Read the following text carefully, then answer the questions below:

Science has always played an important part in our life. It has increased our knowledge about everything around us. There are new inventions that help us find out secrets we didn't use to know. These scientific inventions are about everything in our life. These inventions made our life more comfortable and easier. Everyday scientists surprise us with something new that can change our life to the best.

Science has given us information about the space around us and the moon. It became easy to know a lot of things about the moon. The moon is not a friendly place. As there is no air or water, there can be no life of any kind. For mile after mile there are many big mountains. The moon is also a very silent rock because sounds can only travel through air. The moon is not shiny, it shines because of the sun's light. From this distance, the moon shines more than the stars in the dark sky.
