

# PACTO

**Course:** 551 | Design Processes

**Designer:** Daniel Fernandez-Castro

**PACTO is a set of reusable and modular cutlery housed in a compact, rounded case.** It easily fits in your pocket, in your bag or you can hang it around your neck with the optional strap, and it includes **two chopsticks/straws with two add-ons**, that turn them into a spork and a knife.

Pop open the container on one side, take the chopsticks plus the spork add-on. Open the other side for the knife add-on if you need it. When you are done, just put everything back in its place - it will fit perfectly because of the built-in holes in the box. And do not worry, **PACTO is dishwasher-friendly.**

Based on testing, the newest version is **smaller** than the first one, making it easier to carry it around. And now it is **easier to access** your spork add-on and chopsticks, thanks to the diagonal cut-out in the case. Plus, the **chopsticks also work as straws** for your drinks. And there is an added **hanging strap** as well!
