## Pipe and Joint System

### Description

A pipe joint system is a modular system, often used in industrial settings, that utilizes pipes and connectors (joints) to create structures and material handling solutions. It offers flexibility and customization for building various structures like workstations, storage systems, or material handling equipment. The system typically includes pipes, joints, and sometimes accessories like roller tracks and casters.

## Multipurpose Plastic Containers & Pallets

### Description

Products multipurpose plastic to the evolving needs of the industrial market. By bringing product such as multipurpose containers, plastic pallets, bottle cases, dust bins, poultry equipments and many more.
