

VINILE Ghost®

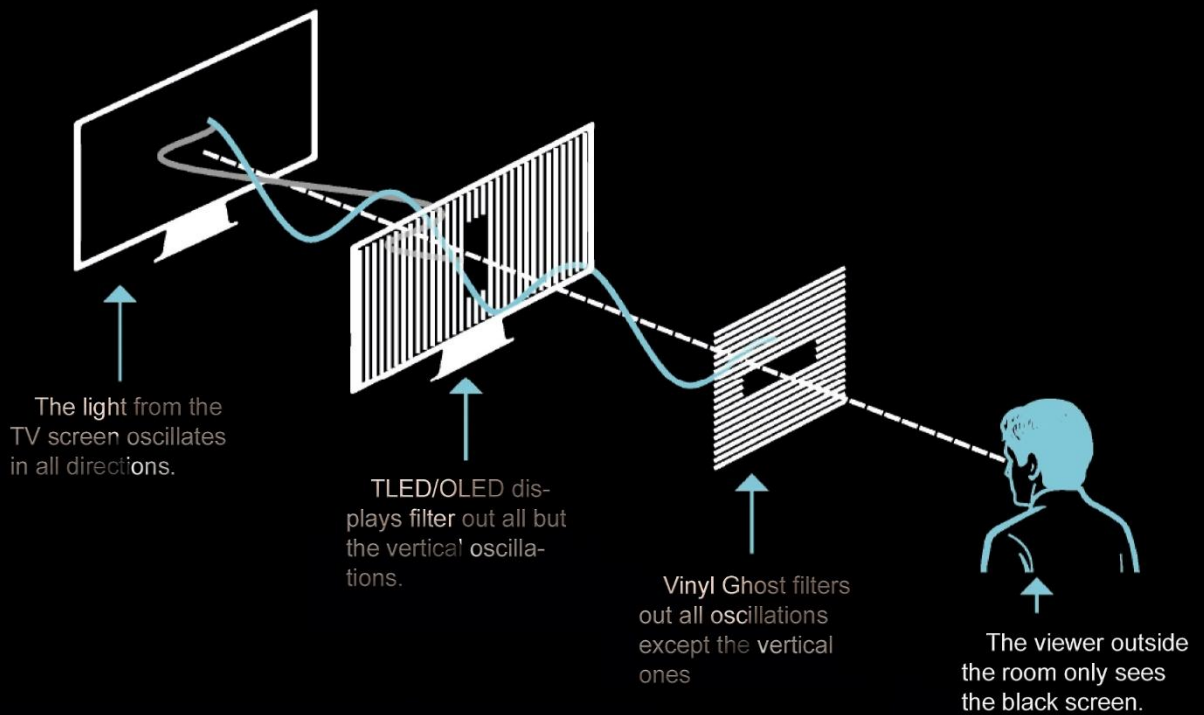

Vynile Ghost is an innovative LED blackout technology film for offices and meeting rooms, which allows blocking the content of LED screens from outside view.

A smart adhesive vinyl with high transparency, it can be easily affixed to any transparent glass, whether on glass walls or office partitions. Anyone looking into the meeting room from the outside will only see a black screen, while everyone inside the room will be able to work freely and at ease on the TV content.

This is how Vinyl Ghost works

Technical Data Sheet

Product name	VINILE GHOST	Surface Treatment	VINILE GHOST
Application	Architecture Glass Films	Orientation	0 Degree (Standard Vertical)
Compatibility	LED Backlight Liquid Crystal Display	Working Environment	-5 ~ + 60 °C / 90% RH
Length	100 feet (30.5 m)	Severe Test Environment	-30 ~ + 80 °C / 90% RH / 1200 H
Width	36/48/54/56/60 inch	Storage Environment	10 ~ 30 °C / 70% RH
Visible Light Transmittance	42%	Packaging & Label	Composite Sealing / Sun & Moisture Proof Warning
Blocking Efficiency	99.95%	Effective Warranty	5 Years
Effective Thickness	.007 +/- .0007 inch	Test Report	REACH SVHC 263 / RoHS
Color	Clear Grey		VOC, CA 01350
Material	PET + Polyvinyl + Triacetate		Flammability, ASTM E 84, Class A
Backing Adhesion	Acrylic Pressure-sensitive Adhesive		Fire Safety, EN 13501-1
			Flammability, GB 8624-2012
