## CAPABILITY STATEMENT

### Capabilities

Experts in:

- Writing and developing international technical standards for exoskeletons, robotics, and homeland security technologies
- Advising and managing programs in technical standards, CBRNE detection, first responder equipment, exoskeletons, and critical infrastructure protection
- Helping people and organizations think through their challenges and aspirations to find a path forward
- Inspiring students to get into STEM through podcasts and international student competitions
- Building interagency, intergovernmental, and international coalitions and relationships

### Differentiators

- 20+ years of experience working with the Federal government as a federal employee, private sector consultant, and non-profit executive
- Internationally recognized leader in technical standards development
- Experience translating science and engineering concepts to plain language for leaders, legislators, and the public
- Federal Executive Institute’s Leadership for a Democratic Society program

### Past Performance

- Launched and led the ASTM Exo Technology Center of Excellence
- Hosted “The Follow Seas” podcast, Office of Naval Research
- Facilitated the U.S. Army Joint Service Exoskeleton Technical Interchange Meeting
- Coauthored the White House’s “National Strategy for CBRNE Standards”
- Initiated the DHS SAVER program to test & evaluate 40+ homeland security technologies creating over 1000 documents for the responder community
