

COWBOY.CARE

PROFESSIONAL COW HOOF CARE

We produce top quality items for the farriery and cattle hoof care sector. We have been suppliers in the sector for over 20 years and we pride ourselves on the loyalty and satisfaction of our customers.

www.cowboy.care - ceo@cowboy.care +39(0)5 977 6377

Professional products, comfortable to use and of the highest quality!

We are specialized in the care of bovine hooves and provide all the materials and tools essential to the Farrier for his work.

Milling discs, insoles of various sizes and glues in formats convenient for professional use.

OUR COMPANY

We are an Italian company born in the Modena area over 20 years ago.

We started with the production of glues but over time we have added various products to our offer until today we offer a complete range for bovine farriery.

WHY CHOOSE US

We have a strong relationship with the environment and offer products made of 80% biodegradable material but at the same time of the highest quality. With our business we want to contribute to a modern and eco-compatible agriculture in which waste are minimal.

MAIN CATEGORIES

- **GLUE CARTRIDGES**
- **INSOLES & BANDAGES**
- **TRIMMING DISK**
- **BLADES & SCREWS**
- **GLUE GUN**
- **VETENARY KNIFES**

DISCS FOR HOOF CARE

Cleaning of cattle hooves is the most important and most delicate part of the treatment. The products used must be comfortable to use due to their excellent cutting capacity and for their easy handling. We know how important it is and we have studied our products with very resistant materials, in order to ensure long-term sharpness

EVO 6-3

Professional disc for Bovine Farriery. 6 Interchangeable blades with 3 mm cutting edges. 4-sided cutting blades! Stainless Steel Screws. Ultra-resistant - Very high durability. Professional quality titanium!

EVO 6-2 CLOSED SLOTS

6 Interchangeable blades with 2mm cutting edges. 4-sided cutting blades! Stainless Steel Screws. Ultra-resistant - Very high durability, professional quality titanium!

EVO 6-2 OPEN SLOTS

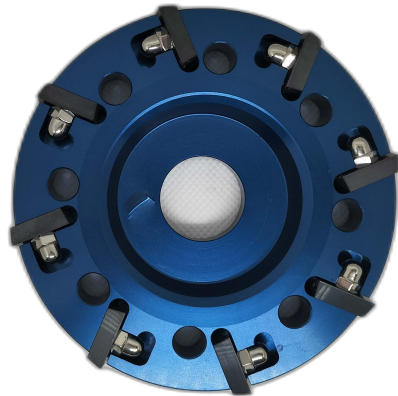

Professional disc for Bovine Farriery.
6 Interchangeable blades with 2 mm cutting edges Open slots.

High-durability professional blades.
4 cutting edges for each blade.

EVO 8 STAR

Professional trimming disc with 8 slots. High-durability professional blades.

EVO 6 STAR

Professional trimming disc with 6 slots. High durability professional blades.

EVO 4 STAR

Professional trimming disc with 4 slots. High durability professional blades.

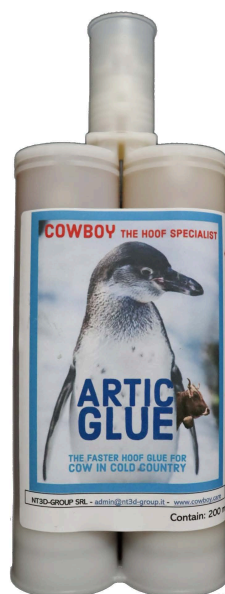

ARTIC GLUE

It is the perfect product for the cold seasons. The Farrier can work calmly, because thanks to its enhanced composition, the bond will be strong and durable even in adverse conditions such as humidity and low temperatures.

The two components harden quickly, allowing the treatments to be carried out in a short time. In fact, as soon as the temperatures exceed 10 ° C it is not recommended to use this glue but the 4 Seasons Glue.

EASY COW

It is a glue very easy to use.

**YOUR PERSONALIZED
BRAND NAME!**

COW HOOF GLUE CARTRIDGES

Professional glue for farriery.
Two-component to be used with specific
mixing tips.

Size: 200ml, 160ml and 50ml.
Use the manual gun for application.
Storage at a minimum temperature
of 15 ° C.

Keep away from low temperatures.

Our glue is formulated with the best
component to achieve maximum
efficiency.

The good mix of the two components is
very important (necessary for good
adhesion).

For this it is recommended to use the
cartridge with our mixing tips because
the length and the internal structures
are ideal for our glue.

FOUR SEASON GLUE

It is the standard version that can be
used in every season of the year. Easy
to use on wooden or rubber insoles. The
adhesion is durable and stable.

Maximum adhesion even in the pres-
ence of imperfections on the glued
surfaces.

The glue is fixed in a few seconds, after
30 sec / 1 minute it is already possible
to place the cow's foot on the ground.

In winter it is necessary to use the
cartridge heater to keep the glue at the
optimum operating temperature.

GLUE APPLICATION PISTOL

MANUAL PISTOL
FOR CARTRIDGE
GLUE OF 200ML

PROFESSIONAL, Entirely in metal
with ERGONOMIC handle.

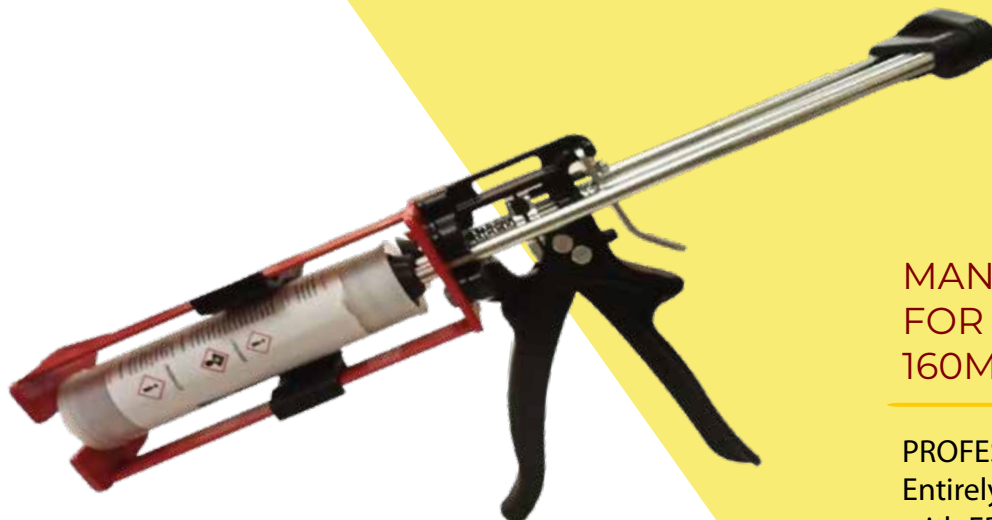

MIXER FOR THE GLUE

Disposable cannulas for applying the glue
on the insoles and hooves of cattle.

Different formats for the various cartridges:

- 1 - 200 ml cartridges, pack of 10 pieces
- 2 - 200 ml cartridges, pack of 10 pieces
- 3 - 160 ml cartridges, pack of 10 pieces

Once used, the cannula should remain on
cartridge until the next application to avoid
contact with oxygen of the unused glue.

MANUAL GUN
FOR CARTRIDGE
160ML GLUE

PROFESSIONAL,
Entirely in metal
with ERGONOMIC handle.

HOOF CARE KIT FARMER

Produced with material from RENEWABLE and RECYCLABLE sources.

COHESIVE BANDAGES FOR HOOF CARE

High quality cohesive bandages. Individually sealed. Mixed colours. 10 cm high. Length 4.5 mt. Excellent adhesion and protection. They can be "cut" with the hands without the need for tools. Pack of 120 pieces (10 x 12).

BLACK AND SUPERBLACK PROTECTIVE TAPE 5 Pcs

Adhesive Cotton Tape Adhesive with Natural Rubber for the insulation and protection of the hooves.

2 types of insulation: breathable Black tape or Superblack for total insulation.

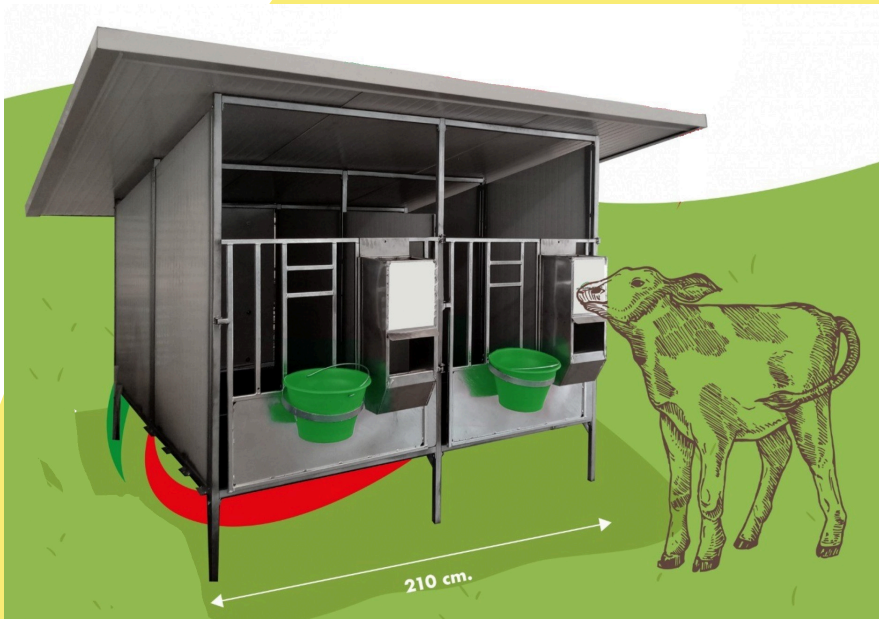

CLEANING NAPKINS

Cleaning napkins EXTRA CLEAN or antibacterial napkins.

CALF BREEDING

RAISED BOX FOR CALVES

Raised box for the weaning of calves from 0 to 3 months, in hot galvanized steel of suitable dimensions that allow the calf to grow in a healthy and comfortable environment. The grating has been studied in fiberglass and is ideal for the calf's legs.

The walls are in washable and totally waterproof marine laminate, durable over time. The front gate is equipped with a bucket holder, a 9 lt pvc bucket and, upon request, a stainless steel manger, catch and name board. The roof panel is a 40 mm sandwich and allows you to create an ideal microclimate for the health of the calf, cool in summer and warm in winter.

The Boxes measure 200x100 cm and are modular, designed to be attached to the next. It is always possible to attach other boxes even after the purchase.

STABLE RUG - 100% RECYCLED

Blankets produced using PFU (out of use tires). They are produced with hot forging. When applied in the stable they are filled with sand and covered with straw in order to keep the cubicle cleaner, with a lower risk of mastitis, infections and injuries to the limbs of the animals.

Dry berth always in order. Aseptic environment, it prevents the formation of microorganisms and consequent infections. Unalterable in form and composition, the material is not affected by manure. Comfortable and rested fit cows. Preference of the cubicle and therefore greater rest of the animal even in midsummer as the sand guarantees a cool bed. Less work for the farmer. No damaged hocks. No mastitis.

ENERGY SAVING FARM GREENHOUSE

Semitransparent PV

EcoFarm Solution - Generate Energy Save Water Save money With New Transparent Photovoltaic panel generate Energy and keep light in Farm and Greenhouse. The rain water can be stored in big tank to be used in no-rain season. The photovoltaic semitransparent panels reduce the direct sun impact , in the mean time the energy generated can be used for ventilation , heating or cooling the inside space. Is possible to connect a battery storage to use power in the night . Storage battery can be moved by wheel to use it as generator in other location or for electric green working machine. Depending on the surface of the plant can generate thousands of Kw and store thousands liters of water in fixed or mobile tank .
