

Carbon Shield

CARBON OFFSETTING TOOL

About Us

Carbon Shield connects sustainability oriented Consumers with local NGO offices through the e-commerce channel. We enable marketplaces and encourage individuals to offset shipment carbon emissions and contributing towards local sustainable projects in the Netherlands.

Our Services

Marketplace Collaboration

We integrate our tool with the marketplaces free of charge, provide ongoing support, and strong relationship.

NGO Partnerships

We provide a new source of funds for NGOs to actively combat climate change and engage community to do it at scale.

Consumer Awareness

After calculating the exact emissions, one can compensate a chosen amount at the checkout of an online shop for a sustainable local cause.

Shield

CARBON OFFSETTING

How do we work?

1. Marketplace implementation

We handle the implementation of the marketplace, enabling customers to select a (NGO) project of their choice as they proceed to checkout during their online shopping experience.

2. Moving funds

We collect funds from customers and allocate them to partnered NGO projects, ensuring full transparency through detailed tracking on our channels.

3. Engaging in project development

Stay informed about the destinations of your investments through our live blogs, which provide updates on the projects we have supported and the amount of carbon offset achieved to date.
