

“A place where your child learns through play and grows happy”

About Us

“At Learning Loom, we offer a comprehensive program for children aged 1 to 5 that combines recognized early education methodologies, promoting science, engineering, art, and mathematics in a practical and fun way. Each activity is designed to develop cognitive, physical, social, and emotional skills while children explore, experiment, and learn with purpose. In a safe and stimulating environment, guided by highly qualified staff, your child will develop confidence, creativity, and critical thinking preparing for academic and personal success from early childhood.”

Comprehensive Program

At our Learning Center, we offer a unique program designed with a holistic approach that develops all aspects of your child cognitive, physical, social, emotional, and creative.

Each activity is carefully planned following the 7 areas of learning, while we integrate fun as the main way of learning, stimulating curiosity, exploration, and critical thinking from early childhood.

What Makes Our Program Unique

Active and play-based learning: every activity allows children to explore, experiment, and solve problems, developing cognitive and social skills at the same time.

Holistic development: we combine learning areas that strengthen science, engineering, art, and mathematics, creating meaningful learning experiences.

Personalized attention: our qualified staff observes and guides each child according to their pace and interests, ensuring that every child reaches their full potential.

Safe and stimulating environment: spaces are organized for reading, art, and motor skills, with materials within children's reach to promote independence

Program Benefits

For children:

- Balanced and holistic development (cognitive, physical, social, and emotional)
- Curiosity, critical thinking, and creativity
- Social and emotional skills: cooperation, confidence, and independence
- Academic readiness and 21st century skills

For parents:

- Peace of mind: safe and professional learning environment
- Future preparation: competencies and skills for school and life
- Meaningful and enjoyable educational experience
- Personalized attention and continuous progress tracking

Examples of Integrated Activities

Stories and songs: children listen to stories, dramatize, and create artistic activities related to the theme.

Math and construction (Early Mathematics + Engineering): counting, patterns, and building towers or bridges using blocks and other hands-on materials.

Nature exploration (Understanding the World + Science): observing plants, insects, or water, recording findings, and conducting simple experiments.

Art applied to projects (Creative Expression): painting, modeling, and music integrated into the scientific or mathematical projects of the week.

Physical and social development (Motor Skills + Social Skills): group games, motor circuits, and collaborative activities that encourage teamwork and empathy.

Our Facilities

-We offer a bright and welcoming environment designed for both comfort and creativity:

- Spacious, colorful classrooms
- Reading and sensory corners
- Playing areas
- Safe and monitored learning spaces
- Age appropriate toys and educational materials

Safety is our priority all facilities are childproof, sanitized daily, and supervised by trained staff.
