Altitude	1514 - 1950 masl	
Température	14°C - 26°C	
Latitude	-1.915914800	
Longitude	28.962224300	

SOPADE is a cooperative society created in 2017 by a group of smallholder coffee farmers who were frustrated by the marginalization they experienced in larger cooperatives and wanted to create a model for future cooperatives to follow. From 2017 to 2020, it operated as a non-profit association, but with evolving circumstances, it is now officially recognized as a company.

The **SOPADE Coffee Agricultural Cooperative** has **818 members**, including **207 women**, who

collectively manage **242 hectares of land** with **610,071 coffee trees**.

SOPADE produces **high-quality specialty K3 Arabica coffee**, certified **organic**, reflecting its adherence to sustainability standards. The cooperative has a **washing station**, a **warehouse built with durable materials**, and **two motorized canoes** for transporting coffee cherries. It also has a **vehicle for staff transportation** and supports members through **village savings and credit associations** to help ensure their financial autonomy.

SOPADE is a full member of the **Network of Coffee and Cocoa Producing Cooperatives (RCPCA)** headquartered in Goma, DRC.

SOPADE participated in **Best of Congo Cooperatives 2024**, selling **1,500 kg** to **Pact Coffee**.
