Dear Esteemed Leaders and Decision-Makers,

On behalf of the Dika-Moka Youth Development Forum and concerned citizens across the Global South, we submit this urgent briefing as a moral and existential intervention to end systemic violence threatening humanity and life on Earth.

## How Nuclear Weapons Could End Civilization

Nuclear weapons pose catastrophic threats through:

- **Immediate Destruction & Radioactive Fallout:**

- A single thermonuclear warhead (e.g., B83, 80× Hiroshima) can kill over 500,000 instantly.
- Fallout (e.g., cesium-137) causes long-term cancers, infertility, and environmental poisoning.

- **Nuclear Winter & Global Famine:**

- A regional war (e.g., IndiaPakistan) could inject 5 million tons of soot, lowering temperatures by 5°C, causing 2 billion to starve.
- Ozone depletion (2050%) amplifies UV exposure, collapsing ecosystems.

- **Infrastructure Collapse:**

- EMPs from high-altitude blasts wipe out communication and electricity networks, crippling hospitals, water systems, and economies.

- **Human Extinction Risk:**

- A U.S.Russia war (1,000+ warheads) could kill 300 million instantly, with 5+ billion starving, ending civilization.

# Nuclear-Armed Countries: Arsenals and Non-Proliferation Policies

|||||

---

Country	Warheads	First Test	NPT Status	Opposition to Others' Programs
---------	----------	------------	------------	--------------------------------

---

Russia	4,309	1949	Signatory (NWS)	Condemns NATO; opposes Iran/DPRK
United States	3,700	1945	Signatory (NWS)	Sanctions Iran/DPRK; export controls
China	600	1964	Signatory (NWS)	Criticizes U.S. defenses; sanctions Pakistan/DPRK
France	290	1960	Signatory (NWS)	Supports EU non-proliferation; opposes Iran
United Kingdom	225	1952	Signatory (NWS)	Increased to 260 warheads (2025); opposes Iran
India	180	1974	Non-signatory	Opposes Pakistan; rejects NPT
Pakistan	170	1998	Non-signatory	Seeks parity with India; accused of proliferation
Israel	90	1960s (est.)	Non-signatory	Ambiguity policy; bombed Iraq/Syria reactors
North Korea	50	2006	Withdrew (2003)	Tests ICBMs; sells missile tech

---

*NWS = Nuclear-Weapon State under NPT*

## Key Concerns:

- Modernization hypocrisy: NPT members pledge disarmament but invest in upgrades.
- Double standards: Allies like Israel face no sanctions, while Iran is targeted.
- Deterrence paradox: Nuclear powers prevent others acquisition, enforcing a violent hierarchy.

## The Destructive Cycle of Racism, Exploitation, and Environmental Collapse

The global arms and mining industries interlink racism, economic dominance, and environmental destruction, leading to:

- Eradication of Indigenous and Black communities via war, displacement, and pollution.
- Planetary destabilization through ecological collapse and militarized resource theft.
- Self-destruction of oppressive systems collapsing under their own weight.

## The Racist Foundations of the Arms & Mining Industries

- **Ongoing Plunder of African Resources:**
  - African minerals (cobalt, uranium, gold) fuel Western military production.
  - South African arms firms sell to oppressive regimes (e.g., Saudi Arabia, Israel, Mozambique).
  - Destabilization ensures cheap extraction for profit.
- **Environmental Racism:**

- African communities suffer cancer, birth defects, and water poisoning from mining waste.
- Weapons testing (depleted uranium, chemical weapons) targets vulnerable populations.
- **Hypocrisy of Western Defense Trade:**
  - Western states buy South African weapons while ignoring African conflicts.
  - Arms profits prioritize over human rights.

## **The Self-Destructive Nature of Racist Exploitation**

- **Accelerating Climate Collapse:**
  - Mining and arms industries are major polluters, accelerating extinction.
- **Rise of Resistance:**
  - BRICS, African unions, and youth movements reclaim sovereignty.
  - Western hegemony fades as resources deplete and debt rises.
- **Spiritual & Moral Bankruptcy:**
  - Domination breeds corruption, fascism, and societal decay.

## **The Path Forward: A Call for Accountability**

- **Immediate Demands:**
  - Stop selling arms to oppressive regimes.
  - Pay reparations for ecological destruction and stolen wealth.
  - Invest in sustainable industries instead of war.
- **Global Solidarity:**
  - Support African nations in reclaiming mineral sovereignty.
  - Back youth-led, Indigenous, and ethical resistance movements.
- **End the Suicide of Racism:**
  - The West must recognize: you are not killing others you are killing yourselves.
  - Every bomb sold and mine opened poisons your own future.

## **Final Warning**

The systems of racism and extraction are self-destructive. The weapons you sell fuel wars that will destroy your economies. The mines you dig poison the water your grandchildren will drink. The cycle ends when you choose justice over greed.

## **Conclusion: The Path to Survival**

Only total nuclear disarmament can secure a future. The Treaty on the Prohibition of Nuclear Weapons (TPNW), signed by 122 countries, must be respected and implemented.
