

## Carbon Reduction Plan guidance

### Notes for completion

Where an in-scope organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required, as a condition of participation, to submit a CRP which details their organisational carbon footprint and confirms their commitment to achieving net zero by 2050.

CRPs are to be completed by the bidding supplier and must meet the reporting requirements set out in supporting guidance and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve net zero emissions by 2050.<sup>11</sup>

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a CRP covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard<sup>12</sup> and Guidance, and all of the following criteria are met:

- the bidding entity is wholly owned by the parent
- the commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity
- the environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract
- the CRP is published on the bidding entity's website

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's CRP may only be a temporary measure to satisfy this particular condition of participation.

The CRP should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the objectives of the CRP within their strategic plans.

A template for the CRP is set out below. Please complete and publish your CRP in accordance with the reporting standard published alongside this PPN.

:

<sup>11</sup> 'Bidding supplier' or 'bidding entity' means, for the purpose of this guidance, the organisation with whom the Contracting Authority will enter into a contract if it is successful.

Supplier name

Vinmore Ltd

Publication date

1<sup>st</sup> June 2026

## Commitment to achieving net zero

Vinmore Ltd is committed to achieving net zero emissions by 2035.

### Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

**Baseline year: FY2024/25 (1 April 2024 – 31 March 2025)**

#### Additional details relating to the baseline emissions calculations:

Vinmore Limited was incorporated in February 2024. FY2024/25 has therefore been adopted as both the baseline year and first reporting year.

#### Baseline year emissions:

Emissions	Total (tCO <sub>2</sub> e)
Scope 1	0
Scope 2	0
Scope 3 (included sources)	1.6
<b>Total emissions</b>	<b>1.6</b>

## Current emissions reporting

**Reporting year: FY2025/26 (1 April 2025 – 31 March 2026)**

Emissions	TOTAL (tCO <sub>2</sub> e)
Scope 1	0
Scope 2	0
Scope 3 (included sources)	0.28
<b>Total emissions</b>	

## **Emissions reduction targets**

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 0.2 tCO<sub>2</sub>e by 2027. This is a reduction of 30%.

## **Carbon reduction projects**

### **Completed carbon reduction initiatives**

The following environmental management measures and projects have been completed or implemented since the 2024 baseline. The carbon emission reduction achieved by these schemes equate to 1.02 tCO<sub>2</sub>e, a 79% reduction against the 2024 baseline and the measures will be in effect when performing the contract.

- Permanent home-based working model.
- No dedicated office premises.
- Virtual meetings and collaboration tools used wherever possible.
- Public transport preferred for all business travel.
- Annual monitoring and reporting of greenhouse gas emissions.

### **Future carbon reduction initiatives**

In the future we hope to implement further measures such as:

- Continue remote-first operations.
- Minimise travel through digital collaboration.
- Review supplier sustainability credentials where appropriate.
- Monitor emissions annually and update the Carbon Reduction Plan

## **Declaration and sign off**

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>13</sup> and uses the appropriate government emission conversion factors for greenhouse gas company reporting.<sup>14</sup>

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.<sup>15</sup>

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

## **Signed on behalf of the supplier:**

**REDACTED**
