for best performances*

An Easy Access to Care

AB ELECTRO-C

Antipyretic, Anti-inflammatory and Antistress

Ingredients:

Each 1 Kg contains

Acetaminophen (Paracetamol)25%
Vitamin C50%
Citric Acid3.15%

Sodium4%
Potassium1.8%

Indications:

Acetaminophen: Categorized alongside NSAIDs (nonsteroidal anti-inflammatory drugs) due to its ability to inhibit the cyclooxygenase (COX) pathways. It exerts central actions which ultimately lead to the alleviation of pain symptoms. The antipyretic actions of acetaminophen are attributed to direct action on heat-regulating centers in the brain, resulting in peripheral vasodilation, sweating, and loss of body heat. Acetaminophen is a well-tolerated drug and produces few side effects from the gastrointestinal tract.

Vitamin C: Water-soluble antioxidant compound, which protects cells against oxidative damage and improves immune system function. Adding supplemental vitamin C to the diet is beneficial for poultry subjected to stress, including heat stress from exposure to hot weather. Vitamin C promote growth by acidifying the gastrointestinal contents, improving nutrient digestibility, and reducing pathogen loads by modifying intestinal pH, so increases the solubility of feed ingredients. The digestion and absorption of nutrients is improved.

Electrolytes: play a crucial role in maintaining body acid-base balance and osmotic pressure in poultry farming . The balance of electrolytes in the diet is important for optimal performance, especially during the finishing stages of growth and under heat stress conditions.

AB Electro-C provides antipyretic and anti-inflammatory effects, relieves pain, increases resistance against bacterial and viral diseases.

AB Electro-C contains vitamin C which plays an important role in maintaining the activity and vitality of the animal's body, and increase the resistance, especially after stress and fatigue.

AB Electro-C reduces stress in pigs, poultry, and cattle during vaccination and season transitions.

AB Electro-C helps antistress in the hot season or during the vaccination period in poultry.

AB Electro-C can be used during treatment with antibiotics and sulfa drugs.

AB Electro-C can be used as a treatment for fever of unknown origin.

Packaging: 5 kg/bag

Dosage and Administration:

0.5 - 0.8 g/10kg of Body Weight
or 1kg/ 2,000 - 4,000 liter of drinking water
