

# Professional career

Recognized for his expertise in production techniques for vegetable farming, both in the open field and under plastic shelters, Hassan El Attir has particularly distinguished himself in the conduct of localized irrigation and the analysis of fruit and vegetable value chains, and participatory training of small and medium-sized farmers. Its expertise has been requested by prestigious international organizations (FAO, World Bank, USAID, MCC, GIZ, and UNIDO), Moroccan national institutions (Ministry of Agriculture, Hassan II Institute, AMCI, OCP Foundation) and Moroccan consulting firms (NOVEC, TMIS-Conseil, ...) to contribute to various continuing education, research, and studies and development projects in its areas of expertise. His dual skills in technical expertise and group facilitation allow him to effectively support farmers and organizations in their agricultural development projects.
