Who we are?

Everything begins with a dream.

Just like our story.

We set out with the question, "What should the next step in living spaces look like?" Keeping future advancements in mind, we defined our brand name as "PorFloor."

Whether it's a home or an office, we believe every living space should be luxurious and dazzling.

With this approach, we wanted to redefine the traditional concept of flooring.

Our SPC flooring and wall panels combine the elegance of nature with the latest technology, transforming every space into a unique living environment.

You may have just come across our brand today.

However, we have already reached places from the UK to Chile, Canada to Russia, Poland to Belgium, and even the Netherlands. The love we've received in such a short time has motivated us even more.

At our 25,000 square meter production base, we harness innovation to accompany new living spaces.

Our R&D team pushes the boundaries of innovation, working on new materials and production techniques to strive for better.

"Sustainability" is not just a term for us. It's not only about producing long-lasting products, but also about minimizing our environmental impact—this is a journey that embraces both.

Recycling-focused production processes, we are fulfilling our responsibility to leave a more livable world for future generations.

Our Vision

Every living space should be unique...

Our mission is to be a pioneer in creating touches that will make a difference in every living space.

We combine technology, aesthetics, and sustainability in perfect harmony to touch people's lives.

And, of course, to transform every space into a masterpiece. Therefore, in our world, we don't see spaces as just physical areas.

We aim to transform them into a stage for living.

Our Mission

Everyone has their own "bests." At the forefront of our "bests" is "To be best producer of SPC Flooring and wall panels to be your solution partner."

In line with this mission, we have five key principles:

- 1. Innovation:** We develop industry-leading technologies and designs through continuous R&D efforts.
- 2. Customization:** We offer solutions that transform every customer's unique vision into reality.
- 3. Sustainability:** By using environmentally conscious production processes and materials, we contribute to the future of our planet.
- 4. Excellence:** We maintain the highest standards at every stage, from production to customer service.
- 5. Global Impact:** By increasing our presence in international markets, we introduce Turkish design and manufacturing quality to the world.

WHY PORFLOOR?

With PorFloor, you won't just choose a floor for your space! We will be by your side to accompany every step you take.

That's why we stand with you under the motto "A new step into living spaces."

Here are just a few reasons why you should choose PorFloor from the thousands of "WHYs":

Long-Lasting Quality:

At PorFloor, we prioritize durability and longevity in our SPC flooring and wall panel solutions. With an extensive warranty up to 25, we demonstrate our confidence in the quality of our products and our commitment to customer satisfaction.

Eco-Friendly:

We protect nature by using sustainably sourced raw materials and implementing recycling-focused production processes.

Health Focused:

With its allergy-friendly and hygienic properties, we enhance your quality of life.

Exceptional Value:

At PorFloor, our SPC (Stone Polymer Composite) flooring and wall panels are crafted from high-quality materials. We don't just add an aesthetic touch to your spaces; we also provide durable and long-lasting solutions.

***With our sample service, we offer you the opportunity to experience our products for free before making a purchase**

Steps Toward the Future: R&D and Innovation

Every new step is a new discovery in our world...

We are not just laying the foundation for today but also paving the way for tomorrow!

At our production base, we meticulously examine every process. Our goal is quite simple: with every R&D investment and innovation, we strive to harmonize comfort, aesthetics, and durability in every step you take.

With patterns inspired sometimes by nature, but always by life, we work to accompany both today and tomorrow.

We develop every product of PorFloor to leave a mark on the living spaces of tomorrow.

LET IT SPILL

PorFloor's innovative SPC floorings and wall panels act as a shield against water. Thanks to the specially developed technology, our products are resistant to water leaks.

What does this mean?

A spilled glass of water in your kitchen, humidity in your bathroom, or an unexpected water flow are no longer a problem. PorFloor floors maintain their shape and structure even in these challenging conditions, without swelling or warping.

“

Water...

The source of life...

*But sometimes, the
nightmare of floors.*

”

01

PorFloor's SPC floorings provide exceptional durability against water leaks, safeguarding your living spaces. Thanks to their special structure, they offer long-lasting protection against moisture and water damage.

02

Thanks to the water-resistant properties, our SPC floorings are ideal for frequently mopped public spaces, kitchens, and other wet areas. They not only enhance the appearance of your spaces but also make them safe and durable for daily use.

A SUSTAINABLE FUTURE

Sustainability is not just a concept for us. It's in our DNA!

When you choose PorFloor, you're adding value not just to your home, but to our planet as well.

Because for us, every floor is a green legacy we leave for future generations.

SPC PARKE / SPC FLOORING
