# VILLAGE SIGN

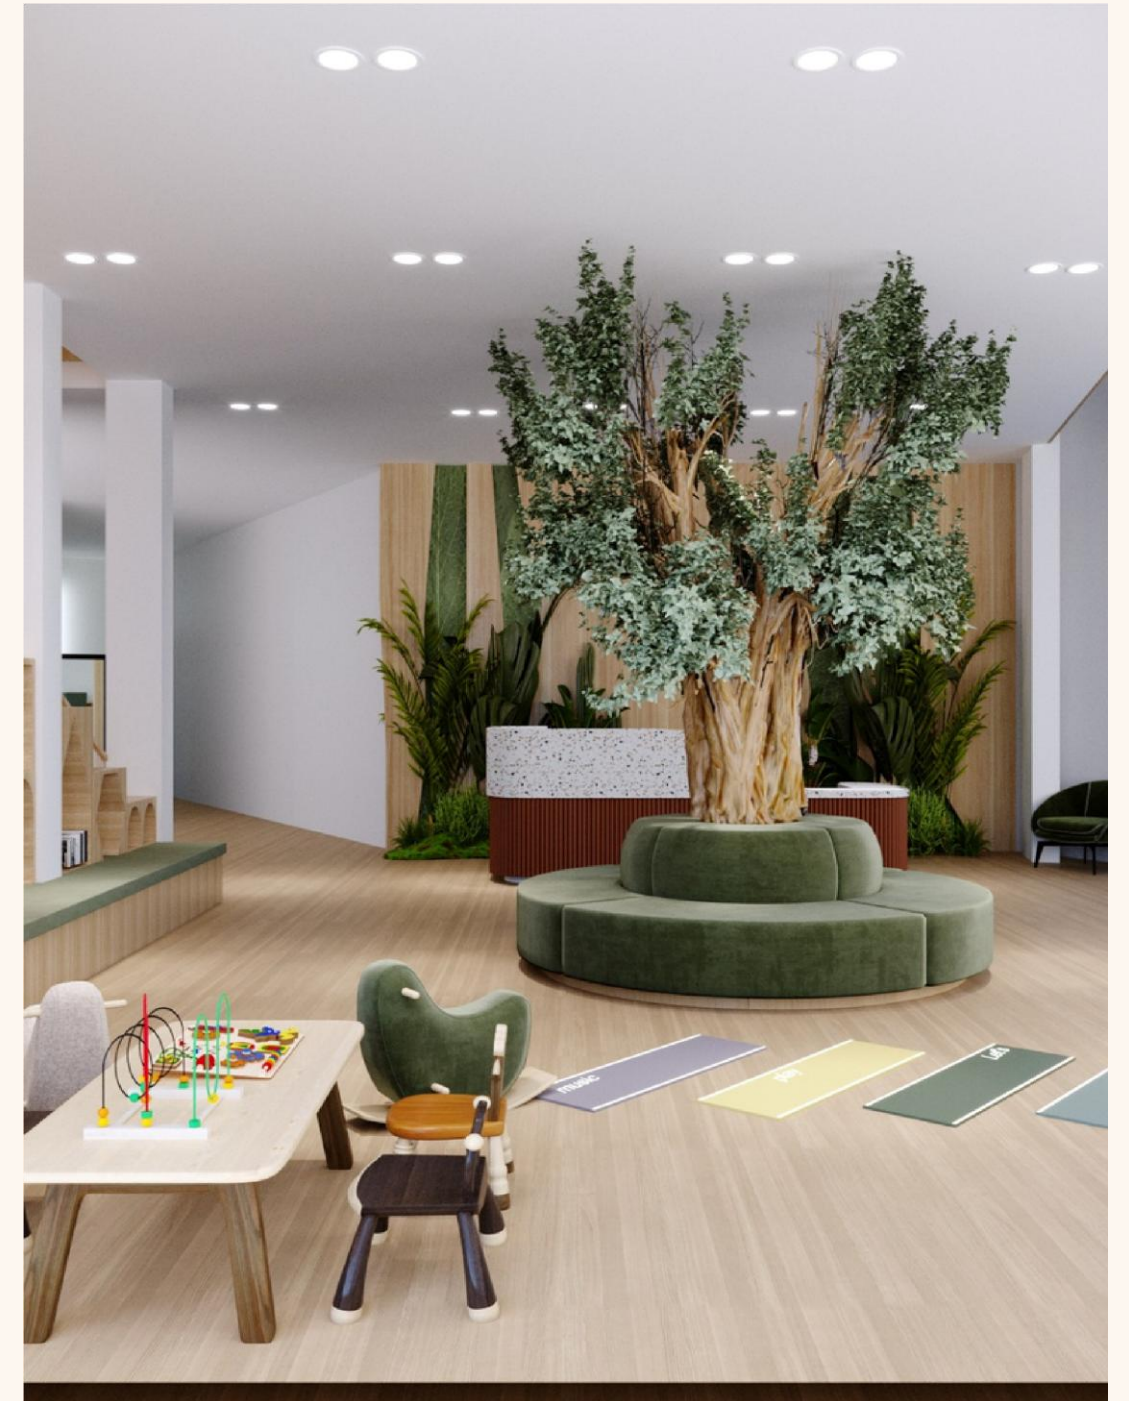

At Nadas Children's Village, everything begins with the idea of growing under the guidance of nature. Each time our children's small hands touch the soil, they take root like a seed; as they grow curious, they branch out, and as they discover, they reach toward the sky. At the Children's Village, we are here to ensure that children can learn freely, dream, and discover themselves.

This is more than just a school—it is a village; a journey of education that touches every child's heart and celebrates their individual differences.

# A CHILDHOOD DREAM

We believe that every child carries a unique rhythm into the world; some run to explore, while others pause to listen. Nadas Children's Village exists to capture this rhythm and create a world where every child can hear their own unique melody. Here, we see learning not merely as a goal, but as a natural rhythm of life—a journey where children discover themselves as they grow.

Imagine a stage in the embrace of nature, where flowers whisper silently and leaves dance. On this stage, our children are the leading actors. Every classroom is a garden, and every garden is a classroom.

“EYES GAZING UPWARD WITH CURIOSITY AMONG THE BRANCHES,  
DREAMS BUILT IN THE SHADE OF A TREE...  
HERE, LEARNING IS AN EXPERIENCE THAT GROWS BEYOND WALLS,  
FLOURISHING UNDER THE GUIDANCE OF NATURE.”

# THE PHILOSOPHY OF LEARNING

The greatest achievement of our children will be curiosity. Because curiosity is the spark of knowledge, the inspiration of art, the first step of dreams. From the process of learning to read and write, to mathematics, from science projects to English education—everything is designed to nurture this spark.

In our games, letters dance, numbers tell stories, and in our projects, ideas sprout. In our mathematics lessons, children encounter not just numbers, but life itself. With the small blocks they hold in their hands, they build bridges of imagination; they visualize mental processes and add creativity to their learning.

Our English lessons are more than just a class hour; they are like an ocean in which children naturally swim in another language. Words become songs, and sentences turn into play.

# OUR CAMPUS

## A CHILD'S IMAGINATION

At Nadas Children's Village, the campus is not just a building; it is a universe shaped by children's imagination.

Our workshops are meeting points of art, science, and nature. Children can paint the sky with brushes in their hands, or uncover the secrets of the stars in the laboratory. Every piece of furniture, every detail, is designed for their small hands and big dreams

Here, time is not measured by the ticking of a clock, but by the natural flow of activities. Mornings begin with sports for an energetic start to the day, followed by children chasing after the projects they dream of. The duration of lessons and activities bends to the needs of the children; nothing interrupts their creative flow.

# OUR FAMILIES, OUR SHARED JOURNEY

We see families not just as a part of the educational process, but as its very foundation.

Our family camps are designed to share with parents the experiences that our children live through. In these camps, families not only observe more closely the bond their children build with nature, but also have the opportunity to become a part of this journey themselves.

# CHILDREN WHO GROW WITH DREAMS

Here, we give our children the chance to grow freely; because we know that every child finds their own rhythm in nature. There is a community around them that supports them, and an environment where they can grow in safety. We believe that happy children will shape a happy world, and with every family that joins the Children's Village, we bring this dream a little closer to reality.

Come, be part of this journey woven with nature, where children write their own stories!

# THE BUILDING BLOCKS OF EDUCATION

**1**

**Personalized  
Education**

**2 Nature-Based  
Education**

**3 Experiential  
Education**

# CLASSROOMS

We believe in the principle that the entire campus is a classroom: Every classroom has its own garden; nature is an inseparable part of our classrooms.

Our campus features dedicated workshops for every field. Our spaces, specialized in areas such as art, science, nature, and music, allow children to engage in creative and discovery-focused activities.

# HERO BADGE

As our children explore their curiosity and talents, they embark on a special journey with our Hero Badge project, which supports them according to their individual characteristics. These badges show what they are good at, which areas they excel in, and which skills they can further develop. Education is shaped according to the individual needs of each child; because every child is unique.

# HERO BADGE

Every child reveals their strengths and potential. With this understanding, we developed the Hero Badge Project, which helps children recognize their individual traits and experience a personalized educational journey based on these traits. These badges serve as guides, each telling the story of the child.

# zİLSİZ OKUL

Our entire campus is designed from the perspective of children. Our furniture, workshops, and activity areas are arranged to engage their curious and active world. As a screen-free school, we ensure that children can fully focus on activities, and we turn recess into moments when they are truly free

.

# NADAS

Nadas Children's Village was founded with a vision of a world based on solidarity, respect, responsibility, and creativity. Our aim is to prepare children for life with an educational approach that places their happiness and curiosity at the center. Because we believe that a happy child is curious; a curious child learns; and a learning child shapes the future

# NADAS ÇOCUK KÖYÜ

The “nadas” in our name symbolizes renewal, rest, and growth. Just as land is left fallow to rejuvenate, we provide children the opportunity to discover their natural potential and take root in life. In this process, we are delighted to welcome curious minds among us.

ALL THE IMAGES ON EACH PAGE WERE CREATED BY CHILDREN AND TAKEN FROM THE ARTWORK PLACED IN THE FOUNDATION OF OUR SCHOOL BUILDING.

THANK YOU, CHILDREN!
