

COWBOYCARE

COWBOYCARE

PROFESSIONAL HOOF GLUE

Professional glue for Cow Hoof treatment. 2 types of tip.
Dual component to be used with specific mixing tips .
Need manual gun to be extruded .

ALL SEASON TO SCREW (160+200.ml) or BAYONET (only 200.ml):

All Season Glue is the standard version usable in every season of the year. Easy to use can be used with wood or rubber block. Adhesion is durable and stable, no detach of the hoof block after weeks. This glue wet very well the surface of the feet and the block, let the block to be moved in first time for good positioning before full adhesion. To be used with heater in winter season.

FAST & TIXO (Winter) 200.ml TO SCREW or BAYONET:

This version is the last development in our glue range. Is a thixotropic glue (do not slow down when applied) very good to fulfill the space in irregular shape of hoof and very fast attachment. Within few seconds the block is fixed and after 30s-1min the feet can be released. In very hot season cartridge need to be stored in cool room (no more than 25°C).

EASY & COW (200.ml TO SCREW):

This glue is more easy to use and has the same adhesive properties.

THE 50 GLUE (50.ml): Four seasons use, perfect for few application very easy to use. Eco friendly, less plastic used.
