The Mission for Da'wa
in Latin America

muslimslatinos@gmail.com

This Tasbih or Subha is a special handicraft. It is made from the seeds of Tagua and Asai, two varieties of palm trees that grow in the Amazon area of Andean countries.

The wood of these seeds is known as vegetable ivory. The color is obtained with natural plant dyes.

This piece is itself a symbol of the spread of Islam in Latin America. By purchasing it, you are contributing to the support of Dawa work in this part of the world, which is inhabited by people of natural belief in Allah, but where Islam is almost unknown.
