Summary

Passionate about IT since always, I enjoy exploring all aspects and having a comprehensive understanding of this wonderful technical world. Specialized in Blue Team security, I am constantly seeking new challenges.

Experience

Cybersecurity Analyst – Okta

Industrial Alliance (Independent Consultant)
Dec 2024 - Present

- Refactored existing infrastructure to meet security standards
- Implemented robust CI/CD pipelines
- Managed certificate rotation and associated processes

Okta Analyst/CIAM developer

Circle K (Thirdbridge)
Dec 2023 – Dec 2024

- Managed and owned CIAM Okta Tenants for clients, supporting over 30 million users
- Developed and implemented complex Python scripts for seamless integration.
- Utilized Infrastructure as Code like Terraform to ensure robust CI/CD pipelines for Okta.
- Liaised with vendors to understand their OAuth2 and OIDC integration needs and incorporated them into our systems.
- Assumed sysadmin responsibilities, managing employee access, processes, and security under the CTO's guidance

IT support specialist

Eidos Montreal
Aug 2023 – Dec 2023

- Diagnosing and solving hardware and software problems to minimize downtime.
- Collaborating on IT security measures to safeguard company data.
- Aiding in the rollout of new technologies to support various departments.
- Conducting training sessions to foster proficient use of IT resources.
- Contributed to the development of a PowerShell library to streamline workflow and enhance team collaboration.

Jr. IT specialist - Consultant

2K Games (Vaco)
Feb 2022 - August 2023

- Collaborated closely with the DevOps team to contribute to the development of an app utilizing various APIs as Okta and ServiceNow to enhance and automatize workflow.
- Played a pivotal role in guiding IT operations for the studio, making informed decisions to facilitate smooth operations.
- Developed numerous command-line and GUI programs, substantially increasing team efficiency and productivity.
- Led various IT projects and provided support to users globally, demonstrating strong leadership and a commitment to user satisfaction.
- Managed users, access control, groups, and authentication via Okta admin.
- Administered a hybrid user environment across Okta, Azure AD, Workday and AD.

IT Technician

Ubisoft (Present)
Sep 2021 - Jan 2022

- Spearheaded the overnight setup of workstations for Ubisoft employees, enhancing workflow continuity and reducing downtime.

Technician

Solutions MC
Oct 2021 - Dec 2021

- Managed IT services for over 80 small to medium non-profit organizations, overseeing software and hardware support and facilitating physical networking solutions.
- Implemented initiatives to reduce production downtime, significantly enhancing workflow and operational efficiency.
- Earned high praise from internship supervisor, showcasing a strong dedication and competency in the IT field.
- Utilized IT expertise to guarantee efficient service delivery, resulting in positive feedback and optimized operations for multiple NPOs.

Education

Cégep Gérald-Godin

AEC, Mobile Applications Development
2023 - 2024

- Acquired in-depth knowledge of Java and Object-Oriented Programming, mastering core programming concepts and best practices.
- Gained hands-on experience in iOS and Android development, broadening expertise in the mobile application domain.

Collège de Rosemont

AEC, Network and System Administration/Administrator
2020 – 2021

- Gained mastery over Linux server operations, including setting up servers with DNS, DHCP, FTP, and more, as well as managing firewalls using iptables.
- Virtualization techniques utilizing ESXI, VMware, Hyper-V, and VirtualBox.
- Network management, including configuring routing, VLANs, port security, and overseeing comprehensive Active Directory and Microsoft Exchange management.
