CAPABILITY STATEMENT

Cross Country Land Services, LLC
Strategic Partner for Compliant Site Execution & Environmental Stewardship

EXECUTIVE SUMMARY

Cross Country Land Services, LLC (CCLS) provides professional-grade site execution with a focus on environmental compliance. With a robust fleet of specialized machinery and 10 dedicated field crews, we offer the scale of a regional firm with the precision and stewardship required for Maine's protected lands.

INSPECTION & BIOSECURITY PROTOCOLS

- **Asset Decontamination:** Before mobilization, all equipment undergoes a certified biosecurity scrub. Team leads verify that tracks, buckets, and undercarriages are free of soil and organic debris to prevent invasive species introduction.
- **Site Survey & Hydrology Mapping:** 100% DEP-certified crews conduct a pre-work walkthrough to identify critical riparian boundaries, drainage patterns, and protected vegetation for preservation.

REDUNDANT HIGH-PRODUCTION FLEET

We maintain a diverse, specialized fleet to minimize site disturbance while maximizing efficiency:

- **Industrial Mulching:** Prinoth Raptor 500 & ASV RT-135/RT-120 (Mass Clearing) | CAT 255XE (Technical/Tight-Access).
- **Precision Excavation:** Link-Belt & CAT Heavy Excavators (Foundation Prep & Stormwater Integration).
- **Grading & Stabilization:** Liebherr & CAT LGP (Low Ground Pressure) Dozers for mass grading in sensitive or saturated soils.
- **Access & Logistics:** High-capacity Timber Matting & On-Site Aggregate Management.

FINANCIAL STRENGTH & RISK MITIGATION

- **Bonding Capacity:** \$25M Single-Project Capacity. This reflects a high degree of third-party vetted financial stability and project completion reliability.
- **Comprehensive Insurance:** Full General Liability (\$2M Aggregate), Commercial Auto, and Statutory Workers' Compensation.
- **Operational Redundancy:** 10 Fully Independent Crews ensuring zero project interruptions and rapid mobilization.

DIFFERENTIATORS & CERTIFICATIONS

- 100% Certified Workforce: Every crew member is Maine DEP Erosion & Sediment Control and OSHA 10 Construction certified.
- Advanced Technical Training: Field crews are currently certified in Shoreline Stabilization and Stream Crossing. Management certifications finalized March/April 2026.
- Leadership Credentials: Management is OSHA 30 and USACE Standards Compliant.
- Veteran-Owned (VOSB): Disciplined execution with a focus on accountability and environmental integrity.
