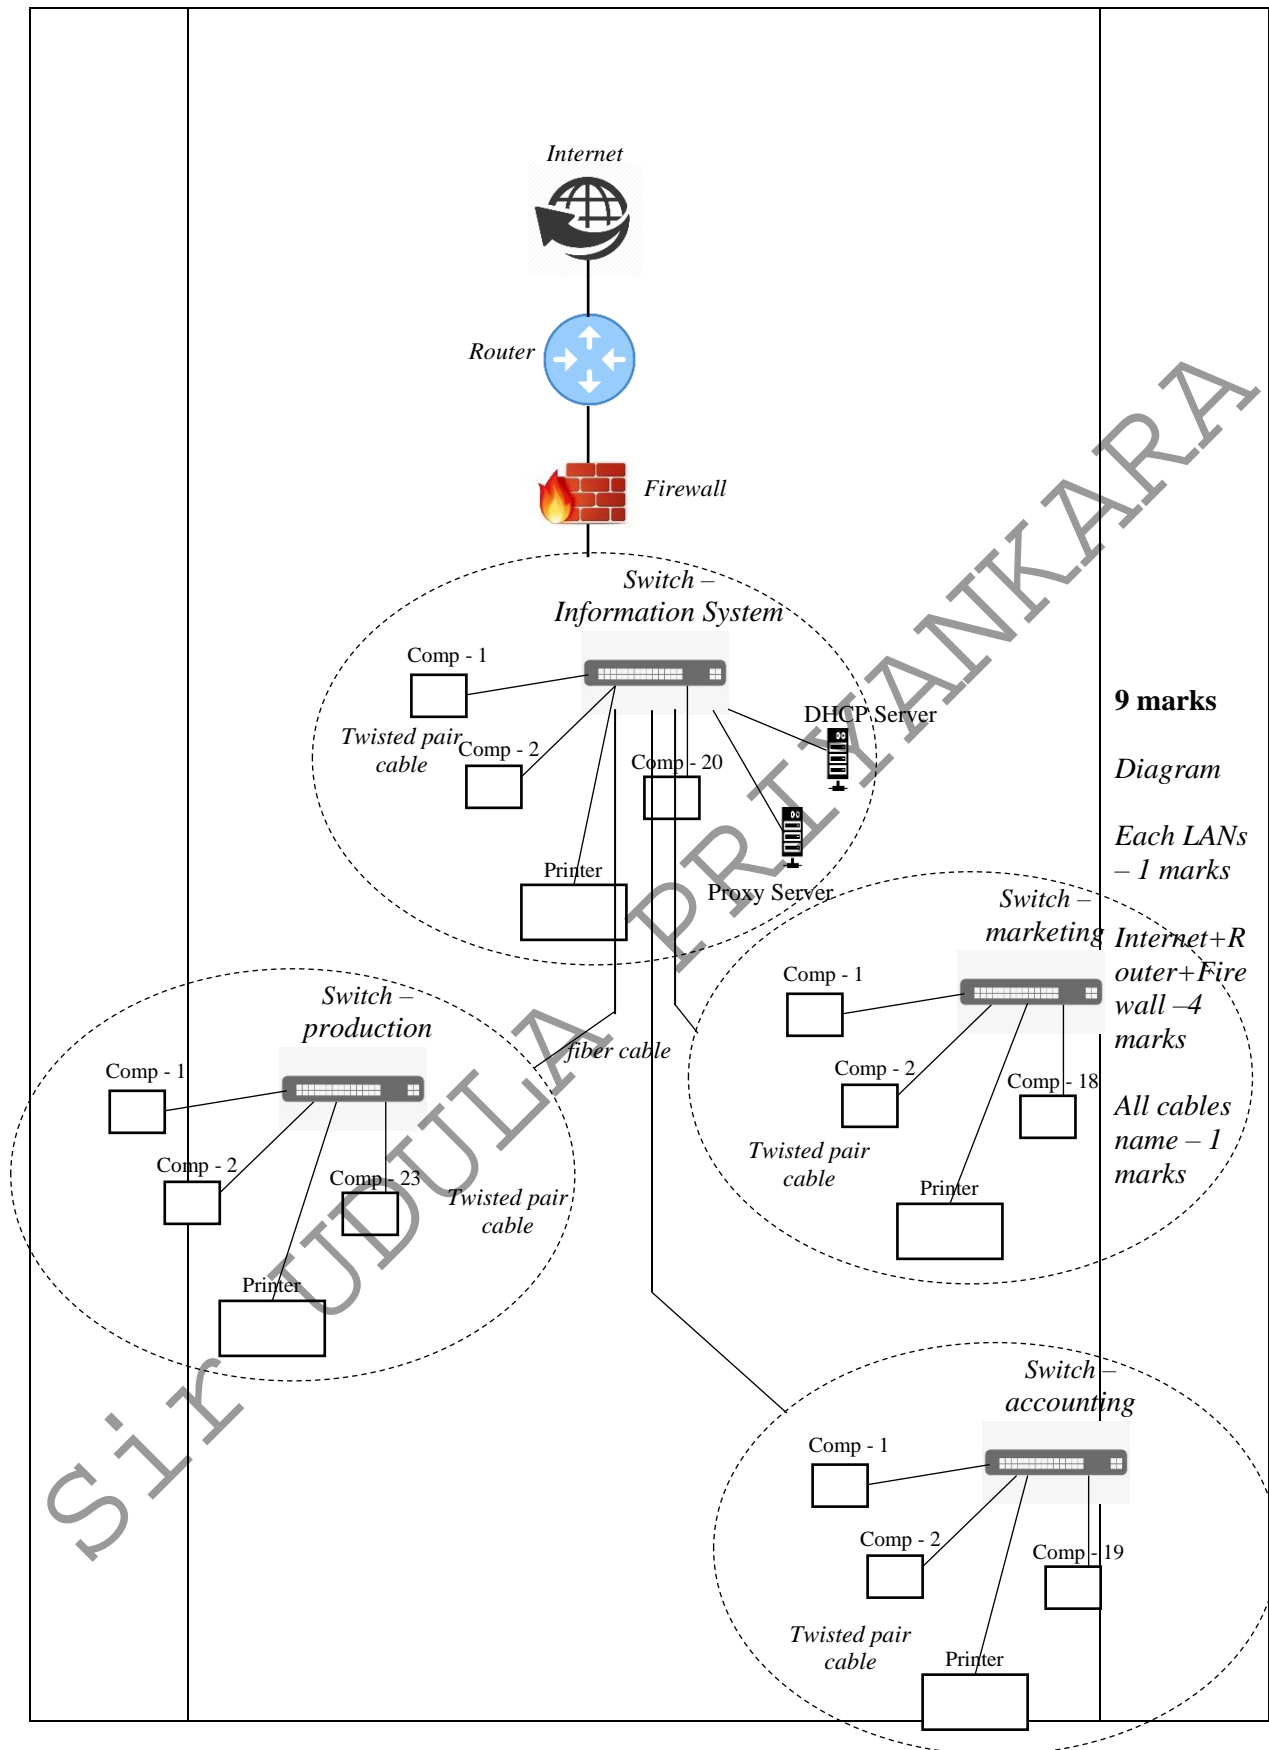

(3)(b)	① Page ② Offset or displacement ③ Page table	3 marks [1 for each]
(3)(c)(i)	PCB is a data structure that contains information of the process related to it. or PCB stores many data items about process that are needed for efficient process management.	1 marks
(3)(c)(ii)	processID or Process Number	1 marks
(3)(c)(iii)	<ul style="list-style-type: none"> Switching a process from one state to another. When switching perform, it stores the old running process's states. While a new process is running in the system, the previous process must wait in a ready queue. The execution of the old process starts at that point where another process stopped it. 	2 marks Or equivalent meaning .
(4) (a)(i)	3NF Because the table does not have any transitive dependencies or DepName attribute is a determinant and other attributes such as Manger is fully dependant on DepName.	3 marks [1+2]
(4)(a)(ii)	Yes. The table does not have any transitive dependencies or ID attribute is a determinant and other attributes such as FirstName and LastName are fully dependant on ID attribute.	3 marks [1+2]
(4)(b)(i)	It is a weak entity.	1 marks

(4)(b)(ii)	BranchNo + Bcode	1 marks
(4)(b)(iii)	<i>Bank</i> (<u>Bcode</u> , Name, Address) <i>Branch</i> (<u>BranchNo</u> , <u>Bcode</u>)	2 marks [1+1]
