

## Guide to Portrait Sizing

Here are examples of previous commissions I've completed which may help you decide which size to choose. I will provide a mock up to give you an idea of how the finished drawing will look and will advise you if I think an alternative size would suit the selected photo better (normally if I think a square mount/frame would be better than a rectangular one, for instance).

**Small Frame Size 10" x 10"**

**Small Frame Size 12" x 10"**

**Medium Frame Size 12" x 12"**

**Medium Frame Size 14" x 11"**

**Large Frame Size 16" x 12"**
