

VINILE® - Privacy film

With our VINILE® film you will achieve instant selective privacy with a single "click" of your remote.

Our VINILE® film has different widths and heights, which gives it enormous versatility when it comes to integrating into any type of location (partitions, doors, windows, mobile elements).

Possibility of installation on curved surfaces. We can also carry out installations at different heights or even by zones.

We have a wide variety of colors and the possibility of generating specific and personalized colors for any brand. Imperceptible transparent wiring for a totally amazing installation.

A very useful and hygienic solution when it comes to generating privacy in toilets and bathrooms both in offices or private use, as well as in hospitals, clinics...

The VINILE® film is die-cut, which allows both to choose a specific area when privatizing, and to integrate logos or signage.

Our VINILE® film can be activated from any type of switch, sensor, remote control or home automation.
