PROFESSIONAL HOOF TRIMMING

Hoof trimming disk is used in Cow Hoof treatment. Our disk are made with High Resistant Aluminum with hardened Carbide blade.

The blades are in two version 2 or 3mm thickness. Special treatment on the blades gives high resistance and long lasting property. The fixing screw are worked in Stainless Steel and the seat of the screw are rolled to increase the resistance and duration for several times. The angulation and position of the blade are designed for perfect balance to work without vibration on the hands.

EVO 6-2:

The EVO 6-2 is an open disk for standard trimmer more soft on the operation. 2mm blades have special treatment to long service life.

EVO 6-2C:

The EVO 6-2c has 6 closed slots for 6 blades of 2mm.

EVO 6-3:

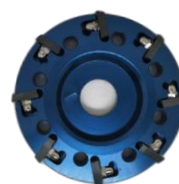

The EVO 6-3 is an open disk for professional.

The blade 3 mm are more aggressive optimized for fast work of professional hoof-trimmer. Hardened carbide assures long time of life of the blade.

Easy to change the blades have four cutting side.
