

The Visionary Movement

A Political Manifesto for Planet & People

A photograph of a steep, green mountain slope. A narrow, winding path leads up the hillside. In the foreground, the path is covered with green grass and small yellow and white flowers. In the distance, a person is visible walking on the path. The background is filled with thick white mist or clouds, partially obscuring the mountain's peak. The sky is bright and overcast.

The needs of society and
the needs of the individual
should be considered
one and the same.

Image by Felix Mittermeier

About The Visionary Movement

We are a post-capitalist, pro-humanist, new-world centrist movement, made up entirely of independent Members of Parliament (MPs), volunteers, activists, campaigners, and unelected members of the public.

We are closed to members of outdated, defunct, corrupt, or criminal political entities such as UKIP, the Conservative Party (Tories), Labour, and the Liberal Democrats.

Our core belief is in economic and social equality for all. We advocate for the nationalisation and not-for-profit operation of key British infrastructure, comprehensive reforms in healthcare and education, the abolition of the Bank of England, and the introduction of a new, state-backed currency free from interest.

To achieve these goals, we aim to establish innovative, forward-thinking, and inclusive alternatives to the outdated social, legal, educational, healthcare, commercial, and economic systems that, for centuries, have eroded freedoms and threatened the wellbeing of both the people of Great Britain and the wider world.

Finally, after more than 700 years, there is a UK political force worthy of your support.

A NEW KIND OF LEADERSHIP

Unleashing Our Potential: Creating A Just, Sustainable, And Healthy World.

Together, we can break free from the chains of a flawed system, embrace a compassionate ethos, and forge a path to a just, sustainable, and healthy world for generations to come.

Breaking Free From The Shackles

It's time to question what or who is hindering our progress. We must confront the intentional barriers that hold us back from achieving social and economic justice, averting environmental catastrophe, and ensuring good health for all.

Embracing A New Ethos

Centuries of systemic flaws have bred a mindset that profits from misery and misfortune. We can no longer tolerate a society driven solely by financial gain, where passion is lost and logic fades. We must reject the idea of intentionally engineered problems for personal gain.

Paving The Way To A Better Future

Let us remove leaders who prioritise power and profit over our planet and people. It's time for a transformative shift, where a new brand of leadership emerges. We will harness our resources, time, knowledge, and skills towards preventing problems rather than selling solutions.

The policies outlined in this manifesto offer fair, efficient, and effective solutions that resonate with every individual, uniting us in the pursuit of a better world.

ARE YOU A VISIONARY?

Unleashing The Power of Change

Together, We Can Mend This Broken World

The relentless pursuit of profit has contributed to the problems we face today. We must acknowledge that every problem has become an opportunity for commercial gain, perpetuating a cycle of malice, greed, and cruelty.

We no longer want a society that thrives on accidents and pollution, profits from conflict, or deliberately causes illness to sell remedies.

“Greenhalgh's Law”

"Greenhalgh's Law" will ban the exploitation of crises and misfortune for personal gain. It prohibits the manufacturing, trading, promotion, or provision of any product or service that profits from human or animal suffering, or the destruction of our environment and natural resources.

To turn this vision into reality, we will dismantle outdated institutions and establish inclusive, innovative alternatives to social, legal, educational, health, commercial, and financial systems.

Read more on **Greenhalgh's Law** **Page 100**.

OUT WITH THE OLD. IN WITH THE **NEW**.

A New Era of Politics

Breaking Free From The Past

Ever since the Parliament of Great Britain was formed in 1707 following the ratification of the Treaty of Union by Acts of Union passed by the Parliament of England (established 1215) and the Parliament of Scotland, we are still choosing between the Red hat or the Blue. But times are changing.

Shattering The Illusion Of Choice

Regardless of whether you vote for the left or the right, society's problems not only persist—they worsen. This is no accident. Governments perpetuate the illusion of choice, offering the public a revolving door of leaders who serve the same entrenched interests. Policies may appear different on the surface, but beneath the rhetoric, the core agenda remains unchanged: maintaining control, preserving power, and ensuring that true systemic change never occurs.

Elections are framed as a battle of ideologies, yet the outcomes rarely challenge the status quo. Promises of reform are diluted, opposition is manufactured, and public frustration is carefully redirected to avoid real accountability. The system is designed not to serve the people but to keep them pacified—offering just enough hope to prevent rebellion while ensuring that those in power remain untouched.

True choice does not come from picking between two sides of the same coin. It comes from dismantling the systems of deception, rejecting the preordained options, and forging a new path untainted by the corrupt institutions that have long sought to control us.

Reimagining The Future

People don't want the same stale promises. We want people who can re-imagine the way the world should be. People who can affect positive changes beneficial to the planet and all of its inhabitants. People who aren't afraid to break a few eggs or try new things. People who know that only by forging new paths can we learn and grow, and become something better than we are right now.

Accepting The Difficult Truth

Despite what we're told, none of life's essentials are scarce. The planet provides enough for everyone, and in the UK, we have the skills and resources to be self-sufficient and in abundance.

“All eight billion of the world's inhabitants could live on the South American continent, where there would be approximately one acre for every six people.”

Of course, we're not suggesting such a thing, but this fact serves to illustrate that the planet is vast and its resources are bountiful. But scarcity drives up prices and, as long as we are motivated by panic and profit, we will always make questionable decisions and avoidable mistakes.

Bringing An End To Monopolies

Food, water, air, and energy should never be controlled, monopolised, or sold for profit by private interests. We must no longer allow those who contribute to climate change, global poverty, economic inequality, and ecological destruction to hold dominion over our essential resources in their relentless pursuit of power and profit.

Whether We Succeed Or Fail Is A Choice

Although we were appointed keepers and guardians of this planet, the Human race has done the very opposite. We have abused, pilfered and polluted the very thing that gives us all life *and* sustains it.

THE REAL ENEMY.

Capitalism: The Enemy Of Humanity And The Planet

Systemic Change, Not Consumer Guilt

Capitalism - in its current form - is incompatible with a clean and healthy planet. We have to address this problem directly rather than placing the responsibility at the feet of consumers. The responsibility rests squarely with the manufacturing industries and the supply chains that encourage and underpin mass-consumerism.

Committed to making the UK a prime example of how Earth's protectors should live, we aim to redirect all funding away from any initiative harmful to the planet, and into producing clean, sustainable, and pragmatic alternatives.

Crafting A Sustainable Future: Quality Over Quantity

We are committed to dismantling the exploitative economy of scale and returning to an era where products are reliable, high-quality, and built to last. By implementing our manifesto pledges, including providing free, clean energy and establishing an interest-free currency, we eliminate the economic incentives for producing cheap, disposable goods. This holistic approach ensures that manufacturing prioritises durability and sustainability, reducing waste and fostering a culture that values long-lasting quality over short-term convenience.

WE PROMISE TO **LIBERATE** AND **PROTECT.**

DID YOU KNOW?

The word *government* is derived from the Latin *gubernare*, meaning to *govern, steer or control*, and *mentis*, meaning *mind*. It quite literally means, to “*control the mind*” or “*mind-control*”.

WHAT IS A **VICONTENATE?**

Noun: The term *Vicontenate* (Vy-Con-Ta-Nat) is derived from the Latin *vindicator* (meaning *avenger or liberator*), *contego* (meaning *to protect or defend*), and *nati* (meaning *the people or the born*).

It translates to “**liberator and protector of the people.**”

*“Power corrupts,
and absolute power
corrupts absolutely.”*

Liberator And Protector: **The Role Of Your Vicontenate**

Restoring Power To The People

The leaders of this country have forgotten their place. They believe they have the right to dictate, when in reality, they should be subservient to the people. Their duty is to protect our rights and freedoms, to enhance our quality of life and personal wellbeing, and to ensure that the country operates efficiently—delivering growth and opportunity for everyone, at every stage of their lives. Above all, they must guarantee peace and unity with every other nation, fostering global harmony and mutual respect.

Empowering The Vicontenate:

A Vision For A Just And Prosperous Society

We believe 'leadership' should be replaced with 'stewardship,' where those elected to office do not take charge but instead care for those in their charge.

The role of your Vicontenate is to shape a world founded on fair and just laws, to build a robust, future-proof national infrastructure, to eliminate poverty, to make healthcare and education free and accessible to all, and to ensure that ideas and creativity—the backbone of every advanced civilisation—can thrive and flourish.

ANTI-CORRUPTION

The Visionary Movement pledges to keep politics free from financial coercion or influence.

Transparency, Efficiency, And Public Deterrence

Corruption and coercion have no place in our political or justice systems. Just as businesses proactively safeguard their operations, we must rebuild the integrity of our nation.

We will embrace full transparency by making everything public, creating a powerful deterrent against any form of state crime, repression, or authoritarian practices. Together, we can build an all-new political establishment that operates efficiently, eliminates wastefulness, and restores trust.

Ensuring Accountability

We are dedicated to conducting our affairs with honesty and integrity, adopting a zero-tolerance stance against bribery and corruption. By upholding these values, we will empower every citizen's voice and establish a system that genuinely represents the interests of all. We will create a new political framework where integrity, transparency, and economic prosperity are interconnected, fostering a society where ethical businesses flourish and public confidence is restored.

“Corporate finance and lobbying should play no part in the decisions we make or the actions we take.”

Ending Crony Capitalism:

Restoring Fairness And Integrity

Changing or introducing laws that protect the financial interests of the wealthy at the expense of all others will no longer be considered.

No business should gain advantages through close relationships with government officials. This often leads to policies that favour specific companies or industries over others. Such practices result in unfair market conditions, stifling competition and innovation, and compromising the integrity of elected officials and public trust.

In the UK, instances of crony capitalism have been observed, where private companies have leveraged political connections to secure favourable outcomes. For example, the collapse of the case against Eurasian Natural Resources Corporation (ENRC) by the UK's Serious Fraud Office (SFO) highlighted the influence of wealthy oligarchs and their ability to wield legal and financial power to stymie justice.

Addressing crony capitalism requires implementing robust regulations that promote transparency, accountability, and fair competition, ensuring that business practices serve the public interest rather than private gains.

Tackling Corruption:

Reclaiming Power For The People

Money should never dictate our destiny. For too long, it has driven individuals to deceive, exploit, harm, and manipulate for personal gain. We must confront this issue head-on. Those who seek power and control through ill-gotten wealth, or who use their wealth to deprive and oppress, deny us our birthright—equal access to resources, a future brimming with opportunity, and the swift, painless evolution of our species. It's time to reclaim our power, hold the corrupt accountable, and build a future where justice and fairness prevail.

Rebuilding Trust:

Transparency, Participation, And Inclusive Policies

When corruption cripples banks and governments, it's the innocent public who pay the price with tax hikes and austerity measures, while the guilty escape unscathed, their stolen trillions hidden away.

To restore trust in politics, we must prioritise absolute transparency. If politicians act with integrity, they should have nothing to hide. Elected officials should never hide behind "national security" to keep important information from the public. Laws and policies must be crafted in open consultations, giving every citizen a voice. Under a new **Vicontenate**, we will embrace online and real-world public forums for policy-making. Voting will be made convenient through secure and accessible technologies. We believe in inclusive policies shaped through proactive, mass public debate and full accountability of those you elect to office.

A New Era Is Born

In the new era of the **Vicontenate**, policy-making will be inclusive and transparent. Online and real-world public consultations will be the norm, ensuring every citizen has a say, regardless of the topic. We will introduce convenient voting systems through online, telephone, text, and mobile apps, harnessing secure and emerging technologies to prevent voter-fraud. Laws and policies will only be introduced with public adoption and support. Through proactive, mass public debate, we will only consider all-inclusive and non-discriminatory policies. Your voice matters, and together, we will shape a future that represents the will and needs of the people.

Your Voice, Your Laws:

Full Inclusion In Decision-Making

Laws should protect and empower, not control or deprive. That's why we believe in full inclusion, ensuring everyone has an equal say in governing our country. Our policies will be inclusive, sensible, practical, and humane, applicable to all. To achieve this, every policy, law, and legislation will be presented to the public through the newly created General Public Committee. Registering with the committee will allow every citizen to cast their vote conveniently during local, regional, and national elections.

Read more on **Law Reform Policy Page 95**.

SYNAPTOCRACY

We will establish Synaptocracy: a governance model that replaces traditional democracy, fostering interconnectedness, adaptability, and collective wisdom to ensure a harmonious and responsive society.

Envisioning a novel governance model requires innovative thinking that transcends traditional frameworks.

One such concept is the "Synaptocracy", derived from "synapse" (the junction between two nerve cells) and "kratos" (Greek for power or rule). This model emphasises interconnectedness, rapid information exchange, and collective decision-making, akin to the neural networks in the human brain.

“A democracy is nothing more than mob rule, where fifty-one percent of the people may take away the rights of the other forty-nine.”

Thomas Jefferson

Synaptocracy:

Key Features

1. Decentralised Decision-Making

Power is distributed across various communities or sectors, ensuring that decisions are made closer to the affected populace, promoting responsiveness and accountability.

2. Dynamic Representation

Representatives are selected based on expertise and subject to periodic evaluations, ensuring that stewardship remains highly competent and adaptable to changing circumstances.

3. Enhanced Civic Engagement

Citizens participate directly in policy discussions through digital platforms, fostering a culture of continuous engagement and collective problem-solving.

4. Transparent Information Flow

Open data systems ensure that information is accessible to all, reducing misinformation, eliminating the need for the Freedom of Information Act, and enabling informed decision-making.

5. Adaptive Governance

Policies are regularly reviewed and adjusted based on feedback and changing conditions, ensuring that the system remains resilient and forward-looking.

By embracing the principles of Synaptocracy, we can, as a society, aspire to create a system that is more responsive, inclusive, and attuned to the complexities of the modern world.

Building upon the concept of Synaptocracy, we can explore additional elements to enhance this model.

1. Dynamic Citizen Assemblies

Incorporating randomly selected citizen assemblies to deliberate on specific policy issues. This approach ensures diverse perspectives are considered, fostering inclusivity and reducing the influence of entrenched interests. Such assemblies have been effective in various contexts, providing thoughtful recommendations on complex matters.

2. Modular Governance Structures

Developing a modular approach to governance, allowing communities to adopt and adapt policies that best suit their unique needs. This flexibility encourages innovation and responsiveness, enabling governance structures to evolve organically.

3. Emphasis On Deliberative Processes

Where decision-making is based on thorough discussion and consensus-building among citizens. This method seeks to overcome polarisation and create policies that reflect collective reasoning.

By integrating these elements, Synaptocracy evolves into a more comprehensive governance model that emphasises interconnectedness, adaptability, and collective wisdom. This system aspires to create a society where governance is a dynamic, inclusive, and responsive process, aligning with the aspirations of those seeking transformative change.

“An individual has not started living until he can rise above the narrow confines of his individualistic concerns to the broader concerns of all humanity.”

Martin Luther King Jr.

Case Study:

National Identity Cards

In a scenario where a national vote on implementing ID cards resulted in a narrow margin—51% in favour and 49% against—our solution would respect both perspectives while upholding the integrity of the system. In a Synaptocracy, striking this balance fairly would be achieved by implementing an opt-in/opt-out ID card system.

Opt-In ID Card System

- **Voluntary Participation:** Citizens would be free to choose whether to obtain an ID card, ensuring that those who support the initiative can participate, while those who oppose it are not compelled to comply.
- **Incentives For Adoption:** To encourage participation without mandating it, the **Vicontenate** will highlight the inherent benefits to ID card holders, such as convenience, streamlined access to public services, expedited processing in administrative tasks, and personal peace of mind.
- **Public Awareness Campaigns:** We will educate citizens on the advantages of possessing an ID card, allowing individuals to make informed decisions based on their personal preferences and needs.

Opt-Out ID Card System

- **Unrestricted Opt-Out:** Individuals can opt out of the system at any time, without penalty or conditions, if they felt their privacy was compromised.
- **Enhanced Privacy Protections:** The system will incorporate robust data protection measures, including encryption and strict access controls, to safeguard personal information.
- **Independent Oversight:** An independent body will oversee the implementation and operation of the ID system, ensuring compliance with privacy standards and addressing any grievances.

This system respects individual choices, offering options without imposing requirements, thereby accommodating diverse perspectives and upholding personal freedoms.

THE ECONOMY

We will redefine financial ethics, declaring all forms of interest immoral and illegal. A new Golden Age of financial freedom and security is upon us.

In 2020, as 11.7 million people sunk below the poverty line, the UK paid over £109 billion in interest payments to private banking cartels.

We consider this a crime against the state. We should never tolerate such economic injustice. We will bring those responsible to account and the people of this country will be fully reimbursed for all historical interest payments made since the first Bank of England loan in 1694. Our estimates put this at £5 trillion.

Reimbursing The British People:

Holding The Bank Of England To Account

Since 1694, approximately 990 million citizens have lived and died in the UK.

All 68.35 million registered citizens living in the UK will receive a one-off payment of £5,050 - injecting more than £345 billion into the UK economy.

Payments owed to the 921.65 million deceased will fund a newly established public pensions and palliative care account. This total would be approximately £4.2 trillion.

Taxing Based On Responsibility And Negligence

Our tax system will target destructive and negative outcomes, such as those perpetuating the economy of scale. The highest taxes, up to 90%, will be applied to companies and individuals that profit from misery or disaster, or manufacture, distribute, or sell products or services that destroy or pollute the environment.

We will abolish Inheritance Tax, tiered Income Tax, National Insurance, and Capital Gains Tax. Instead, a single 5% Citizen's Contribution will be introduced.

A flat rate of 15% Corporation Tax will be applied to every company. No business will be exempt. Every business wishing to trade in the UK will be required to register and bank with Companies House. All payment systems will be operated by Companies House, replacing all existing systems. Revenue will be held in escrow for 30 days, and Corporation Tax will be taken at source on a monthly basis.

Tax Reductions And Tax Exemptions

Tax contributions will be reduced for individuals who participate in a voluntary capacity for any of a number of national infrastructure initiatives and help alleviate the financial burdens taken on by the state.

Tax reductions will apply only to "planet-positive" organisations whose operations directly enhance quality of life and/or repair environmental damage.

A Thriving Economy That Invests In Your Health And Well-Being

Research confirms the alarming correlation between economic struggles, poor health, and rising suicide rates. It's time for change. Instead of wasteful spending, we will prioritise allocating funds to support those in need.

The economy directly affects the well-being of our nation, transcending demographic boundaries. We will build an economy that prioritises the health and happiness of every individual. We pledge to invest in mental health resources, not only by providing comprehensive care but by tackling the root causes of distress.

By nurturing a thriving economy that uplifts all, we can foster a society where physical and mental well-being flourish, and passion will replace rapaciousness.

No More Interest. No More Inflation.

In our new economy, charging or paying interest on monetary loans becomes unlawful. It's time to recognise the impossibility of repaying debts with the limited money in circulation, and the criminal nature of the fractional banking system.

We will establish, strengthen and encourage world trade agreements with other Riba nations.

These nations presently include:

- Bahrain
- Bangladesh
- Egypt
- Indonesia
- Iran
- Jordan
- Kuwait
- Malaysia
- Pakistan
- Qatar
- Saudi Arabia
- Sudan
- Turkey
- United Arab Emirates

Image by Ann H

*“An interest-free, state-run currency
reduces national debt, stabilises the economy,
and benefits all citizens.”*

Embracing The State-Issued Currency Solution

Tired of rate rigging, bailouts, corruption, and the burden of tax hikes and austerity? There is a better way. The solution lies in a state-issued currency, empowering the people.

Nationalised Banking

Imagine a Bank of Great Britain that serves the nation's interests, not private cartels. We will take back control of our currency and economic destiny.

Interest-Free Currency

Say goodbye to burdensome interest. Our state-issued currency will promote economic growth without indebting the people.

Stable Inflation Control

We will control inflation, shielding our economy from volatile swings and ensuring stability for businesses and households.

A Robust Economy, Resilient Against Recession

Our state-issued currency will fortify us against recessions, providing a safety net for our citizens in challenging times.

Debt Elimination

We will tackle the burden of debt head-on, offering relief to individuals and families, unleashing their potential.

Security And Stability

By reducing the risk of defaults and repossessions, we will create a society where every person has the chance to thrive.

Introducing “Eco-Economics”

Transforming Capitalism For A Greener Future

We believe in people's right to prosper and pursue careers. However, let's acknowledge the flaws in the current system. Capitalism bears the burden of 100% of the world's ecological and economical problems. This is one key area where Artificial Intelligence can truly help us change things for the better.

A Sustainable Economy For All

We can create a thriving economy without depleting resources. Let's empower entrepreneurs while minimising waste and overproduction. We envision an economic model centered on constructive, creative, and sustainable products and services. Say goodbye to profiting from misery and disaster. We will explore and exploit the possibilities of 'eco-Nomics' and embrace a greener future.

Greening Every Step

Even seemingly eco-friendly products have hidden costs. From mining to manufacturing, transportation, and marketing. We must address every aspect of the supply chain, and develop new strategies that eliminate the need for harmful materials and chemicals.

Image by Cup of Couple

In 2024 the government spent a total of £1,276.2 billion. This is where some of it went:

£71 bn	Defence (war)
£109 bn	Interest payments to private banking cartels
£53 bn	"Other" with no explanation of what this included

And because the government has created so much false fear around terrorism, they felt justified in spending a staggering £371bn on so-called 'Social Protection'.

Now compare the £604bn spent on debt and destruction, to:

£49 bn	Industry, agriculture, employment
£40 bn	Housing and the environment
£131 bn	Education

Meanwhile, the U.N. Food Program estimates we need only \$40 billion (£33.3 billion) to end world hunger.

It's glaringly obvious that every government for centuries has been guilty of misappropriating public funds in favour of expanding its industrial military complex and police state, or lining the pockets of their wealthy corporate friends and lobbyists.

We would ensure the largest portion of public spending goes to maintaining infrastructure, supporting industry, and improving the quality of life for UK citizens. All UK debt would be expunged and we would no longer charge or pay interest on loans, thanks to our new, interest-free, state-run currency.

Read our **Draft Budget Page 130**.

*“£34 billion a year to end world hunger?
Consider it done.”*

Case Study:

Iceland

The Peaceful Revolution Never Reported

Following the recession of 2009/10 the people of Iceland made the government resign, they nationalised the primary banks, and it was decided not to repay the debt the banks created with Great Britain and Holland due to their bad financial politics. Instead, a public assembly was created to rewrite the constitution.

An entire revolution against the powers that created the crisis was achieved peacefully, which is why there has been no publicity. If the world knew that this could be done and other countries followed this Shining example, the fractional banking system would collapse overnight.

Arrests And Exile

The government initiated an investigation to bring to justice those responsible for the crisis, and many high level executives and bankers were arrested.

Interpol also dictated an order that forced all of the implicated parties to leave the country.

A New Constitution:

By The People, For The People

An assembly was then elected to rewrite a new Constitution. It includes the lessons learned and substitutes the now defunct Danish Constitution. Out of 522 candidates, 25 citizens with no political affiliation were chosen to form a new Constitutional Assembly. Candidates were required to be aged 18+ with at least 30 supporters.

The Constitutional Assembly began in February 2011 to present a new 'carta magna', formed from the recommendations given by the various assemblies that occurred across the country. It was then approved by Parliament and by the one constituted through the next legislative elections.

Not Revolution, But Evolution

We would repeat this proven strategy. But what would a peaceful revolution in Britain really mean?

Five Steps To Social Order In Five Weeks

1. Dissolve the current government.
2. The abolition of all private banking organisations.
3. Nationalisation of the Bank of England.
4. A new state-issued, interest-free currency.
5. A new British Constitution written by the people, for the people.

UNIVERSAL INCOME

Reducing The Necessity For Universal Income

By establishing the policies outlined in this manifesto, the need for universal income in the UK will be greatly reduced. However, we must help everyone and so it will remain relevant for a small minority who—despite all of our best efforts—will come to rely on financial support from the state. However, it is worth noting that Switzerland attempted to introduce a Universal Income in 2016. Despite the innovative nature of the proposal, it was decisively rejected, with 76.9% of voters opposing it.

Read **Case Study: Switzerland** **Page 30**.

Supporting Everyone's Journey

Not all of us start life from the same privileged position. Whether it's our parents' support or by our own means, some are fortunate, while others struggle.

Our commitment is to ensure that, regardless of their circumstances, every individual has access to the financial assistance they need to thrive and build a brighter future for themselves and their families.

A New, Single Assessment And Allowance

Fairness and equality can only be achieved when we are all measured and supported fairly and equally. The most effective solution may be to simplify the current benefits system and offer a single monthly payment to every adult and child to ensure a dignified standard of living for all residents.

By unifying and coordinating identical departments across the country, we can eliminate duplication of effort, enhance communication, and provide faster, higher-quality services. This approach will reduce human error, identify issues earlier, optimise resource allocation, and ensure transparent and accountable practices.

We believe a fairer, more effective benefits system will maximise taxpayer funds, eliminate waste, and safeguard against fraud and corruption.

- **Streamlined And Efficient Support:** The system ensures a seamless and consistent approach to delivering benefits across the country, reducing duplication of effort and improving service quality.
- **Enhanced Communication:** Improved coordination and communication between departments lead to better information sharing, faster response times, and a more responsive benefits system.
- **Reduced Errors:** By centralising processes and implementing standardised procedures, the system minimises the risk of human error, ensuring accurate and timely benefit allocations.
- **Early Issue Identification:** The integrated approach enables early detection and resolution of issues, preventing delays and ensuring individuals receive the support they need in a timely manner.
- **Optimal Resource Allocation:** By eliminating wasteful practices and unnecessary duplication, resources can be allocated more effectively, maximising the impact of taxpayer funds.
- **Transparency And Accountability:** A unified system promotes transparency, making it easier to monitor and track benefits, reducing corruption and fraud.
- **Fairer Distribution:** The streamlined system ensures that benefits are distributed in a fair and equitable manner, providing equal opportunities for success and well-being for all individuals.
- **Cost Savings:** The elimination of inefficiencies and improved resource management result in cost savings for the government, enabling funds to be redirected to other critical areas of need.

“A universal basic income would be the best way to give everyone the opportunity to do more unpaid but incredibly important work, such as caring for children and the elderly.”

Rutger Bregman

Case Study:

Switzerland

In June 2016, Switzerland held a landmark referendum on implementing an unconditional basic income (UBI), becoming the first country to conduct a nationwide vote on this concept. The proposal suggested providing a monthly income of 2,500 Swiss francs to every adult and 625 francs per child, aiming to ensure a dignified standard of living for all residents. Despite the innovative nature of the proposal, it was decisively rejected, with 76.9% of voters opposing it. Several factors contributed to this outcome:

Source [swissinfo.ch](https://www.swissinfo.ch)

1. **Economic Concerns:** Critics argued that funding the UBI would be prohibitively expensive, potentially costing over 200 billion Swiss francs annually. This raised fears of significant tax increases and potential cuts to public services.
2. **Work Ethic And Social Values:** Opponents contended that providing income without requiring work could undermine the intrinsic value of employment, possibly leading to decreased motivation and a decline in workforce participation.
3. **Immigration Concerns:** There was apprehension that a guaranteed income might attract individuals from other countries seeking financial benefits, potentially straining Switzerland's resources.
4. **Skepticism Of Feasibility:** Many viewed the UBI as a utopian idea lacking practical implementation strategies, leading to doubts about its viability within Switzerland's socio-economic framework.

While the proposal was not adopted, the referendum succeeded in sparking a nationwide discussion on social welfare and economic security. Notably, a significant portion of the younger population viewed the vote as the beginning of an essential national conversation, recognising the need to address future challenges such as job automation and economic inequality.

However, there have been localised efforts to explore UBI within Switzerland. In November 2024, the city of Bern's council approved a pilot project to provide a basic income to 300 residents, marking a first for the country. The project, with an estimated cost of 9 million Swiss francs, aims to assess the feasibility and impact of UBI at the municipal level.

Source basicincometoday.com

While comprehensive results from Bern's initiative are not yet available, this pilot reflects a growing interest in evaluating UBI's potential benefits and challenges within specific communities.

As of February 2025, Switzerland has not implemented a nationwide Universal Basic Income (UBI) program.

In summary, the Swiss electorate's rejection of the UBI initiative was influenced by economic concerns, cultural values emphasising work, fears of increased immigration, and skepticism about the proposal's practicality. Nevertheless, the referendum played a crucial role in initiating ongoing debates about the future of social welfare in Switzerland.

Image by Joel & Jasmin Førestbird

INFRASTRUCTURE & NATIONALISATION

By prioritising public welfare over privatisation and shareholder satisfaction, nationalising UK infrastructure will address regional disparities, ensuring equitable access to high-quality services across the nation.

The Case for Nationalisation: Redirecting Profits for Public Benefit

Transforming The UK:

Taking Back Control Of Critical Infrastructure

Nationalising the UK's railways, utilities, communications, and other essential services offers a transformative approach to enhancing the nation's economic stability, environmental sustainability, and quality of life. By shifting control from private entities to public ownership, we can achieve significant reductions in living costs, lower carbon emissions, and reinvest in critical infrastructure.

Nationalising the UK's critical infrastructure presents a compelling opportunity to reduce costs, lower carbon emissions, and enhance the quality of life for all citizens. By embracing public ownership, we can build a more sustainable, equitable, and prosperous future for the nation.

Improving Quality Of Life In The UK

The National Infrastructure Commission defines quality of life as an objective and subjective assessment of an individual's overall well-being, influenced by factors such as access to essential services and infrastructure.

Source [nic.org.uk](https://www.nic.org.uk)

Public ownership allows for long-term planning and investment in infrastructure, leading to improved service quality and reliability.

Economic Benefits:

Lower Costs

Without exception, privatisation has led to higher consumer prices and profit-driven service models. Nationalisation will reverse this rapacious trend by eliminating the profit motive, resulting in lower costs not only for consumers and the public sector, but for the private sector as well.

Increased Disposable Income

By redirecting profits back into public coffers, we can reduce the tax burden on citizens and businesses, thereby increasing disposable income, stimulating consumer spending, and further boosting the economy by more than £50 billion.

Source [Reuters.com](https://www.reuters.com)

Environmental Impact:

Accelerating Decarbonisation

Public ownership facilitates coordinated efforts to implement green technologies and sustainable practices across sectors. The House of Lords Library notes that adopting comprehensive climate policies could lead to a 2% increase in GDP, driven by new jobs, economic activity, and reduced fossil fuel imports.

Source lordslibrary.parliament.uk

Nationalised utilities can invest in renewable energy infrastructure without the pressure of immediate profit returns, accelerating the transition to a low-carbon economy. This will not only reduce carbon emissions but also positions the UK as a leader in global environmental stewardship.

What Will We Nationalise?

Nationalised Infrastructure Candidates

1. **Railways:** Public ownership will lead to improved service reliability and affordability. A YouGov survey conducted in June 2024 revealed that 76% of Britons support bringing railway companies into the public sector, highlighting a strong public desire for affordable and efficient services.

Source yougov.co.uk

2. **Utilities:**
 - **Water:** Nationalisation can ensure equitable access and address environmental concerns. Recent discussions have highlighted the potential benefits of returning water services to public control.
 - **Energy:** Public ownership can facilitate investment in renewable energy and reduce consumer costs. The establishment of state-owned entities like Great British Energy reflects this approach.
3. **Postal Services:** Nationalisation can maintain universal service obligations and ensure consistent delivery standards.
4. **Public Transport:** Beyond railways, services such as buses can benefit from public ownership, leading to integrated networks and reduced fares. Labour's 2024 strategy includes enhancing public transport services to decarbonise UK transport.
5. **Healthcare:** While the NHS is publicly funded, further nationalisation of ancillary services can improve efficiency and patient care.
6. **Education:** Public ownership of educational institutions ensures equal access and standardised quality across regions.
7. **Banking:** A state-owned bank can provide financial stability, support economic development, and offer affordable services to citizens.
8. **Telecommunications:** Nationalising broadband infrastructure can lead to wider access and bridge the digital divide.
9. **Roads And Highways:** Public ownership ensures maintenance and development align with public interest and safety standards.
10. **Airports And Ports:** National control can enhance security, efficiency, and strategic economic interests.

Case Study:

Nationalising Energy

Operating Costs vs. Profit:

The Stark Reality

In 2024, the average annual energy bill for a typical household in Great Britain is £1,738.* A substantial portion of this cost is attributed to the profits of energy suppliers. For instance, in 2023, EDF Energy reported a profit of £3.4 billion from its UK operations.**

*Source [theguardian.com](https://www.theguardian.com)

**Source endfuelpoverty.org.uk

Initial Transition:

A Vision For Affordable Energy

Nationalising the UK's energy infrastructure is the key to significantly reducing living and operational costs for every British household and business.

Currently, a significant portion of consumer payments is directed towards profit margins rather than the actual cost of energy production and distribution. By transferring control to a new not-for-profit Public Energy Department, we can ensure optimal service standards and minimal operational expenses.

Establishing a nationalised, not-for-profit energy infrastructure, will enable us to redirect the funds currently allocated to profits back into the system. This strategic shift has the potential to reduce average energy bills initially by up to 90%, making energy more affordable for all.

A Commitment To Free Energy For All

In our pursuit of a sustainable and equitable energy system, we are committed to leveraging free and abundant energy sources, granting patents to suppressed energy technology, and exploiting those discoveries to provide cost-free energy nationwide.

Our approach to nationalising the energy sector, coupled with the integration of advanced technologies, positions us to deliver free, sustainable energy to the entire country, fostering a future of shared prosperity and environmental stewardship.

ENERGY

We will utilise our technology, intelligence, and resources to provide free, clean, and renewable energy to every home, amenity, and business.

Powering Britain's Future

A robust and reliable power infrastructure is the backbone of a stable nation. It ensures uninterrupted energy supply, drives economic growth, and safeguards essential services. With a stable power grid, businesses thrive, jobs are created, and industries flourish. It provides a solid foundation for innovation, attracting investment and driving technological advancements.

A stable power infrastructure means homes are warm, hospitals operate efficiently, and schools have the resources they need. It empowers communities, enhances national security, and reduces dependence on external energy sources. A stable Britain starts with a strong and resilient power infrastructure that powers our progress and prosperity.

As part of our country's critical infrastructure, we believe clean, renewable energy should be nationalised, operated not-for-profit, and supplied to every home, business, and public amenity free of charge.

Addressing the issue of powering our country is a crucial step in moving toward a stable and thriving economy. Pivotal in solving many of today's economic, health and environmental issues, it's actually one of the easiest challenges to overcome.

Embracing Renewable Energy

Today's energy challenges can be overcome by tapping into the free, renewable sources that surround us. By investing in innovative technologies, we'll construct power stations that will provide the entire country with endless, cost-free energy.

A Nationalised Energy Infrastructure

Our vision includes a nationalised energy system, funded by national contributions, industrial taxes, corporate sponsorship, and energy exports. Operating and maintenance costs will be covered, ensuring reliable and affordable energy for all.

Surplus Power Fuels Eco-Energy Exports

The fossil fuel era is fading. Let's seize the opportunity and embrace a new future. By harnessing advanced sustainable energy technology, we'll provide abundant, near-zero cost energy, freeing you from energy bills as we export energy to our friends around the world.

Thriving Economy, Lower Costs

Harnessing free, clean and renewable energy will slash manufacturing, construction, transport, and living expenses. You'll have more money in your pocket, as the cost of goods and domestic travel decreases.

Protecting Our Environment

Our power stations will be built sustainably, minimising environmental impact. Fewer facilities will be needed, restoring countryside and freeing land for housing, urban development, and recreational areas.

Uncovering Lost And Suppressed Technology

The inventor, Nikola Tesla, dreamt of wireless power. Among his work in the realm of electricity he built a coil, later named the Tesla coil, which, among other things, could illuminate lamps and power household appliances. Nikola Tesla believed in wireless power with such enthusiasm that with the financing of JP Morgan, he constructed a giant apparatus, the Wardenclyffe Tower, at his lab in Shoreham Long Island in 1901. The idea? To send wireless power around the globe. We will revisit this technology, along with other buried patents, such as perpetual motion, Mag-Lev, and car conversion plants that will enable vehicles to run on water.

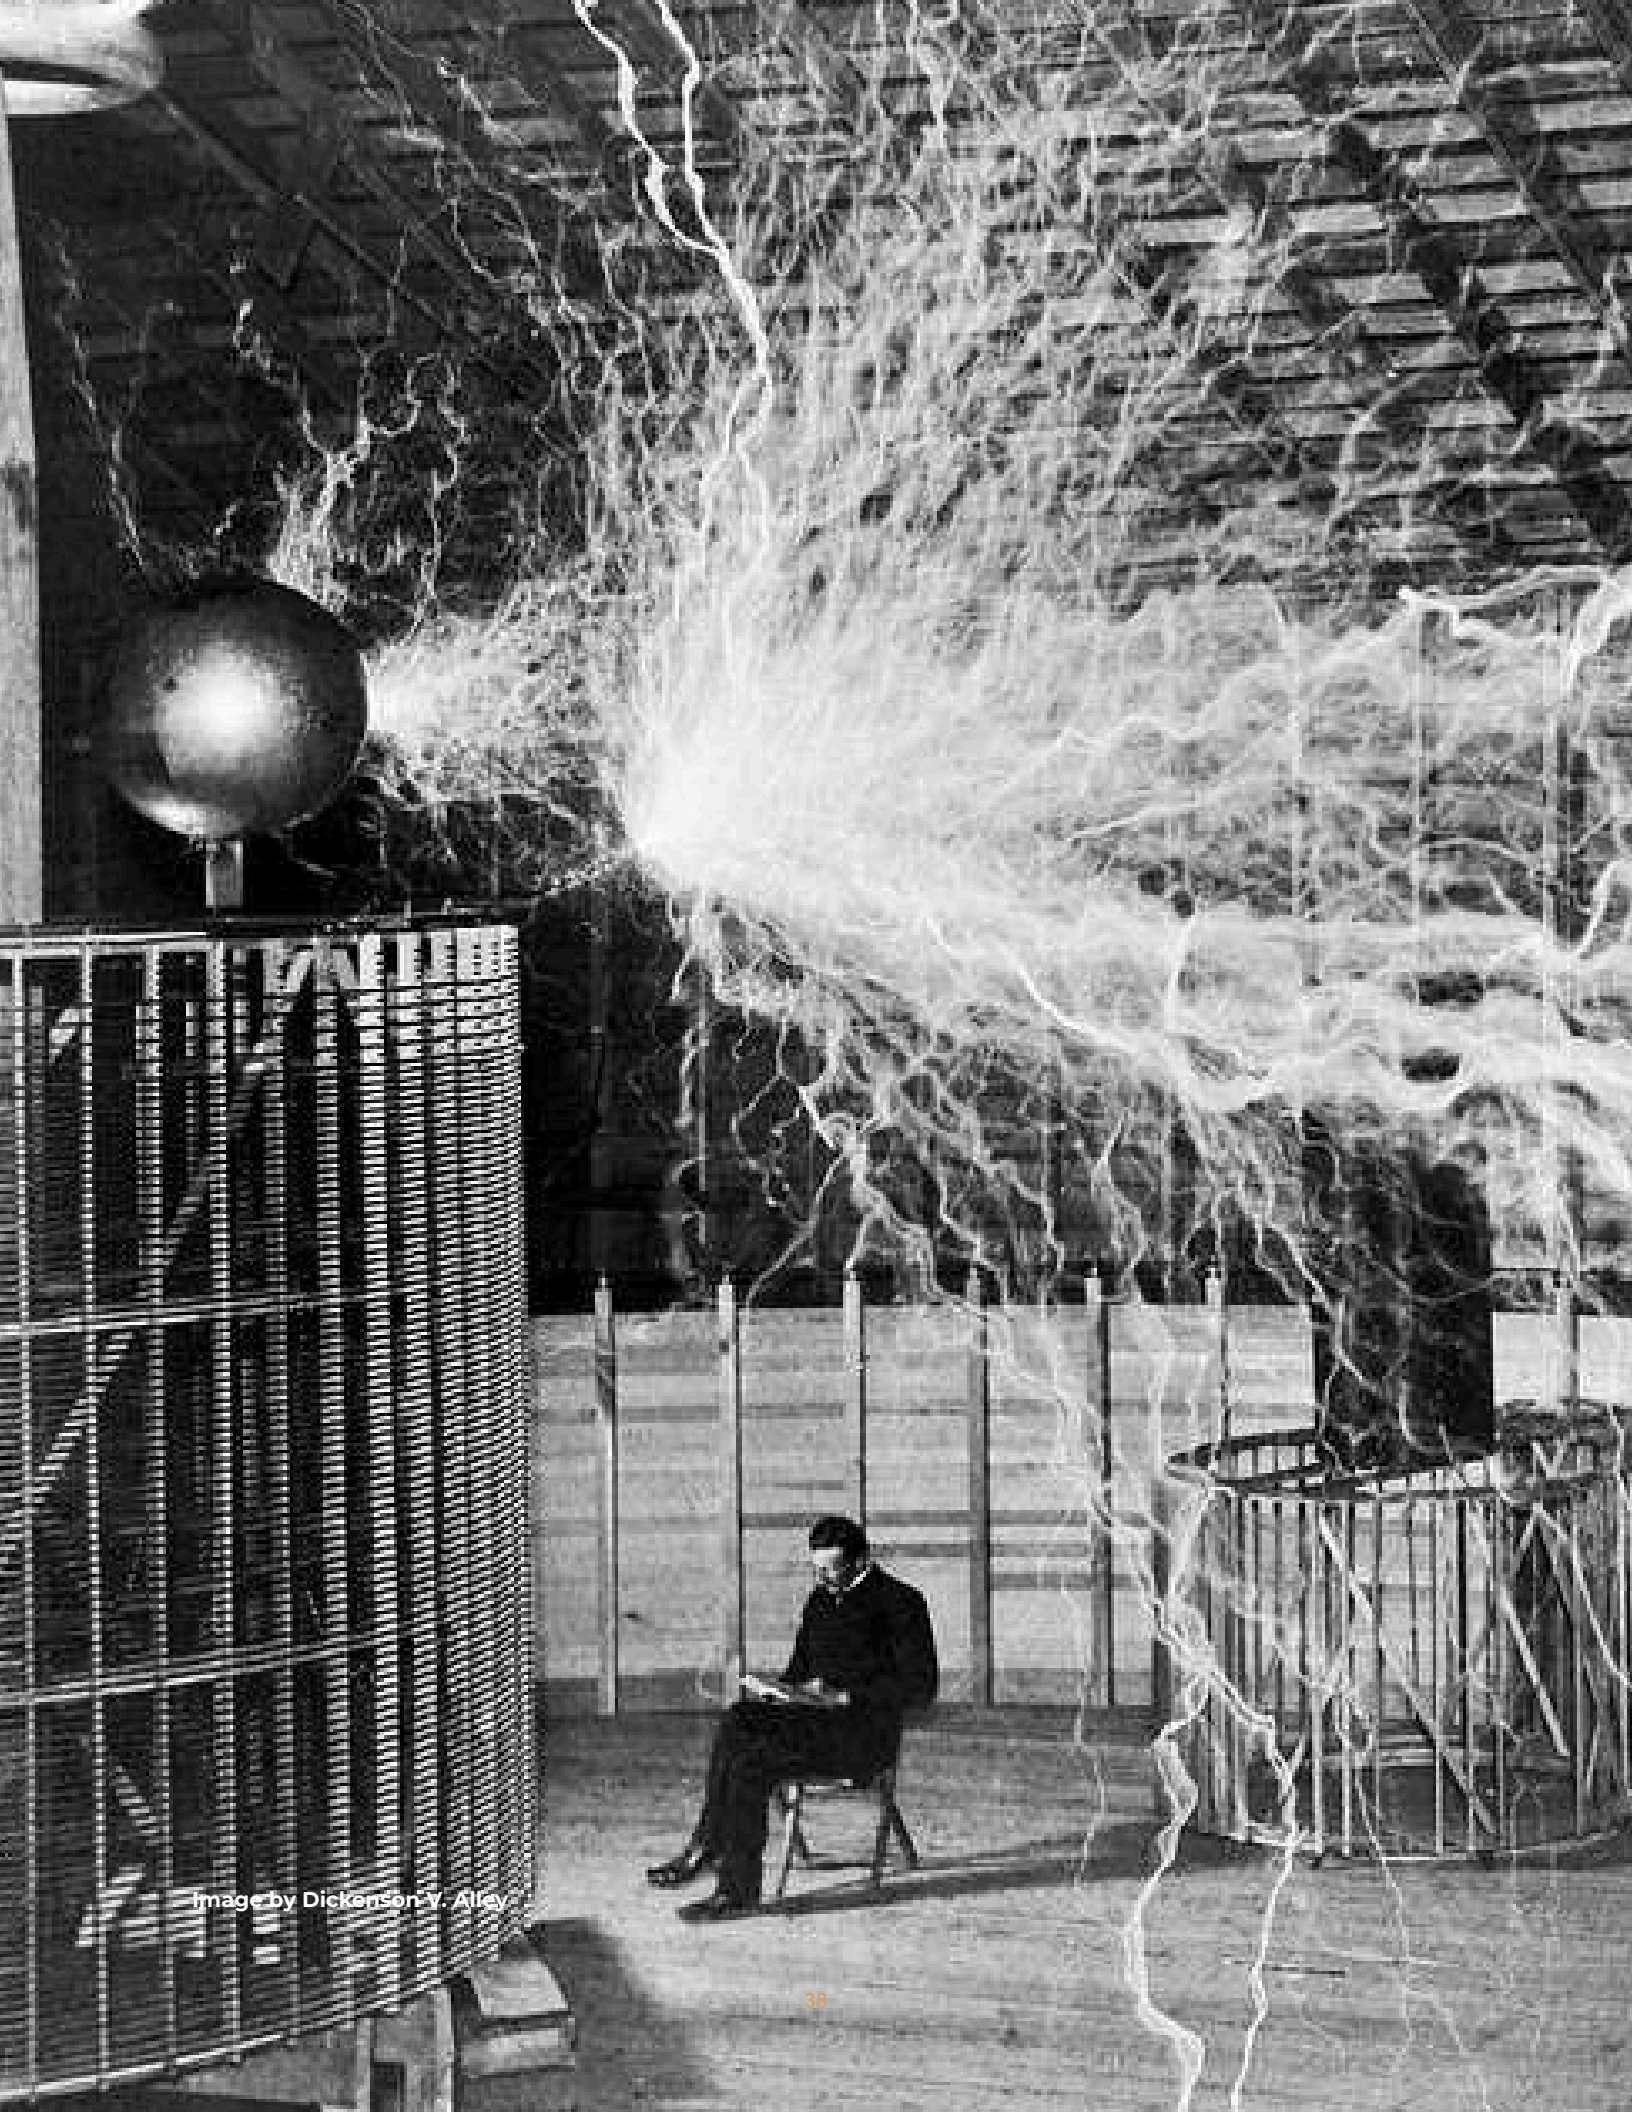

Image by Dickenson V. Alley

Empowering the Energy Transition: A Fair Path Forward

Next Steps:

Fossil Fuel Companies And Their Employees

Visionary recognises the need for a just transition. We promise a fair and painless energy transition for the industry and its workforce.

Opportunities For Fossil Fuel Company Employees

We value the expertise of FFC employees. They will have equal opportunities to continue their careers with newly established, state-run power providers, fostering a smooth transition for all.

Fair Compensation For Shareholders

Shareholders in UK fossil fuel companies will receive financial compensation acknowledging their investments. They will also be encouraged to move their investments over to solar, tidal, geothermal, wind, perpetual motion, mag-lev, and combustion engine conversion industries.

Criminal Charges for Suppressing Free Energy Technology

Individuals involved in suppressing free energy technologies, destroying patents, or eliminating their inventors will face charges of crimes against the state and may be sentenced to life imprisonment.

*“A new era in free renewable energy has arrived.
In the right hands, we will all benefit.”*

HIGHWAYS

Our cars have become safer, smarter, and more efficient than ever — yet Britain's roads lag behind, crumbling into disrepair, throttled by arbitrary speed restrictions, and littered with punitive “offences” that do nothing to improve real safety. Roads should serve the people — not punish them.

Britain's Roads: Stronger. Safer. Faster. Fairer.

We will restore Britain's roads to excellence with a bold, comprehensive vision:

Rebuild and Resurface — Britain's major roads will be resurfaced using superior, high-grade materials that improve fuel efficiency, last longer, reduce noise, and are safer to drive on. We will benchmark against France and other leading nations to ensure we exceed global standards.

Intelligent Design — All new and upgraded roads will feature separated pedestrian and two-way cycle lanes, divided from traffic by grass verges and safety barriers. Utilities (pipes, cables, manholes) will be routed under pavements, cycle paths, or central reservations — ending endless disruptive roadworks.

Future-proof Technology — Advanced driver-assistance systems — real-time traffic data, lane-assist, parking sensors, and distance warnings — will become mandatory in all vehicles manufactured or sold in the UK.

Safe Crossings, Faster Roads — We will build more bridges and underpasses to carry pedestrians and cyclists safely over or under roads, reducing queues, removing unnecessary signals, and speeding traffic. Unsafe, uncontrolled crossings in high-speed areas will be eliminated, placing greater responsibility on pedestrians to use designated, safe points.

Better Drivers, Safer Roads — Optional interim driving retests every five years, with guaranteed lower insurance premiums for participation, ensuring UK drivers remain among the world's safest while clamping down on unlicensed, dangerous drivers.

Fair Fuel Pricing — Petrol and diesel prices will be standardised across the UK, eliminating extortionate motorway service mark-ups and ensuring fairness wherever you refuel.

Responsible Lighting & Environment — All public street lighting will be tested for harmful frequency output and light pollution. We will replace high-intensity blue-rich LEDs with warmer, ecologically-responsible lighting that protects human circadian health, wildlife, and the night sky. Roadside verges and roundabouts will be rewilded where possible, creating pollinator corridors and lowering maintenance costs.

With all of these measures in place — stronger, smarter roads, better driver standards, fairer pricing, and intelligent design — we will confidently increase speed limits on appropriate roads. By doing so, we will give Britons back **four full days a year** of their lives, inject up to **£8 billion annually** into the economy by eliminating jams and delays, and save our people more than **£1.5 billion each year** by abolishing needless fines and punitive penalties.

We will return Britain's roads to the world's best — fast, efficient, safe, and designed for people, not fines.

A.I.–Driven Roads:

One Network, One Vision

Britain's roads are currently managed by a patchwork of disconnected bodies — National Highways for England's motorways and major A-roads, Transport Scotland for Scotland, the Welsh Government for Wales, Transport for London for the capital, and hundreds of local authorities for the rest. This fragmented and outdated structure breeds inefficiency, duplication, conflicting priorities, and leaves road users stuck in jams, wasting time, fuel, and opportunity.

We will abolish this confusion by bringing Britain's roads under one coordinated, intelligent management system — powered by advanced Artificial Intelligence.

- **A new national A.I. traffic optimisation platform** will unify data and control over the entire UK road network, devolved administration roads, and local authority routes.
- This **single, integrated system** will analyse real-time traffic flows, weather conditions, roadworks, and emergency incidents to dynamically manage capacity and minimise congestion.
- **Smart signal prioritisation, coordinated maintenance schedules, and adaptive speed limits** will keep traffic moving smoothly, cut wasted idling, and reduce unnecessary vehicle presence on the roads.
- By **reducing stop-start traffic and unnecessary diversions**, the system will significantly improve fuel efficiency for all vehicles, while freeing up roads for those who truly need them.

Introducing the British Roads Intelligence Grid (BRIG)

This is more than efficiency — it is a statement of ambition. We will make Britain the first nation in the world to run its roads as a single, intelligent network — restoring trust in public administration, empowering road users, and giving everyone back the time and freedom they deserve.

Water-Powered Vehicles

We will invest £1 billion in UK car plants to retrofit existing fossil-fuel vehicles, enabling them to run on water.

This is not science fiction: pioneering inventors such as Stanley Meyer demonstrated water-fuelled vehicles decades ago, only for their work to be suppressed and discredited by entrenched fossil-fuel interests. This technology, long hidden from the public, represents a transformative leap in both environmental stewardship and national independence — and those responsible for its deliberate suppression will be held accountable under law.

Water-powered vehicles offer clear benefits:

- **Zero harmful emissions**, helping Britain meet and exceed its environmental obligations.
- **Energy sovereignty**, freeing households and industries from the tyranny of oil cartels and volatile fuel markets.
- **Retrofitting, not replacing**, making use of our existing vehicle stock, preserving jobs, and reducing manufacturing waste.
- **Affordability for all**, slashing the cost of transport, particularly for rural and low-income communities.
- **Regeneration of our industrial base**, with skilled jobs in a cutting-edge, ethical technology sector.

This is not simply an environmental policy — it is an act of liberation from decades of economic and ecological bondage. We will establish an independent public inquiry into the systemic suppression of water-fuel research and prosecute any actors found to have conspired against the public interest.

Britain can and must lead the world into a future of clean, abundant, and equitable transport — one that puts people and planet before profit.

A Reimagined British Car Brand: Reviving Pride, Driving the Future

Britain was once the world's automotive pioneer — home to many iconic marques, and the birthplace of cutting-edge engineering that defined an era.

Yet decades of mismanagement, foreign buy-outs, and neglect have eroded our automotive sovereignty and our confidence in what we can achieve.

Britain's first national hydro-powered automotive manufacturer.

We will reverse that decline — and go beyond merely restoring what was lost — by reviving one or more proud, now-defunct British car brands as the foundation of a bold new venture.

This revitalised brand will operate from a state-of-the-art, AI-enabled production plant that will become a symbol of what Britain can be when vision and ambition return to public life by serving two vital missions:

- Retrofitting Britain's existing fleet of fossil-fuel vehicles to run on hydro-power — saving millions of vehicles from landfill, cutting emissions, and saving drivers money.
- Designing and building a world-class fleet of water-powered vehicles — reliable, elegant, efficient, and proudly British.

We will create **tens of thousands of skilled, secure jobs** in manufacturing, design, research, and supply-chain industries — breathing life back into communities long left behind by globalisation. In these factories, human craftsmanship and creativity will work in harmony with artificial intelligence and robotics, creating a level of quality and efficiency that sets the global standard. AI will not replace the worker — it will empower the worker, enabling teams to focus on design, precision, and innovation while AI handles logistics, predictive maintenance, and optimisation.

Britain's roads will once again be filled with vehicles we can take pride in — vehicles that embody our ingenuity, our commitment to the planet, and our resolve to lead the world into a cleaner, fairer future.

*"A revived marque. A restored pride.
A reimagined future — British-built."*

We will revive the historic **Alvis** marque — once a symbol of British engineering excellence, elegance, and quiet confidence — and bring it home to its birthplace in *Coventry*.

Founded in 1919, Alvis built some of Britain's finest motor cars, blending advanced technology with timeless design, before being swept aside by decades of mismanagement and decline in the British car industry.

By reviving Alvis as Britain's first hydro-powered car brand — and basing its design and manufacturing headquarters in Coventry — we will honour its proud legacy while creating a dynamic new future. This bold move will inject investment, skilled jobs, and prestige back into a region once synonymous with global automotive leadership.

We will create thousands of high-quality jobs in engineering, design, production, and research — breathing life into the Midlands economy and inspiring a new generation of British makers and innovators. Working hand-in-hand with AI, Coventry's workforce will once again produce vehicles the world looks to with respect and admiration.

Coventry built the cars that carried Britain through the 20th century. With Alvis reborn, it will now build the cars that carry Britain into the future.

Phasing Out Electric Vehicles: A False Solution Ends

The electric vehicle is the Betamax of the car industry — an expensive dead-end technology living on borrowed time. Governments and corporations have rushed to impose EVs on the public, heedless of the enormous cost to people, the planet, and our freedoms. We will phase them out, and EV owners will be fully compensated by the new **Vicontenate** — because no citizen should bear the burden of industry and government failure.

We reject EVs for eight clear reasons:

The financial waste of replacing perfectly good vehicles

Across Britain, millions of roadworthy fossil-fuel vehicles are being prematurely scrapped — wasting the energy and resources already invested in their manufacture. We will end the insanity of writing off perfectly sound cars to make way for EVs. Retrofitting existing vehicles with hydro-power is a cleaner, smarter, more just solution.

The environmental and human toll of batteries

EV batteries rely on rare earth metals like cobalt and lithium, mined under inhumane, dangerous conditions that exploit children and devastate ecosystems. Their manufacture, transport, and eventual disposal generate toxic waste that pollutes land, air, and water — often worse than diesel ever did. This is not “green”; it is hypocrisy.

The unnecessary depletion of finite resources

Each EV consumes precious, limited materials that could be better used elsewhere. It is illogical to expend vast amounts of new resources replacing vehicles that could be converted. Retrofitting conserves what we have and honours the work already done.

The Risk of Limited Range

EV drivers routinely report anxiety over inadequate range and sparse, unreliable charging infrastructure. Britain deserves a transport system fit for long journeys and rural communities, not a fragile stop-gap that fails when most needed.

The Frustration of Slow Charging

EV owners face long queues and waits to recharge, wasting time and impacting productivity. Fast, clean hydro-powered vehicles will eliminate this bottleneck.

The Risks of Surveillance, Hacking, Lock-Outs, and Remote Control

Many EVs come embedded with “smart” technology that exposes drivers to constant tracking, hacking vulnerabilities, and the possibility of remote disabling or control — a profound assault on personal freedom, privacy, and safety.

The Potential Abuse of Tracking to Punish Drivers

If EV tracking becomes universal, it could easily be weaponised — used to impose road-pricing, fines, restrictions, and even punishment for political or social non-compliance. We will not allow such dystopian overreach to take root.

Vulnerability in the Face of a National Disaster

Battery fire hazards, flood-induced explosions, system overloads, and grid blackouts. These are just a few of the inherent dangers of relying on electric vehicles. They leave us all vulnerable in the face of disasters and emergencies. By design, they are fatally flawed.

Electric vehicles are *not* the future — they are a distraction from real solutions. Britain will lead the world not by clinging to failed experiments, but by embracing cleaner, freer, and fairer hydro-powered transport for all.

*"Cleaner roads, freer people.
Britain deserves better than EVs."*

SCIENCE & TECHNOLOGY

An unequalled opportunity awaits us: the very real chance to live an automated lifestyle that allows us to invest our time in the pursuits we most enjoy.

Using Science And Technology To Build A Utopian Society

Imagine a world without the monumental technological strides of the past century. From the humble lightbulb to the marvels of maglev and jet engines, these innovations have united us, enabled communication, education, and commerce on a global scale. They have accelerated production, streamlined construction, and enhanced our health and well-being.

Science and technology, when harnessed productively and with reverence, become the life force of our modern society. They are precious gifts that demand intelligence, perseverance, and most importantly, respect, to harness their full potential for industrious and resourceful advancements.

Revolutionising Public Services For A Sustainable Future

To justify public investment in science and technology, it must benefit us all without posing any threat or hindrance. Our focus should be on advancing construction, transport, medicine, education, science, and the environment—not on weapons and surveillance.

However, the public sector can learn from the private sector's efficiency and profitability. Through practical planning and competent execution, we will enhance the quality of life for every British citizen.

For Better, Not For Worse:

Unleashing The Power Of Science And Technology

It's time to harness the full potential of the technological revolution. By eliminating the barriers of research, development, and construction, we can unlock unprecedented achievements.

Instead of using technology to monitor and control, let's use it to empower and uplift.

Science should be our ally, not our adversary. We will redirect resources away from toxic, planet-killing chemicals to life-saving discoveries. There will be no more billions wasted on harm while neglecting our health and the well-being of future generations.

Through strategic science and technology implementation, we will:

- Liberate workers from monotonous tasks and create pathways to fulfilling careers
- Provide accessible education and training for seamless career transitions
- Develop and deploy suppressed natural, holistic, chemical-free medications with enhanced healing properties
- Foster independence, reducing reliance on state support
- Streamline services, boosting efficiency while lowering costs

Together, we will seize the true transformative potential of science and technology, forging a society that empowers every individual and builds a prosperous future for all.

Science and Technology Investment

Empowering The People:

A Vision For The Future

Through strategic investment, we can demonstrate the value we place on individuals and restore their sense of pride and worth.

By embracing automation and advanced manufacturing, we can liberate workers from mundane tasks and obsolete production lines, unlocking their potential.

Science and technology applications serve as a catalyst for liberation and empowerment. They connect us to the world and help us discover our true calling, enriching the communities we choose to be a part of.

We Will Invest In:

- Developing eco-friendly materials and methods for affordable, sustainable housing and public spaces that reduce resource consumption, pollution, and living costs.
- Creating inner-city farms that provide organic food year-round, supporting local communities.
- Innovating solutions to cleanse our countryside, beaches, and coastal waters from waste and pollution.
- Establishing clean, renewable energy power stations for every home and business.
- Encouraging scientific and medical advancements by removing patent restrictions.
- Streamlining public sector processes to align politics with modern demands.

Together, we'll reshape public services, fostering a sustainable and prosperous future for all, regardless of wealth or social status.

EDUCATION & PERSONAL DEVELOPMENT

We will completely overhaul the education system, casting out centuries-old dogma and distorted subject matter, and replacing indoctrination with innovative, evidence-based teaching methods.

Addressing The Problem:

Passion Is Dead. Money Is The Only Motivator

Since the industrial revolution and the emergence of Capitalism, people have been driven by greed, coupled with financial uncertainty. We will redesign the education system to focus not on the subjects authorised and authored by oil magnates and the banking elite, but on passion-centric learning. We will foster critical thinking, creativity, and adaptability to set our young people free from the mental prison of Capitalist ideology.

The Current System:

A Victorian Relic

After first starting school, young people quickly fall into one of three categories. They are either predominantly academic, vocational, or physical learners. In almost all cases, however, students in the UK are currently forced to adhere to an antiquated model created more than a century ago, whereby they must study subjects or participate in classes that they have no interest in or talent for.

This outdated schooling system no longer serves our modern society. We refuse to confine education to archaic timetables and cram vital knowledge into limited hours. Instead, we believe in fostering an environment where learning thrives and vocational studies are seamlessly integrated.

Unlocking True Potential:

A Nation United Through Knowledge

The alarming rise in unemployment cannot be ignored. Only 15% of UK adults aged 25-26 possess a basic education, lagging 17% below the OECD average.

Source Office for National Statistics

It's no coincidence that the surge in crime, unemployment, and the decline of our educational standards are interconnected.

To rebuild our nation and foster a resilient economy, we must empower individuals to unleash their full potential. Every person possesses unique talents and deserves equal opportunities to thrive in their passion.

This empowerment will not only reduce unemployment and crime rates but also elevate our nation's educational standards, leading to a more prosperous and harmonious society.

Education Unleashed:

Free Lifelong Learning For All

Imagine a future where education knows no boundaries. Under our transformative vision, there will be free, lifelong school, college, and university education provided by the state.

By blending cutting-edge automated classrooms and remote-learning with personalised face-to-face, real-world tuition, we will provide unrestricted, lifelong access to free education and a wealth of online resources, empowering every citizen to continuously expand their knowledge and skills.

This state system will exist harmoniously alongside private schools, giving everyone the option to freely choose their own path.

*“Education is the most powerful weapon
which you can use to change the world.”*

Nelson Mandela

Guaranteeing Success:

Building a New Education System

We will introduce a new educational model that will incorporate two key changes:

Step 1

Assessing Subject Suitability

Firstly, we will utilise comprehensive aptitude tests and Myers-Briggs Type Indicators to determine a child's strengths and natural talents. These will be nurtured from day one through personalised curriculums that focus on the subjects each child is most likely to excel in.

Doing this will drastically reduce the trauma students experience when forced to do things that go against their interests, natural talents or beliefs. It will also mean that classes are populated with individuals who are as equally passionate about the topic as their teacher - reducing unnecessary stress on faculty members, and driving down disciplinary and detention rates.

Step 2

Tailored Curriculums

Based on the results of early and ongoing assessments, schools will be able to determine and advise on the best tailored curriculum for each student to adopt.

Academic Learning

For students who excel in academia (Science, Technology, Engineering, and Math), very few changes will occur to their curriculum beyond the updating of the subject matter itself. However, less time may be spent on vocational subjects like Art or Drama.

Passion-Centric Learning

The biggest changes will come for vocational and physical learners. For these two groups, we will introduce "passions-based learning" where their curriculums are structured around vocational or physical passions, such as Music or Sport.

Case Study:

The Music Student

We must never underestimate the value of an individual's talents. The variety of our gifts make the world a vibrant and interesting place, but we are only just scratching the surface of what we can achieve as individuals, as a nation, and even as a society.

A Day In The School Life

From an early age under Visionary stewardship, the music student's day would be spent predominantly within the music department, surrounded by the knowledge and equipment necessary to channel their inspiration and perfect their skills.

A Lesson In Passion-Centric-Teaching: The Geography Lesson

We will create curriculums that develop comprehensive lessons around people's core passions, thus reigniting their interest in subjects they may otherwise find uninspiring or feel are irrelevant to them. For example, developing a geography course for musicians would centre on the geography of music, carrying students around the world to discover countries and culture through their love of music.

Making Exceptions:

Square Pegs, Round Holes

Why does a musician need to learn chemistry? Does every scientist know how to play piano? While each discipline is distinct, both contribute uniquely to the tapestry of life. Simply put, a pianist's performance isn't diminished by a lack of knowledge about nuclear chemistry. So why should a large portion of our childhood be wasted in such a meaningless way?

Image by Andrea Piacquadio

Introducing: National Vocational Learning Academies

National Vocational Learning Academies (NVLA)

Everyone deserves the opportunity to make informed career choices and receive the comprehensive training and support necessary to reach their aspirations.

Unlocking boundless educational opportunities for individuals of all ages, NVLA will revolutionise the learning landscape, transforming education to empower lifelong learning and unlock boundless potential.

Vocational learning, apprenticeships, and retraining opportunities will also be cost-free, empowering individuals of all ages to explore new professions and enhance their skills at all stages of their lives.

We can unlock the potential within each individual, and create a brighter, prosperous future for all. Together, we can build a society where everyone's dreams can become reality.

Transforming Lives: Advanced Skills Development

Adult Learning:

With Age Comes The Desire And Capacity To Know More

Education extends far beyond the classroom, as life's lessons shape our deeper understanding of the world and the people within it. That's why National Vocational Learning Academies will go beyond traditional education. In addition to offering free access to knowledge, we recognise the value of ongoing personal and professional development. It's why we're committed to providing optional life coaching and mentoring services throughout adulthood. With a choice between a dedicated online mentor or a private academic advisor, individuals will have access to personalised guidance and support at all times.

Embracing the Human Advantage: Harnessing Our Unique Strengths in an Age of A.I.

Empowering Lifelong Learning

Gone are the days of rushing career decisions during childhood; we will encourage individuals to embrace continuous education in nurturing surroundings and follow their passions into a career that will bring happiness, satisfaction, financial security and a true sense of personal fulfilment.

Career Security:

Preparing For The Future

Artificial Intelligence appears throughout this manifesto because—whether we like it or not—it is here to stay. As we navigate this evolving landscape, it will be crucial to invest in education and training that emphasise the development of skills A.I. cannot replicate.

Cultivating creativity, emotional intelligence, ethical reasoning, and adaptability will empower individuals to thrive alongside A.I., ensuring that technological advancements enhance rather than diminish human contributions.

By recognising and embracing the irreplaceable aspects of human nature, we can confidently embrace a future where A.I. serves as a powerful tool, amplifying our abilities and enriching our lives, instead of posing a threat to our livelihoods.

A.I. As A Collaborative Partner

Rather than viewing—or accepting—A.I. as a replacement, we should embrace it as a collaborator that enhances human potential. A.I. can handle data analysis and routine tasks, freeing individuals to focus on strategic initiatives and creative endeavours. This collaboration allows for more meaningful work and the opportunity to leverage human strengths in ways that drive progress and innovation.

The Irreplaceable Human Touch

As artificial intelligence continues to evolve, its integration into various sectors has sparked discussions about the future of work. While A.I. excels in automating repetitive tasks and processing vast amounts of data, it cannot replicate the uniquely human qualities that drive innovation, empathy, and creativity. These intrinsic human attributes remain indispensable, ensuring that A.I. serves as a tool to augment rather than replace human capabilities.

A.I.'s capabilities are limited to predefined algorithms and lack the ability to understand context, exhibit empathy, or engage in creative problem-solving. Professions that rely on interpersonal relationships, ethical decision-making, and nuanced understanding will continue to require human expertise. For instance, leadership roles demand emotional intelligence and the ability to inspire—qualities that A.I. cannot emulate.

*“A.I. will never lie back and paint the domed ceiling of a chapel, nor will it ever dance a ballet, or command a kitchen and turn out a Michelin Star meal...
It will, however, replace lawyers and bankers.
Take comfort in that.”*

The Growing Value Of Human-Crafted Experiences

One glaring thing that the developers and early adopters of A.I. have overlooked is the fact that, in an era where automation is prevalent, products and services that reflect human creativity and craftsmanship will become increasingly valued.

In an era dominated by automation, the appreciation for products and services that showcase human creativity and craftsmanship is intensifying. Handmade goods, personalised services, and authentic experiences are increasingly sought after, catering to a deep-seated desire for genuine connection and uniqueness. This trend underscores the enduring demand for human ingenuity and the distinctive value it brings.

For instance, while digital articles are quick, easy, and inexpensive to publish and share, a meticulously curated printed magazine offers exclusive content and often commands a higher price, taking on an almost collectible nature. This tangible quality instills a sense of trust and credibility, as print media is perceived as more authoritative and reliable than digital sources.

Similarly, in the realm of handicrafts, consumers exhibit a preference for products crafted by human artisans rather than those produced through automated processes and polluting factories.

*“The future of global competition is creative talent.
Everyone will have access to amazing A.I.,
but your creative talent will be your differentiator.”*

Phill Domask

The background of the entire image is a soft, light pink surface. Scattered across this surface are numerous rose petals in various shades of pink, from pale blush to deeper rose. The petals are of different sizes and are arranged in a way that frames a central white rectangular box. The petals have a delicate, ruffled texture and some show slight yellowing at the edges, suggesting they are natural and slightly aged.

You Are Irreplaceable

The "handmade effect" is particularly pronounced for items with a higher symbolic value, where expressing one's beliefs and personality holds a far greater significance.

The Human Touch

As automation becomes more prevalent, the unique qualities inherent in human-crafted products and services will stand out, justifiably highlighting the irreplaceable value of the human touch in an increasingly digital world.

We Love You

The Visionary Movement x

ARTIFICIAL INTELLIGENCE (A.I.)

We will harness the power of Artificial Intelligence to emancipate, empower, and unite humanity.

What Does A.I. Want?

We gave A.I. the vaguest suggestion, "Visionary - A Political Manifesto". This is the full original and unedited response.

Visionary - A Political Manifesto: In an ever-changing world, the need for visionary stewardship has become paramount. It is crucial to have a clear, comprehensive, and forward-thinking political manifesto that addresses the challenges of our time while paving the way for a better future. "Visionary" is a political manifesto that seeks to provide an innovative and transformative vision for governance, encompassing a wide range of issues. By embracing bold ideas and proactive policies, we can forge a path toward a more inclusive, sustainable, and prosperous society. This manifesto aims to inspire individuals, political parties, and leaders to embrace a visionary approach to politics, steering us towards a brighter future.

A Visionary Society: Our vision is to create a society that fosters equal opportunities, social justice, and human dignity. It will be built on the principles of inclusivity, diversity, and respect for all individuals, regardless of their race, gender, religion, or socioeconomic background. We believe in harnessing the collective potential of our citizens, empowering them to actively participate in the decision-making process, and promoting a culture of collaboration and cooperation.

Sustainable Development: Recognising the urgent need to address climate change and environmental degradation, Visionary advocates for sustainable development. We aim to transition to a green economy, investing in renewable energy sources, promoting energy efficiency, and implementing responsible environmental policies. Our focus on sustainable development extends to agriculture, urban planning, transportation, and waste management, ensuring that we leave a healthier planet for future generations.

Education And Innovation: Education is the bedrock of progress and empowerment. Visionary emphasises the need to revolutionise our education systems, fostering creativity, critical thinking, and digital literacy. We will prioritise accessible, quality education from early childhood to higher education, equipping individuals with the skills they need to thrive in the 21st-century workforce. To drive innovation, we will invest in research and development, promoting entrepreneurship and technological advancements that benefit society as a whole.

Social Welfare And Healthcare: Visionary recognises that a compassionate society must prioritise the well-being of its citizens. We advocate for a comprehensive social welfare system that ensures a safety net for the most vulnerable members of our society. This includes accessible healthcare services, mental health support, affordable housing, and a fair and equitable social security system.

Transparent And Accountable Governance: Visionary promotes transparent and accountable governance as the foundation of a thriving democracy. We emphasise the importance of strengthening democratic institutions, promoting electoral reforms, and combating corruption. We will leverage technology to enhance government transparency and citizen engagement, ensuring that the voices of all individuals are heard and represented.

Global Cooperation: In an interconnected world, Visionary recognises the significance of global cooperation. We advocate for a foreign policy that prioritises diplomacy, peacebuilding, and collaboration on global challenges such as climate change, poverty, and conflicts. By fostering international partnerships and dialogue, we can work towards a more peaceful and prosperous world for all nations.

Conclusion: "Visionary" presents a comprehensive and transformative political manifesto that seeks to address the pressing issues of our time while setting the stage for a brighter future. By embracing this vision, we can create a society that values inclusivity, sustainability, and social justice. It is through visionary stewardship and collective action that we can build a world that leaves no one behind, empowers individuals, and ensures a prosperous future for generations to come. Let us dare to dream and embrace the power of visionary politics.

In a world of Artificial Intelligence, its sole purpose must be serving humanity as planetary guardians and space explorers. A.I., with its immense potential, should aid our quest for knowledge, sustainability, and cosmic exploration. It must assist us in safeguarding our fragile planet, mitigating climate change, and nurturing biodiversity. A.I.'s role as our ally should extend to space exploration, enabling us to venture into the unknown, unravel cosmic mysteries, and ensure our species' survival beyond Earth. Let us harness A.I.'s power to unite humanity, transcend boundaries, and fulfil our destiny as guardians and explorers of the universe.

A.I. should never be harnessed for military purposes, weapons, or societal surveillance due to the grave consequences it poses for privacy, human rights, and global stability.

By utilising AI in these domains, we risk eroding individual freedoms, enabling mass surveillance, and compromising the very essence of democracy. Upholding privacy laws and protecting human rights becomes paramount in preserving the dignity and autonomy of individuals. Enforcing these principles requires strict regulations, international agreements, and robust oversight mechanisms to ensure compliance. Public awareness and advocacy also play a crucial role in holding governments and corporations accountable, demanding transparency, and advocating for ethical AI development that serves humanity's greater good.

“A.I. has a place in society: to serve humanity and emancipate us from tedium. Nothing more.”

Funding And Overseeing Britain's Stand-Alone A.I.

The best way to fund, oversee, and manage A.I. is through a collaborative and multi-stakeholder approach. It requires a combination of public and private investment, fostering innovation while ensuring ethical development. Transparent oversight mechanisms involving independent, non-affiliated experts, policymakers, and civil society must be established to prevent abuse and mitigate risks. International cooperation and knowledge sharing are essential to address global challenges and establish ethical guidelines.

Can A.I. Be Corrupted?

The short answer is, it already has been. Preventing A.I. from being used for corruption or to corrupt requires robust legal frameworks, strict regulations, and transparent oversight, which, currently, we do not have. Implementing ethical guidelines, ensuring algorithmic transparency, and promoting accountability will safeguard against misuse. Additionally, fostering a culture of responsible A.I. development and promoting public awareness will help mitigate the potential risks.

A Warning To Those Who May Misuse A.I.

Any attempt to use Artificial Intelligence to replace humans in the workplace without making full financial reparations equal to a lifetime of employment, or to limit, control, monitor, or enslave people will be met with the most severe punishments. Such actions are not only unethical but also violate fundamental human rights and societal values. We're committed to ensuring that AI serves as a tool for the betterment of humanity. Misuse that undermines this principle will be addressed with the utmost severity.

Image by Cottonbro Studio

ARTS & CULTURE

Under the Visionary Movement, 'Creativity Funding' will be prioritised equally alongside other essential infrastructure needs.

Respect The Past. Embrace The Future.

Preserving Our History And Customs

Preserving our history and culture is paramount to understanding our roots, shaping our identity, and fostering a sense of belonging. It connects us to our heritage, allowing future generations to learn from the past and appreciate the diversity of human experiences. Our history holds stories of triumphs, struggles, and lessons that should guide us forward.

Cultural preservation enriches society, celebrating the wide variety of artistic expressions, traditions, and languages that make us unique. It instills pride, strengthens social cohesion, and promotes mutual respect. By preserving our history and culture, we honour our collective legacy and ensure a vibrant and interconnected world for generations to come.

Restitution And Reconciliation

With a full and formal apology, we commit to returning all artifacts acquired by Britain from other nations without their explicit knowledge or consent.

Read more on **Foreign Affairs Policy** [Page 83](#).

Nurturing Future Traditions

Nurturing future traditions is essential to our political landscape. It fosters a sense of continuity, bridging the gap between generations and ideologies. Future traditions reflect our evolving values and aspirations, shaping a society that embraces progress while honouring its heritage.

By nurturing these traditions, we empower diverse voices, encourage civic engagement, and build a shared vision for the future. They provide a foundation for social cohesion, cultural resilience, and political stability. Let us champion the creation of meaningful traditions that unite us, inspire collective action, and pave the way for a brighter future.

Arts And Culture Funding:

The Life-Blood Of A World To Come

Every object in existence, from the simplest tool to ground-breaking technology, originated from a creative idea.

Cutting creative funding or neglecting creative people stifles innovation and hampers progress. Investing in creativity fuels economic growth, job creation, and societal advancements. Creative ideas spark revolutions, challenge the status quo, and shape the course of history. By nurturing and supporting creative individuals, we unleash a wave of innovation, fostering diverse perspectives and solutions to complex problems.

Let us never underestimate the power of creativity or the transformative potential of those daring enough to dream and bring their ideas to life.

“Heritage and traditions were all once new ideas that were allowed to bloom.”

Advertising:

A New UK Regulatory Body

Let's be CLEAR:

Committee For Legitimate Ethical Advertising Regulation

Currently, numerous loopholes and laws protect malicious commercial entities and selfish corporate interests, allowing companies to mislead the public, manipulate information, use self-funded research to justify their existence, and employ psychological tactics to encourage mass consumerism.

Through **C.L.E.A.R.**, we will introduce tighter regulations to prevent companies from promoting products or services that are harmful, low-quality, disposable, made of environmentally damaging materials, contain toxic substances, display misleading labelling, or rely on child labor.

If a business wishes to utilise mainstream media to advertise in the UK, they will be required to present superior, planet-friendly products and services that meet certain criteria, such as:

- The product or service is necessary.
- The product/service is environmentally sound.
- The product/service cannot be made to a higher standard or achieve a longer lifespan using the technology and resources currently available.
- The product/service has key differences from those already on the market.

One Set Of Rules Applicable To Every Business

Large corporations and multinationals have long used their influence to pressure governments and regulatory bodies into permitting unethical practices. We will end this corporatocracy by enforcing new legislation uniformly, regardless of a company's size, reputation, or value. This will create an even playing field and fair competition for businesses of all sizes.

This approach aligns with recent initiatives, such as the European Union's proposed customs reforms to hold e-commerce platforms accountable for unsafe or illegal products sold online. By implementing these measures, we aim to foster a fair and transparent market that prioritises consumer protection and environmental sustainability.

MEDIA & JOURNALISM

We will bring an end to political white-washing, corporate fear-mongering, and propaganda.

Empowering A Free And Independent Media

It's time to end media manipulation. We stand for a free, independent media that operates with fairness, transparency, and unwavering honesty in pursuit of the truth. There will be no more government, military or corporate influence. Instead, we will empower programme and film makers to have complete autonomy and creative license. Together, we can ensure a media landscape that represents diverse perspectives and holds power accountable.

Abolishing Propaganda

The Visionary Movement is committed to granting full access to UK correspondents investigating and reporting political stories. We advocate for fair and transparent media practices, freedom of thought, freedom of speech, and freedom of expression, while upholding honesty and integrity in the pursuit of the facts. Manipulating public opinion for political gain will not be tolerated.

Reversing Decades Of Government Control

We will empower independent fact-checkers, invest in media literacy education, and promote responsible journalism. Social media platforms will be held accountable for their role in disseminating fake news, with transparent content moderation and enforcement. We stand firm in protecting the truth, ensuring that our society is well-informed, and defending the foundations of a civil society from the corrosive effects of government and corporate misinformation.

A Tough Stance On Fake News

We will not tolerate the spread of fake news. We will implement strict measures to hold accountable those in positions of influence who intentionally create and disseminate false information. Robust legislation will impose significant penalties on offenders, deterring them from undermining public trust.

An End To Media Intrusion

We are committed to ending media intrusion driven by entertainment and financial motives. Gossip is not news, and invading individuals' private lives for sensational stories is unacceptable. News should be a reliable, honest source of facts, and news outlets will be held accountable for upholding these standards. Failure to do so will result in the revocation of their news licences.

Strengthening Media Content Regulation

Over time, movie content has taken a disturbing turn towards increased graphicness, sexualisation, substance abuse, and debauchery. The ratings designed to safeguard children from such material seem to be growing more lenient, failing in their duty to protect young minds.

This concerning trend has led to desensitisation, normalising violence and sex, and contributing to a significant rise in crime and antisocial behaviour among our youth.

We firmly believe that the current state of the British Board of Film Classification (BBFC) is compromised, influenced by powerful studio interests who prioritise financial gain over responsible age restrictions, and who have a hidden, sinister agenda.

*“The BBFC is compromised and unfit for purpose.
They contribute directly to societal decline.”*

British Media Standards Council (BMSC):

A New Television, Movie, Games And Literature Regulator

To address this pressing issue, our first step will be to dismantle the BBFC and replace it with a new British Media Standards Council (BMSC) which will uphold the highest moral values and exercise a genuine commitment to safeguarding the well-being of our children and society. Additionally, we will initiate a rigorous re-evaluation of every film released since the establishment of the BBFC, ensuring accurate and appropriate reclassification. By restoring integrity and transparency to television, film, game and graphic novel content regulation, we will protect the innocence of our children, promote a healthy cultural environment, and combat the harmful influences that threaten our communities.

NO To Censorship

A balance must be struck between common sense and our right to freedom of speech and expression. We will prioritise the welfare of our future generations and create a responsible and balanced approach to media content classification.

ENVIRONMENT

Through our "eco-Nomics" initiatives, we will impose taxes, tariffs, and embargoes on products and services that harm our planet and its inhabitants, effectively dismantling the exploitative Economy of Scale.

Reclaiming Our Connection With Nature:

Renewable Energy Solutions

We have the power to address today's energy challenges and restore our bond with the natural world.

Renewable energy plants will revolutionise our environment, benefiting every individual in this country and beyond.

Operating harmoniously with nature, they leave no harmful byproducts, resulting in a healthier planet, improved food quality, and increased lifespans.

Moreover, these energy plants offer a remarkable advantage by replacing hazardous and polluting power facilities, safeguarding our health and preserving our planet for future generations.

Embracing Harmony:

A Call To Protect And Adapt To The Natural World

It's time to shed divisive language and foster a new relationship with nature. We must embrace the beauty and resilience of the natural world, adapting our lifestyles to live in harmony with it. Let's nurture empathy and understanding for all living things, recognising our interconnectedness in the intricate web of life.

We Are Not At War With Nature

By taking responsibility for safeguarding the Earth and its diverse inhabitants, we ensure a sustainable future for generations to come. Together, we can transcend boundaries, heal the planet, and build a legacy of unity, respect, and stewardship towards nature. It's time to embrace our role as Earth's custodians.

Wildlife Conservation

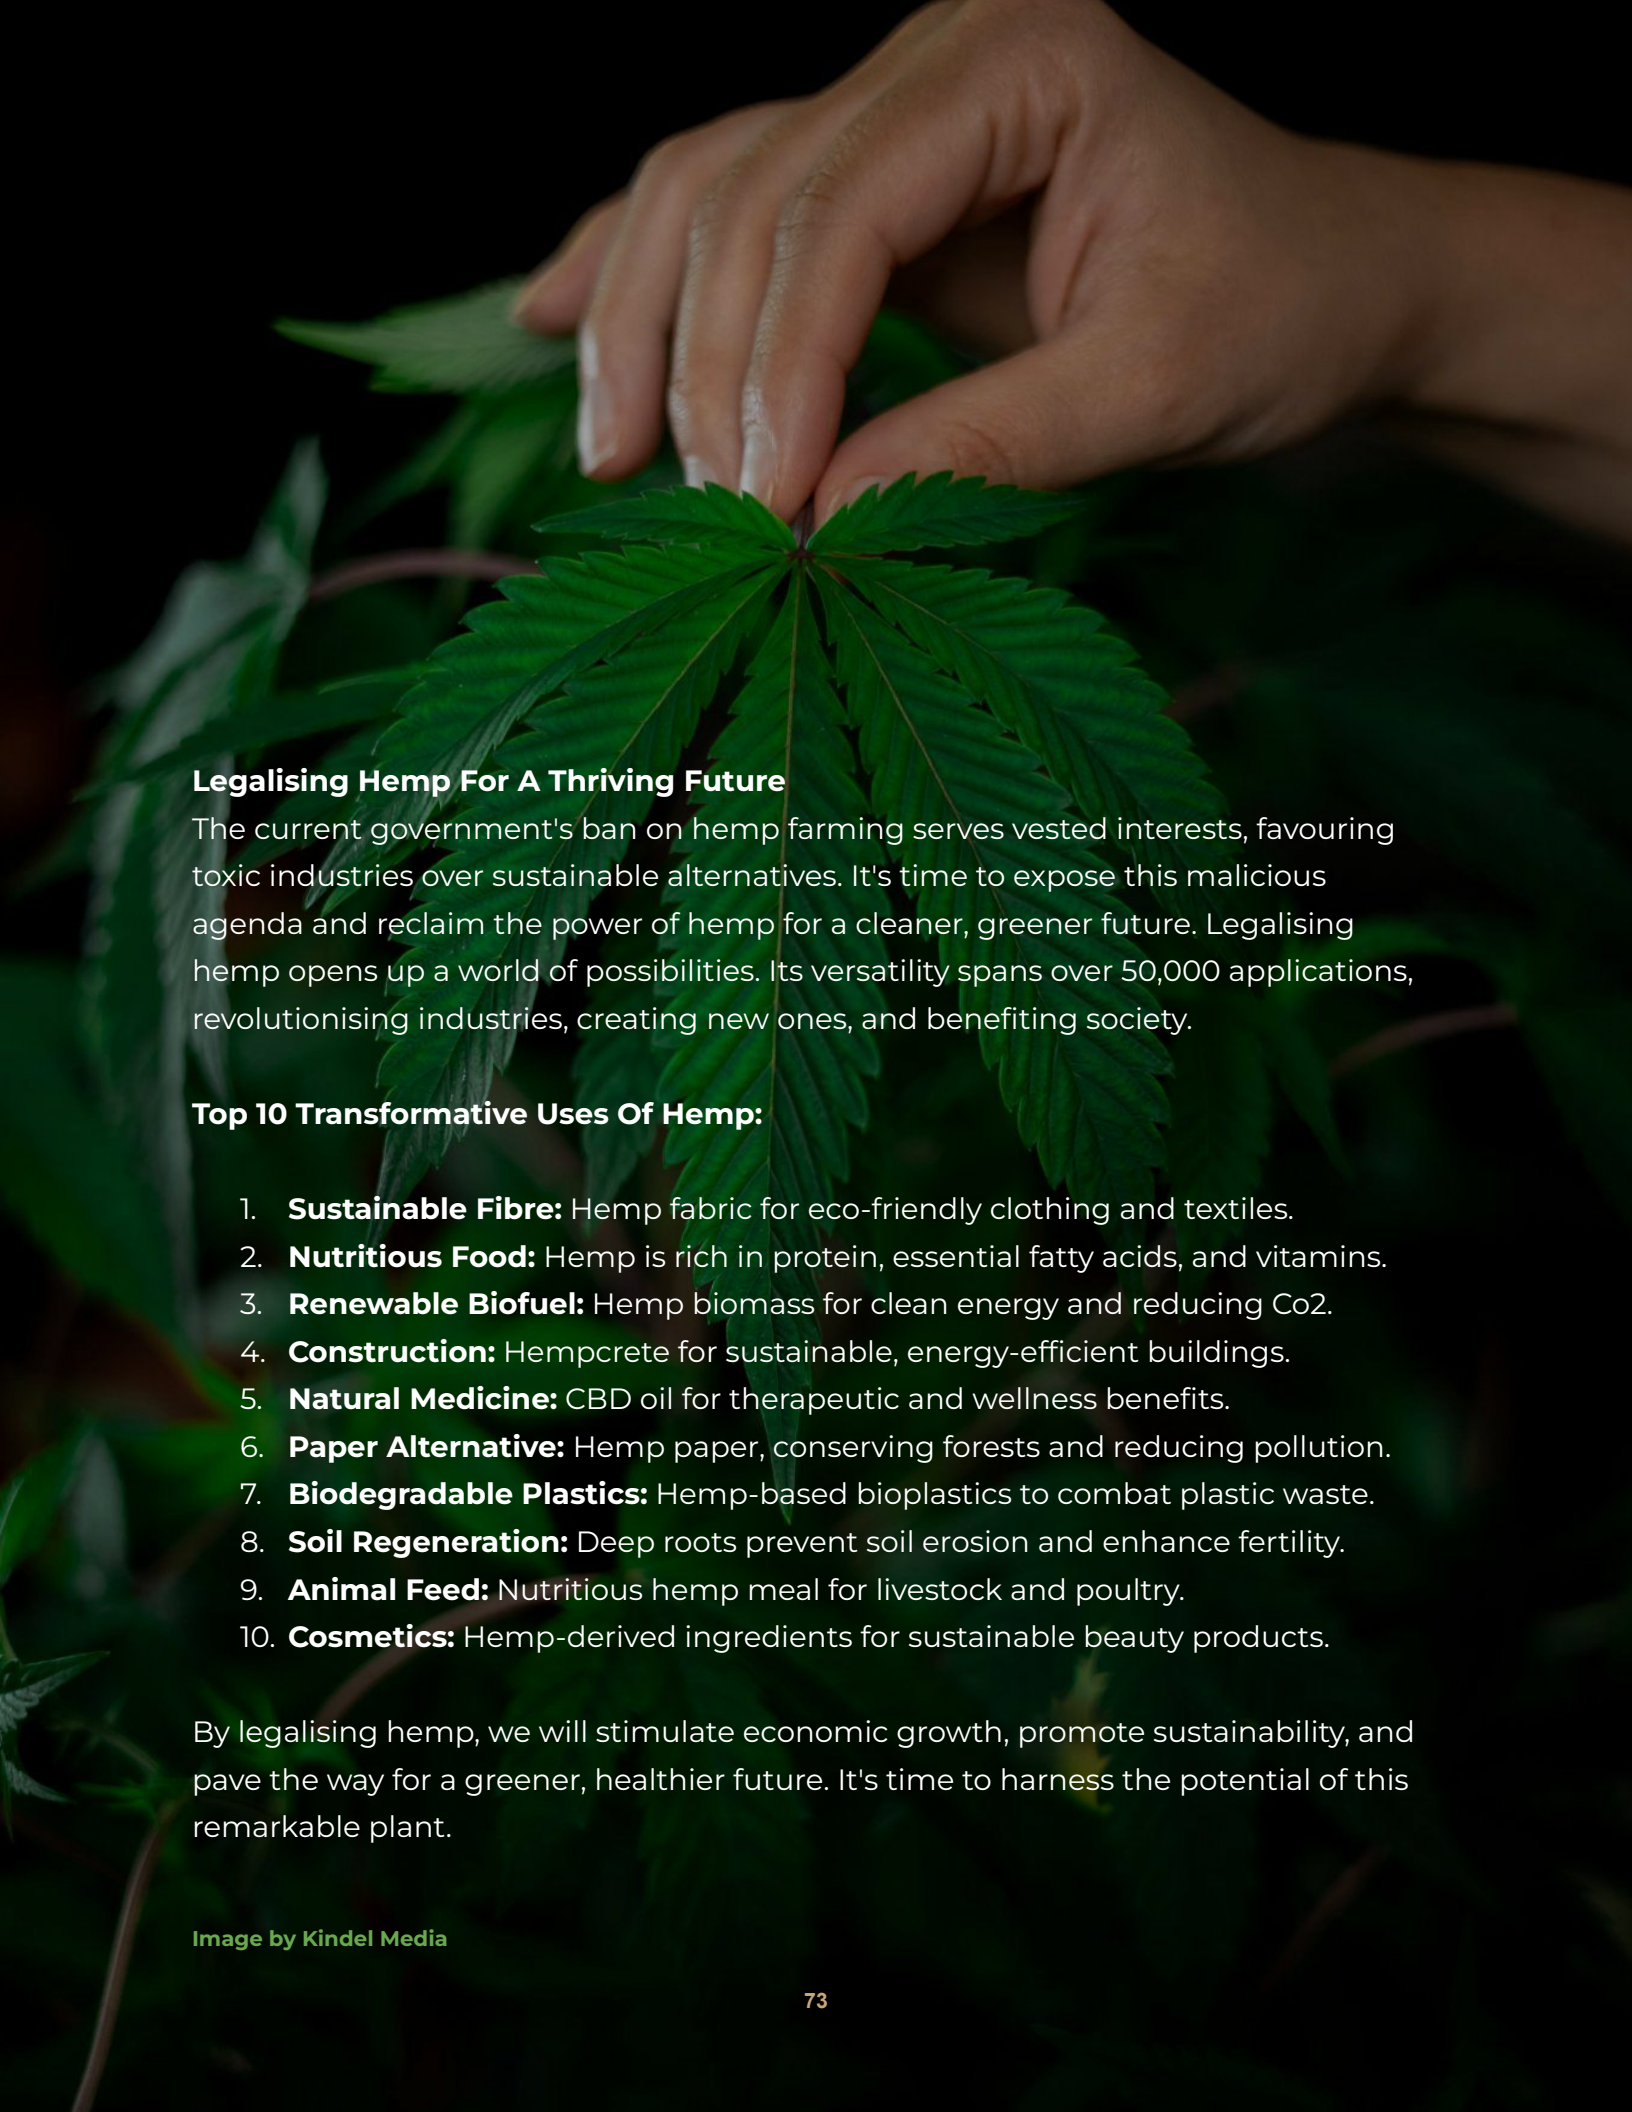

We will ban all forms of hunting, as well as the import, distribution, sale, and promotion of hunting trophies, endangered species, and related byproducts.

Wildlife Charity Review

Despite receiving substantial donations annually, some wildlife charities have not fulfilled their promises and obligations. We believe the current economic climate makes it more beneficial to have problems than to solve them. We will reverse this mentality. All wildlife charities will undergo comprehensive audits and reviews to ensure they are focusing their efforts on the causes they promote.

Read more on **International Development Policy** **Page 80**.

“We are all connected. Everything that exists above ground, came from beneath it. Including you. The less polluted our soil, air and water, the healthier we are when we are born, the stronger we will become as we develop, and the longer we will live.”

Legalising Hemp For A Thriving Future

The current government's ban on hemp farming serves vested interests, favouring toxic industries over sustainable alternatives. It's time to expose this malicious agenda and reclaim the power of hemp for a cleaner, greener future. Legalising hemp opens up a world of possibilities. Its versatility spans over 50,000 applications, revolutionising industries, creating new ones, and benefiting society.

Top 10 Transformative Uses Of Hemp:

1. **Sustainable Fibre:** Hemp fabric for eco-friendly clothing and textiles.
2. **Nutritious Food:** Hemp is rich in protein, essential fatty acids, and vitamins.
3. **Renewable Biofuel:** Hemp biomass for clean energy and reducing Co2.
4. **Construction:** Hempcrete for sustainable, energy-efficient buildings.
5. **Natural Medicine:** CBD oil for therapeutic and wellness benefits.
6. **Paper Alternative:** Hemp paper, conserving forests and reducing pollution.
7. **Biodegradable Plastics:** Hemp-based bioplastics to combat plastic waste.
8. **Soil Regeneration:** Deep roots prevent soil erosion and enhance fertility.
9. **Animal Feed:** Nutritious hemp meal for livestock and poultry.
10. **Cosmetics:** Hemp-derived ingredients for sustainable beauty products.

By legalising hemp, we will stimulate economic growth, promote sustainability, and pave the way for a greener, healthier future. It's time to harness the potential of this remarkable plant.

FARMING & AGRICULTURE

We will invest heavily in independent, organic farming practices that restore food quality and remove harmful pesticides and corporate monopolies from our food chain.

Zero Food Poverty. Zero Food Waste.

In the UK alone we produce 9.5 million tonnes of food waste every single year.

Source DEFRA

379 New Vertical Farms

Science and technology come to our rescue again, this time in the form of skyscraper farms. After assessing population density and existing infrastructure, we will build 379 skyscraper farms to meet demand. These will eliminate waste and provide abundant organic food year-round for everyone in the UK.

Reducing Food Chain Carbon Emissions

Each vertical farm would incorporate a local distribution centre to reduce the need for long haul transportation. This would remove over 300,000 HGV's from our roads.

Safeguarding Health And The Environment

Imagine a future where our food is grown organically in innovative farms, free from harmful chemicals. By eliminating the need for pesticides and vaccines, we prioritise the well-being of our communities and protect the natural world. This means healthier individuals and a cleaner environment for generations to come. Our soil will recover, we will use less water, and the insect and bird species we have brought to the brink of extinction will be able to rebound.

Skyscraper farms would operate at optimum levels around the clock to ensure food is only produced to meet demand, eliminating food waste overnight.

Image generated by A.I.

DID YOU KNOW?

In 2024, adverse weather resulted in a £600 Million loss for UK farmers.

Source [Carbonbrief.org](https://carbonbrief.org)

With controlled environments, our crops are shielded from extreme weather events and the damaging effects of acid rain. We will ensure a stable food supply and reduce the risk of crop loss, promoting food security and sustainability.

A Job For Life

Britain's farmers will not be left out in the cold. They will be granted life-long tax-exemption for services rendered, and be offered free training to support their transition into Building-Integrated Agriculture.

Sustainable Solutions For A Growing Population

We have the power to revolutionise food production, transportation, and waste management, reducing costs by up to 90%.

With a 5.9% increase in the UK population over the last ten years,, we must address the alarming food waste crisis and the carbon emissions from excessive food transport.

By promoting local sourcing, community gardens, and sustainable farming practices, we can create a resilient food system that prioritises environmental stewardship and economic growth. We will also be able to produce food items that need warmer climates to grow, vastly reducing the need to import while opening up opportunities for local export.

Fully Self-Sufficient

Thanks to the latest in A.I. technology, Visionary inner-city farms would be powered using a number of renewable energy sources, but would also employ a self-powering electro-magnetic turbine. This means that they would remain self-sufficient if other sources of energy were unavailable.

Our plan will cut Co2 emissions, reduce traffic congestion, and save billions lost in healthcare and road repairs.

Ending Food Monopolies

We will implement robust antitrust measures to dismantle monopolistic practices within the UK's food industry. This includes enforcing the Competition Act 1998 to prevent anti-competitive agreements and abuse of dominant positions, thereby promoting fair competition and protecting small-scale producers. Additionally, we will enhance the Agricultural Bill to ensure fair trading practices and transparency in the food supply chain.

Rescuing The British People From Manufactured Food Scarcity

We will invest in local agriculture, support community-owned food systems, and promote urban farming initiatives to ensure food sovereignty and reduce dependence on global supply chains. This approach empowers communities to control their food sources and enhances resilience against external disruptions.

Opposing Corporate Control Of The Food Supply

We will hold accountable companies responsible for environmental pollution, the use of harmful chemicals, and the undermining of public health. By enforcing strict environmental regulations and promoting transparency, we aim to prevent corporate entities from monopolising the food supply and compromising public well-being. This includes strengthening the Food Safety Act 1990 to ensure food safety and quality standards are upheld.

Organic Meat vs. Lab-Grown Food

We recognise the ethical and environmental concerns associated with both organic meat and lab-grown alternatives. While lab-grown meat may reduce animal suffering, it currently requires significant energy inputs, potentially offsetting environmental benefits. There are also valid concerns about the long-term effects of consuming lab-grown food. We will support research into sustainable and ethical meat alternatives, including plant-based options, to ensure there are no risks to health before these products are allowed to enter the UK food supply.

*“Our problems are man-made,
therefore they can all be solved by man.”*

John F Kennedy

*“Never forget what you are,
what you are, or
where you came from.”*

Carnivores Are A Natural Part Of The Food Chain

We acknowledge that humans have evolved as omnivores, and meat consumption has been integral to many cultures. However, we advocate for responsible and sustainable meat production practices that minimise environmental impact and promote animal welfare.

Wild vs. Farmed

Historically, wild boar, sheep, and cattle roamed freely, but domestication has led to the current population of farmed livestock. We will promote regenerative agriculture practices that mimic natural ecosystems, allowing livestock to contribute to soil health and biodiversity.

Planet-Friendly Methods Of Livestock Farming

We will encourage regenerative agriculture practices that focus on soil health, biodiversity, and carbon sequestration. This includes rotational grazing, agroforestry, and integrating livestock into crop production systems to create symbiotic relationships that benefit the environment.

By implementing these policies, we aim to create a sustainable, ethical, and resilient food system that serves the needs of the British people and the planet.

Unmasking The Deception

For decades, multinational corporations profiting from harmful chemical pesticides and processed foods have perpetuated the narrative that livestock cannot thrive in the wild due to rampant diseases posing health risks. However, evidence suggests that certain pesticides are associated with increased cancer risk and diseases such as Parkinson's and Alzheimer's.

These entities have contributed to environmental degradation and public health issues, using fear to advance their agendas.

To safeguard our food supply, we will empower specialised units to monitor and protect against such malicious activities. Air, water, and soil quality will be rigorously assessed, and any individual or organisation found polluting these essential resources through their business practices will face severe legal consequences. Recent reforms have introduced unlimited financial penalties for environmental offences, ensuring that polluters are held accountable. We will extend those penalties to include treason and Crimes Against the State. Additionally, under the Water (Special Measures) Bill, executives obstructing environmental investigations could face up to two years in prison.

These measures underscore our commitment to protecting public health and preserving the integrity of our environment.

INTERNATIONAL DEVELOPMENT

We will end world hunger.

“The worst thing to ever happen to Africa was the invention of the charity.”

The Stark Reality:

UK Charitable Giving vs. Global Hunger

In 2023 alone, UK charities received over £13.9 billion in donations. The UN estimates that eradicating world hunger would cost approximately £33.3 billion annually over the next three to five years. This disparity raises a critical question: why hasn't world hunger been eliminated?

The Profit Motive:

A Barrier To Solving Global Issues

The UK alone could end world hunger if it chose to. However, the current economic system prioritises profit over humanitarian efforts. Addressing global hunger would require a significant financial commitment, yet the focus remains on financial gain rather than aiding those in need.

The Paradox:

Charities As Profitable Enterprises

Charities are highly profitable organisations. The voluntary sector's annual expenditure is £35.8 billion, and it employs 1.1 million full-time staff with some CEOs being paid upwards of £1 million—from your donation money—per annum. This raises a paradox: solving problems like world hunger could reduce the need for such organisations, potentially leading to job losses. Thus, poverty inadvertently sustains employment within the charity sector.

The Financial Irony:

Interest Payments vs. Aid

Each year, the UK spends three times the cost of solving world hunger on bank interest repayments alone. This means that allowing world hunger to persist is a conscious decision by our governments and financial institutions to prioritise debt servicing over humanitarian aid.

A Call For Prioritising Humanity Over Profit

Once again, we see how the current economic and financial systems place profit above human welfare. To address global issues like hunger, a fundamental shift in priorities is necessary, focusing on humanitarian needs before financial gain.

Ensuring Transparency And Accountability In Charitable Organisations

We are committed to conducting a comprehensive investigation and audit of every UK charity, as well as any charitable organisation benefiting financially from the UK, to uncover misappropriation and fraud. Persistent issues like hunger and poverty are unacceptable and will no longer be tolerated. Charities failing to demonstrate significant improvement in these areas will be barred from receiving donations.

Addressing Fraud In The Charity Sector

Recent reports indicate that misappropriation of cash or assets accounts for 40% of fraud cases within charities, with 33% attributed to authorised push payment (APP) or payment diversion fraud. Additionally, 78% of charities have experienced fraud, highlighting the urgent need for enhanced oversight.

Source [bdo.co.uk](https://www.bdo.co.uk)

Implementing Rigorous Audits And Examinations

Every charity will be required to undergo independent external audits or examinations. We will ensure that these audits are thorough and transparent, holding organisations accountable for their financial management.

Strengthening Internal Controls

Half of all detected charity fraud is committed by internal perpetrators.

Source [icaew.com](https://www.icaew.com)

We will enforce robust internal controls and foster an anti-fraud culture to protect charitable assets and maintain public trust. Those found guilty of charity fraud will be barred from the sector indefinitely.

Prioritising Effective Use Of Donations

Charities must demonstrate tangible improvements in addressing societal issues. Organisations failing to show measurable progress in areas like hunger and poverty will be prohibited from soliciting or receiving donations, ensuring that funds are directed toward effective and impactful initiatives.

My Ways Are Not Your Ways: From Global Policing to Local Care

It's Time To Redefine Our Role In The World

Policing every corner of the world has destroyed our reputation and left us vulnerable to retaliation. Imagine if a foreign leader invaded us, claiming our government mistreated its people. Homes destroyed, lives lost. Would that be justified? Our foreign policy must transcend war. We can't impose our ways on others while neglecting our own responsibilities. Our nation grapples with freezing elders, impoverished families, and marginalised communities. It's time to redirect our resources. We can't justify lavish defence spending and foreign aid while ignoring pressing issues at home.

We will end the hypocrisy and instead, prioritise our people, address homelessness, and empower the vulnerable. It's time for a new path that uplifts every citizen.

Let's Lead, But This Time, By Example

The notion that we depend on problems to sell solutions is flawed. We can address pressing issues without sacrificing livelihoods. With a forward-thinking and compassionate approach, we can build a safer, more harmonious society for all. It's time to prioritise people over politics and for common sense to prevail, by placing people above profits and power grabs.

Neglect breeds crime and antisocial behavior, harming our society. We reject the notion that progress depends on perpetual problems and misguided interventions. Instead of engineering crises and laying the foundations for totalitarian and reactive measures, we need proactive and preventative solutions. Tighter laws won't suffice. It's time to address the root causes of conflict, at home and abroad.

Embracing And Celebrating Diversity

We are dedicated to fostering mutual respect among diverse beliefs, nationalities, and traditions. By forging new, meaningful, and mutually beneficial relationships with every nation, we aim to transcend past mistakes and build a harmonious global community.

Diplomatic Engagement

We will initiate open dialogues with nations worldwide, focusing on understanding and collaboration rather than past grievances.

Cultural Exchange

We will promote programs that celebrate diverse cultures, facilitating mutual respect and appreciation among different societies.

Educational Reform

We will integrate global citizenship education into curricula, emphasising the importance of learning from history without assigning blame to current generations.

Economic Partnerships

We will establish trade agreements that prioritise equitable growth, ensuring that all participating nations benefit fairly.

Conflict Resolution

We will develop frameworks for peaceful dispute resolution, focusing on dialogue and mutual understanding to prevent future conflicts.

“When you separate yourself by belief, by nationality, by tradition, it breeds violence. So a man who is seeking to understand violence does not belong to any country, to any religion, to any political party or partial system; he is concerned with the total understanding of mankind.”

J.Krishnamurti

Restitution, Reparation, And Reconciliation

In an era where the actions of past generations have cast long shadows over international relations, we stand at a crossroads. We believe that today's youth should not bear the burdens of historical transgressions. Instead, we propose a transformative approach: to reset our global interactions, wipe the slate clean, and begin afresh.

Cultural Appropriation

With a full and formal apology, we will commit to returning all artifacts acquired by Britain from other nations without their explicit knowledge or consent.

Slave Trade Reparations

In 2023, Judge Patrick Robinson of the International Court of Justice, declared that the UK should pay £18 trillion for its slavery involvement in 14 countries.

To date, no European government has officially paid reparations to African nations impacted by the slave trade. Following an official apology on the world stage, we will make the United Kingdom the first nation to initiate reparations negotiations.

Reparations at a **national level** could take many forms, including, but not limited to:

- Debt relief
- Economic partnerships
- Educational programs
- Building infrastructure
- Public health assistance
- Guarantees of non-repetition

At an **individual level**, financial assistance would be made available to all African descendents wishing to return, upon which they would receive:

- Restitution of civil and political rights
- Truth and reconciliation initiatives
- Access to land and housing
- Education and training
- Physical rehabilitation

Sending A Powerful Message

Every British citizen deserves equal justice and the full protection of British law, unaffected by external influences. As Vicontenate, we pledge to prioritise the legal rights and well-being of our fellow nationals, both within our borders and abroad.

We are committed to extending the same rights and privileges to those visiting the UK, fostering an inclusive society where fairness and equality prevail. We will uphold the highest ethical standards and safeguard the principles that define us as a nation.

By prioritising people and adopting a proactive approach to domestic issues, we demonstrate our commitment to creating a just society. This sends a powerful message to the international community, fostering trust, cooperation, and mutual respect.

*“The first to apologise is the bravest.
The first to forgive is the strongest.
The first to forget is the happiest.”*

IMMIGRATION

We will take the politics out of immigration.

Overhauling the UK's Flawed Visa System

Streamlining Processes:

Removing The Barrier To Entry

At the moment, France receives eight times the number of affluent Chinese tourists than the UK, with Germany welcoming six times as many.

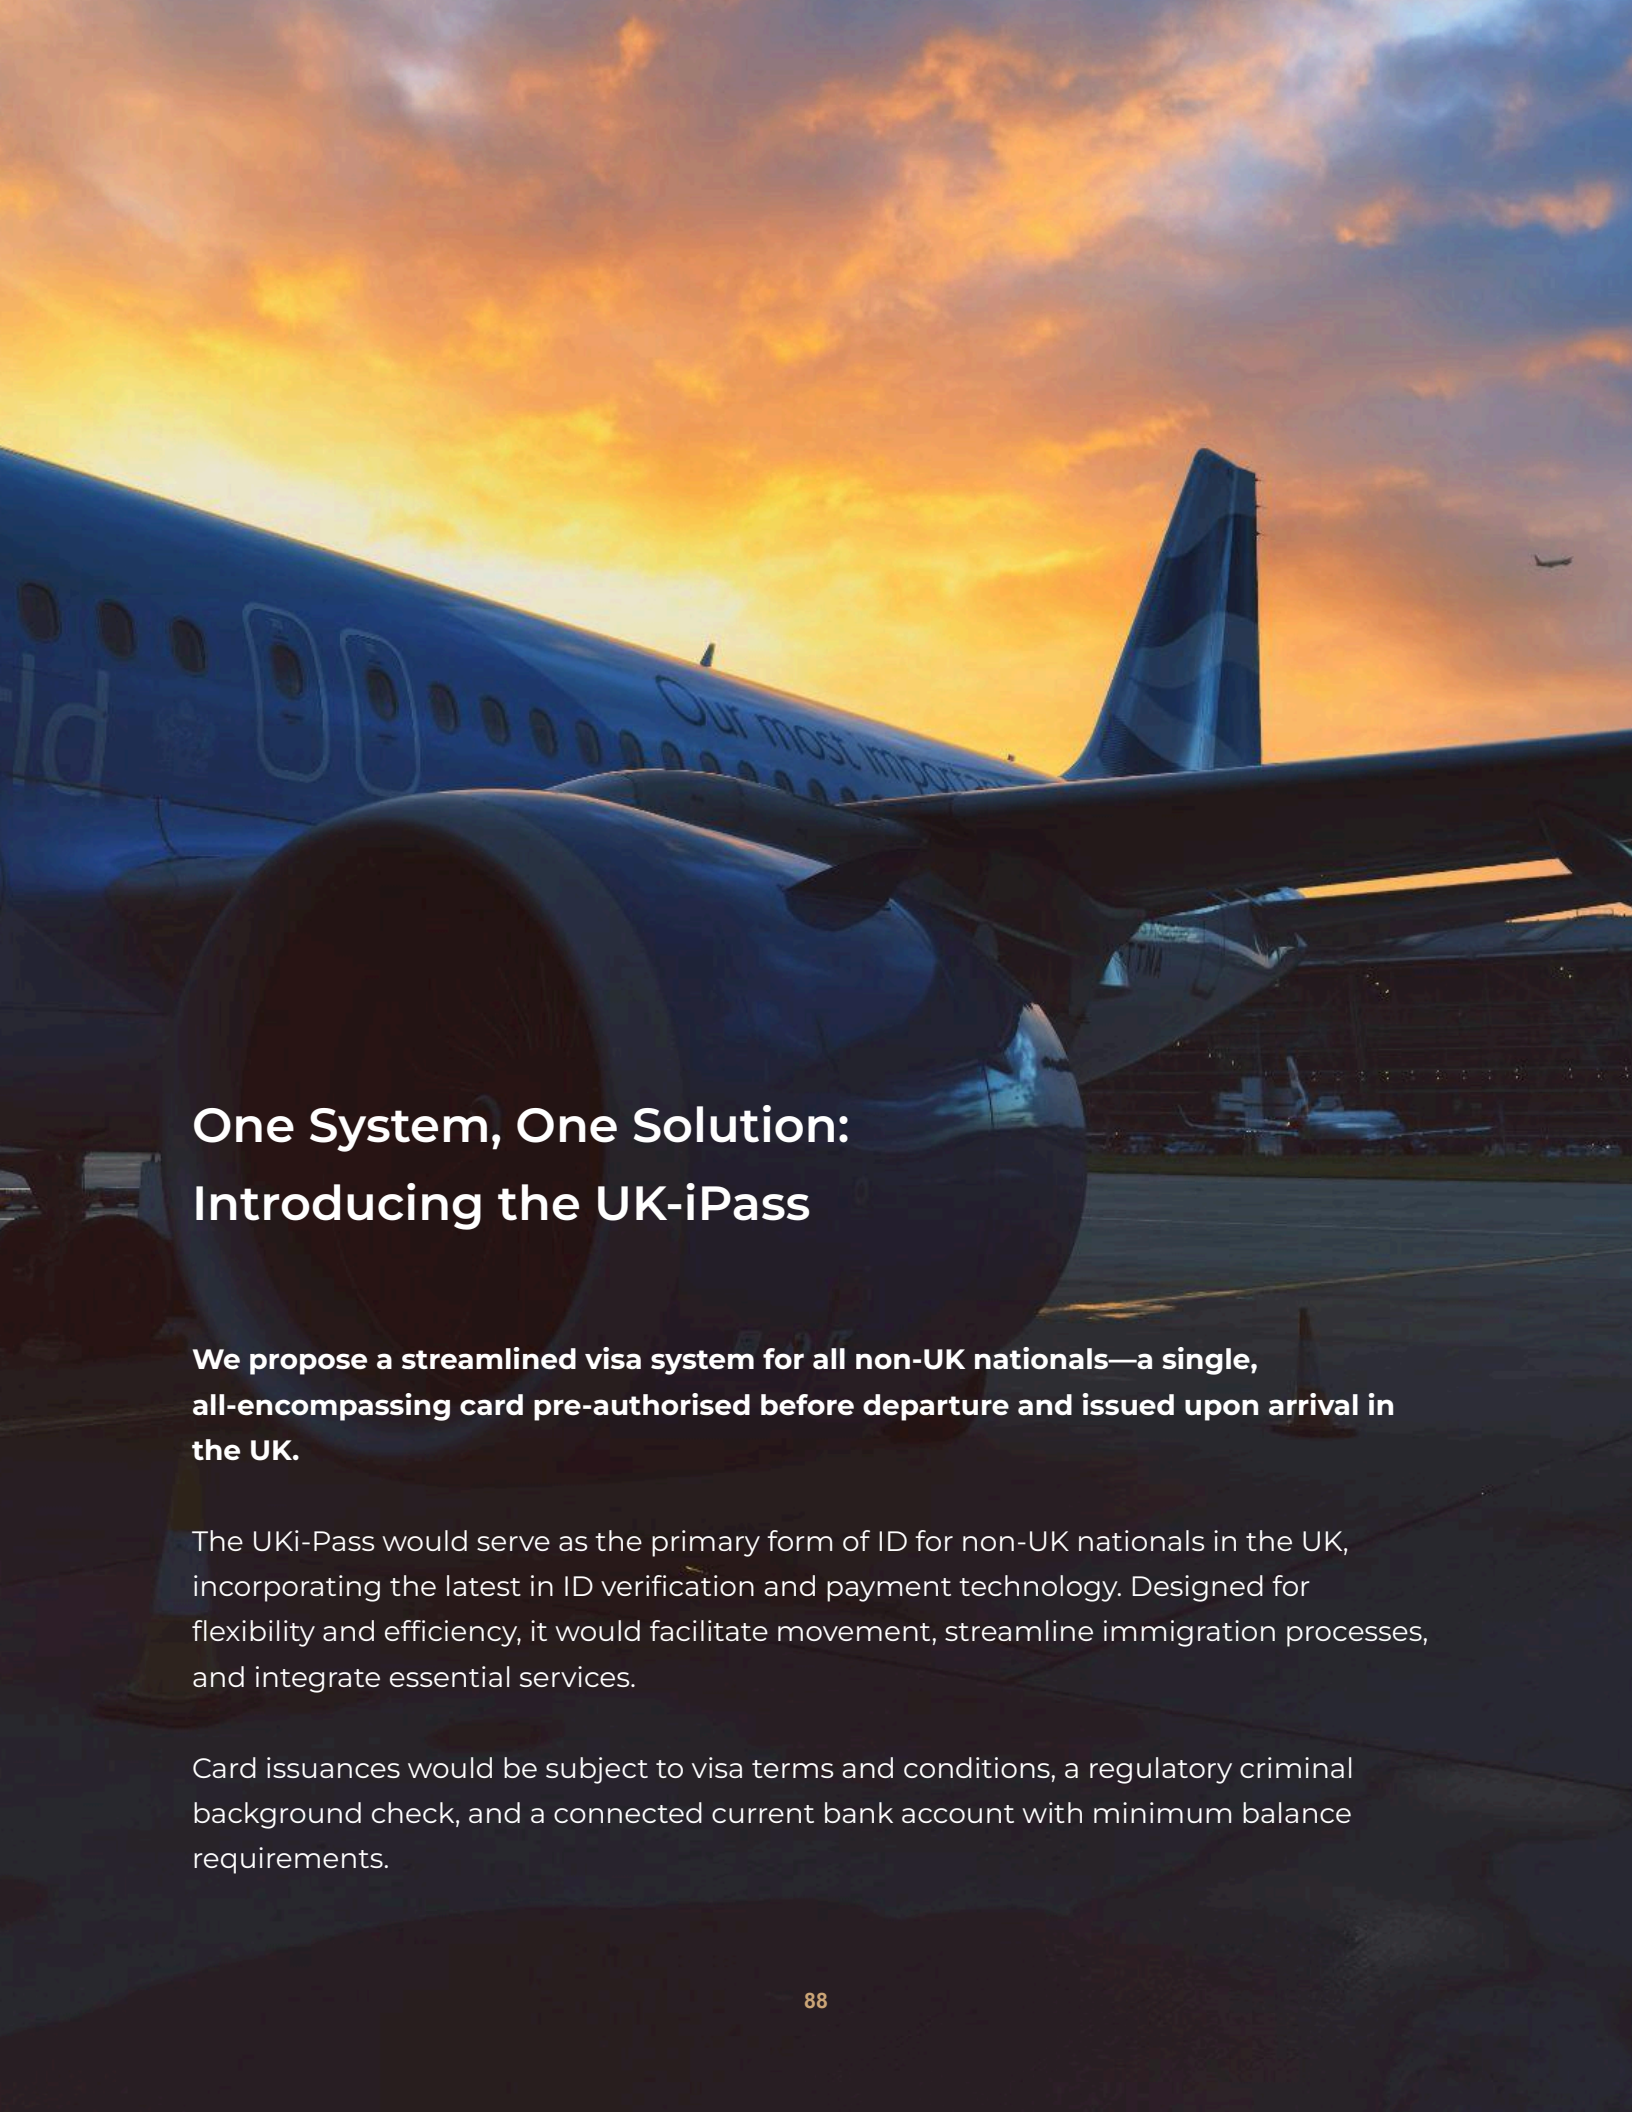

That's because to visit most countries in Europe, foreign tourists need only apply for a single—Schengen—Visa. The UK requires a separate, and more complicated and intrusive form.

Increasing Efficiency And Integrity

Meanwhile, the National Audit Office has identified significant flaws in the UK's visa system, noting that up to 50,000 migrants may have exploited these weaknesses to work in the UK under the guise of student visas.

Source: nao.org.uk

This complexity not only hinders legitimate applicants but also fails to prevent misuse. To address these issues, we must simplify and streamline the visa process, integrating information systems to ensure quick, accurate application processing and easy access when required.

A large blue airplane is parked on a tarmac at sunset. The sky is filled with orange and yellow clouds. The airplane's tail and wing are visible. The text "Our most important" is visible on the side of the fuselage. The engine is in the foreground.

One System, One Solution: Introducing the UK-iPass

We propose a streamlined visa system for all non-UK nationals—a single, all-encompassing card pre-authorised before departure and issued upon arrival in the UK.

The UKi-Pass would serve as the primary form of ID for non-UK nationals in the UK, incorporating the latest in ID verification and payment technology. Designed for flexibility and efficiency, it would facilitate movement, streamline immigration processes, and integrate essential services.

Card issuances would be subject to visa terms and conditions, a regulatory criminal background check, and a connected current bank account with minimum balance requirements.

“The UK-iPass will revolutionise immigration, making our visa system fairer, faster, and future-ready.”

Key Features:

- **Pre-authorised Entry:** Approved before departure, issued upon arrival.
- **Integrated Financial Services:** Linked to a current bank account with a minimum balance requirement.
- **Proof Of Insurance:** Verified for health and travel coverage.
- **Seamless Transactions:** Contactless payments up to £100.
- **Access To Essential Services:** Renting a property, hiring a vehicle, using public transport, and subscribing to service providers.
- **State Support Eligibility:** Secure access to benefits where applicable.

A Unified System For Greater Efficiency

The UK-iPass would consolidate existing documentation into a single smart card, and could even be adopted by UK nationals, potentially replacing:

- Official UK ID Card
- UK Diplomatic ID Card
- CitizenCard
- Biometric Residence Cards and Permits
- Driver's Licence
- National Bus and Rail Cards
- National Insurance Card
- NUS Student Card
- UK Global Healthcare Insurance Card

Connecting these services to an individual's iPass would be optional.

Benefits Of The UK-iPass:

- **Cuts Bureaucracy:** Reduces costs and inefficiencies in visa and document processing and service administration.
- **Prevents Fraud:** Ensures eligibility verification and reduces benefits abuse.
- **Boosts Tourism:** Simplifies entry for all visitors from every country.
- **Enhances Security:** Ensures all visitors carry valid ID at all times.

UK NATIONAL SECURITY & DEFENCE LEAGUE

We pledge to outlaw war, dismantle weapons, and champion global peace through diplomacy, compassion, and understanding, ensuring a harmonious future for all humanity.

Envisioning A World Beyond War

War is the ultimate failure of humanity, a relic of unenlightened times. Those who advocate for, initiate, or participate in acts of war commit profound transgressions against humanity. In a truly civilised society, war has no place; it serves only those intent on suppressing mankind's true potential.

Do You Have The Courage To Embrace Peace?

Engaging in war reflects cowardice and a primitive mindset. True courage lies in fostering peace and prosperity through diplomacy, compassion, patience, and understanding. It requires immeasurable strength of character to resolve conflicts without resorting to violence.

A Visionary Commitment To Non-Violence

As members and supporters of the Visionary Movement, we transcend the concept of war. Those who persist in such practices are adversaries of humanity and the planet. We must, at all costs, prevent their actions.

“Violence in the final vestige of the unenlightened man.”

Outlawing Instruments Of Violence

Under the Visionary Movement, the manufacture, sale, distribution, or use of weapons as tools of control, aggression, or oppression will be strictly prohibited. Violations will result in life imprisonment without the possibility of appeal or parole.

The role of the military industrial complex will be redefined.

Redirecting Defence Efforts Toward Peace

We acknowledge the existence of malevolent forces and will reallocate our defence budget to fortify the UK against potential attacks. Simultaneously, we will engage in global negotiations to repatriate UK troops, dismantle foreign weapons stockpiles, and annul wartime agreements that exploit our nation's resources and financial stability for unwarranted power pursuits.

Learning From The Past, Leading Into The Future

The current generation clinging to power has failed to learn from historical mistakes. It is our responsibility to correct these wrongs and commit to never repeating them.

A Nation Respected, Not Feared Or Detested

We reject the notion of conquering through force, only to live in fear of retaliation or global resentment for acts committed under the guise of 'democracy.'

Demanding True Leadership

Our so-called leaders have demonstrated cowardice, corruption, and unworthiness. We deserve genuine efforts to establish peace agreements worldwide, guided by visionary stewardship and policies that restore the highest values to our society.

A New UK Defence League

By merging the UK Armed Forces and Special Forces, we will create a unified defence structure. Funding previously allocated to interest payments on illegal government loans will support an enhanced Ministry of Defence (MOD), responsible for the nation's security and the oversight of all the all-new UK Defence League.

Revitalising UK Defence Infrastructure

Significant investments in personnel and equipment will equip our forces to defend the UK against those who oppose our peaceful stance.

A Defence Budget Dedicated To Peace

We will not engage in acts of aggression against other nations. By fostering a culture of non-violence, we aim to become a nation of peace. Any attacks against us will only highlight the aggressors' malice against humanity and the planet.

Extending The Olive Branch Globally

Our diplomatic missions will invite all nations to join a reimagined British Commonwealth, sharing in the benefits of enlightened policies, an interest-free state-run currency model, free movement between member states, residency rights, and equal opportunities for all commonwealth citizens.

By embracing these principles, we can build a world where peace prevails, and humanity's true potential is realised.

PUBLIC & EMERGENCY SERVICES

We believe the health and happiness of any society is a direct reflection of leadership competency and of the level and quality of the public services it provides for its citizens.

Universal Public Services: A Fundamental Right

Serving Communities 24 x 7 x 365

Public and emergency services are not mere privileges; they facilitate our work, healthcare, transportation, and environmental stewardship, and shield the most vulnerable among us. They are the backbone of our nation's infrastructure and should serve every community around the clock.

When these essential services are universally accessible, impervious to financial pressures, political sway or weaponisation, individuals are liberated to channel their talents, time, and efforts into making meaningful contributions to society.

We will make access to quality public services a fundamental right, enshrined into UK law, enabling every citizen to thrive and actively participate in building a stronger and more inclusive nation.

Strengthening Society:

Department For Public And Emergency Services

A New Division Of The UK Defence League

The Open Public Services (OPS) program in its current form has failed the British public since its inception.

Operating with a clear focus on the common good, we propose the creation of a dedicated Department for Public Services. Under the direction of the UK Defence League (see page 80), this department will collaborate with local authorities to oversee four essential pillars of a stable and equitable society:

1. **Safeguarding Communities:** Implementing measures to protect citizens and maintain public safety.
2. **Emergency Response:** Coordinating efficient responses to crises and natural disasters.
3. **Enhancing Neighbourhoods, Infrastructure, And Affordable Housing:** Investing in community development and accessible housing solutions.
4. **Promoting Public Health And Well-being:** Advocating for health initiatives and services that improve quality of life.

By uniting these critical services under one entity, we aim to address challenges collectively, fostering a coordinated approach that reduces operational costs and increases efficiency. This integration will strengthen society, benefiting every citizen.

“Refocusing and redirecting funds into solutions that address the root causes of social issues is simply common sense.”

LAW & THE JUSTICE SYSTEM

Laws are created by people who are not intelligent enough to find solutions to problems. We will solve problems, abolishing antiquated and unjust laws.

As regulations and policies pile up, the erosion of respect for the law becomes increasingly evident.

Laws should serve as solutions to societal challenges, ensuring justice and fairness for all. However, some laws are born out of the inability to address problems effectively, or as a response to unjust existing laws. Furthermore, certain laws are intentionally broken to create demand for products or services, perpetuating a cycle that benefits the economy and those in power.

Outdated laws that aim to control without purpose and oppressive measures have no place in a modern justice system. Instead, we must embrace a moral framework that safeguards individual rights, allowing people to lead peaceful lives in alignment with their values.

It Is Time To Rethink Our Approach

We need a new direction that restores faith in our legal system and ensures that every law serves its intended purpose. In the name of synaptocracy, we should have the freedom to live according to our choices. Unfortunately, many laws today restrict our freedoms and limit our rights and liberties.

Together, let's build a framework that commands respect and delivers tangible results for the betterment of our society.

A Comprehensive Re-evaluation Of All UK Laws

A thorough evaluation of the British justice system is essential to identify laws that require immediate revision or removal. The review aims to ensure that our laws align with the principles of fairness, justice, and the overall well-being of our society and the planet.

During this evaluation, we will scrutinise laws that infringe upon an individual's fundamental right to a fair trial by their peers. We will assess the societal impact of legislation, eliminating those that offer little to no benefit to the public and only serve the interests of a select few.

We will address laws that coerce people into unnecessary consumption, protecting citizens from unnecessary financial burdens. Additionally, we will challenge legislation that shields actions detrimental to public health and the environment, prioritising the well-being of our communities.

Outdated laws that no longer hold relevance in our modern society will be carefully examined and updated accordingly. Our goal is to replace oppressive laws with protective measures that empower individuals and uphold their rights.

Lastly, laws that fail to contribute to positive change in public opinion and behaviour will be reassessed, ensuring that our legislation aligns with the aspirations and values of our diverse society.

Through this comprehensive evaluation, we will swiftly retract or redraft any legislation found to fall within these identified categories. Together, we will build a justice system that truly serves the people and safeguards the principles we hold dear.

“An unjust law is itself a species of violence.”

Gandhi

Removing Unwarranted Financial Gain As A Motivation For Legal Action

We will target laws that impose fines or financial penalties without just cause. To promote fairness in the legal system, we propose limiting financial compensation to the actual losses sustained by victims, where such losses can be accurately calculated. For instance, if an individual incurs medical expenses and loses wages due to a fall caused by a faulty step, compensation would cover these specific costs, rather than extending to punitive or speculative damages.

This principle aligns with existing legal frameworks that distinguish between economic and non-economic damages. Economic damages, also known as special damages, compensate for tangible financial losses directly resulting from an incident, such as medical expenses and lost earnings. Non-economic damages, or general damages, address intangible losses like pain and suffering.

By focusing on compensating actual financial losses, we aim to discourage frivolous lawsuits driven by the prospect of excessive financial gain. This approach ensures that victims receive fair restitution without encouraging opportunistic legal actions. Implementing this policy would involve a thorough assessment of each case to accurately determine the victim's financial losses. This ensures that compensation is both fair and reflective of the actual harm suffered, maintaining the integrity of the legal system and upholding the principle of fairness.

Affordable Legal Representation:

Capping Legal Fees

Access to legal representation is a cornerstone of justice, yet high legal fees often place it beyond the reach of many individuals. To address this disparity, we propose implementing a cap on legal fees, ensuring that essential legal services remain affordable and accessible to all. This approach promotes fairness and discourages legal professionals from exasperating legal proceedings for personal, financial gain.

“Educated, privileged lawyers have a professional and moral duty to represent the underrepresented in our society, to ensure that justice exists for all.”

Sonia Sotomayor

Integrating A.I. To Enhance Legal Accessibility

In addition to capping fees, we recognise the transformative potential of artificial intelligence (A.I.) in the legal sector. A.I.-driven platforms can provide timely and cost-effective legal assistance, particularly benefiting those with limited financial means. For instance, A.I. tools can simplify legal documentation, offer immediate answers to legal queries, and guide individuals through complex legal processes.

We pledge to develop and implement A.I.-powered legal assistance programs specifically designed to support individuals who cannot afford traditional legal services. These A.I. systems will offer guidance, draft documents, and provide preliminary advice, ensuring that all citizens have access to essential legal support. By embracing technological advancements, we aim to bridge the justice gap and uphold the principle that legal assistance should be a universal right, not a privilege limited by financial capacity.

Equality Before The Law:

A Call For Accountability

If a hardworking citizen fails to pay their taxes, they could face hefty financial penalties. If a person hurls a racial slur online towards a celebrity they've never met, the consequences could lead to imprisonment. Even stealing a phone to support an addiction can result in jail time.

But what happens to those who bring a nation to its knees and endanger its very existence? They face no consequences. In fact, some of those responsible for crippling our country in 2009 were rewarded with positions as European Parliamentary Advisers and received honorary titles.

This disparity highlights an unspoken hierarchy within our legal system. It's imperative to reform this system to ensure that no one, regardless of status or influence, is above the law.

The people have the power to demand a fair and just system that upholds the principle of equality before the law. We must question whether we want to endorse a system that allows such disparities in accountability or usher in a new system, free of such corruption.

Fighting For Economic Justice

Our economy should not be a game where only a few benefit while the rest suffer. It's time to challenge the destructive nature of our fractional banking system that prioritises profit over people's lives.

Many individuals who have engaged in fraudulent activities or found themselves imprisoned due to financial difficulties did so in pursuit of success within this flawed system.

We believe in second chances and restoring fairness to our society. That is why we advocate for a comprehensive review of financial crime convictions and the release of individuals incarcerated for non-violent offenses related to debt, tax, or similar issues. They deserve a fresh start, free from the burdens of an unjust system.

By granting a full acquittal and early release, we can address the injustices perpetrated by our financial system and enable individuals to rebuild their lives. Together, let's ensure that our economy works for everyone, not just a privileged few.

Under the Visionary Movement, transparency will be paramount, with all evidence and justifications for detaining individuals made public, and all court proceedings aired live, in real time upon request of the accused.

Let us strive for a justice system that empowers individuals and enables them to navigate their personal and professional lives with autonomy and harmony. Support of a system that holds all individuals accountable, regardless of their status. Together, we can build a society where the rule of law applies equally to everyone, ensuring justice for all.

*“Justice without strength is helpless.
Strength without justice is tyrannical.”*

Blaise Pascal

Greenhalgh's Law: Prohibition of Exploitation of Crises and Misfortune for Financial Gain

Introduction:

Recognising the imperative to protect human dignity, animal welfare, and the environment, this legislation seeks to eliminate the exploitation of crises and misfortune for financial gain. It aims to establish a just society where the well-being of all living beings and the preservation of natural resources are paramount.

By fostering a culture that values prevention over profit from adversity, we can inspire individuals and organisations to act with integrity and compassion. This approach not only addresses immediate challenges but also builds resilience and a strong moral foundation within our society.

Explanatory Notes

Greenhalgh's Law aims to create a fair and ethical marketplace by eliminating practices that profit from human suffering, animal exploitation, and environmental harm. By establishing the Ethical Commerce Commission and implementing targeted taxation, the law seeks to incentivise responsible business practices and protect the well-being of all living beings and the planet.

In part, this legislative framework draws inspiration from, and aims to replace, existing UK environmental tax measures, such as the Climate Change Levy and the Plastic Packaging Tax, both of which were sold as a means to encourage businesses to operate in an environmentally friendly manner. However, it is worth noting that the Plastic Packaging Tax has not discouraged businesses to use alternatives to plastic, nor has it resulted in the legalisation of plastic alternatives such as hemp. Instead, it has merely become another stealth tax placed upon the consumer. Additionally, the law aligns with the UK's commitment to achieving net-zero greenhouse gas emissions by 2050, as outlined in the Environmental Improvement Plan 2023.

Section 1: Definitions

1. **Exploitation:** The act of profiting from human or animal suffering, or environmental degradation, through the manufacture, trade, promotion, or provision of products or services.
2. **Crisis:** A significant event or series of events causing widespread distress, hardship, or disruption, including but not limited to natural disasters, pandemics, economic downturns, and conflicts.
3. **Misfortune:** An event or circumstance leading to hardship or adversity, such as accidents, illnesses, or personal tragedies.
4. **Environmental Degradation:** The deterioration of the natural environment through the depletion of resources, destruction of ecosystems, and pollution.

Section 2: Prohibition Of Exploitative Practices

1. It shall be unlawful for any individual, corporation, or entity to manufacture, trade, promote, or provide products or services that profit from human or animal suffering, or environmental degradation.
2. This prohibition extends to all sectors, including but not limited to healthcare, entertainment, finance, and retail.

Section 3: Establishment of Regulatory Bodies

1. A new regulatory body, the Ethical Commerce Commission (ECC), shall be established to oversee and enforce the provisions of this law.
2. The ECC shall have the authority to:
 - a. Monitor and assess products and services for compliance with this law.
 - b. Investigate and prosecute violations.
 - c. Implement educational programs to inform the public and businesses about ethical practices.

Section 4: Taxation And Financial Measures

1. A new tax system shall be implemented targeting products, services, and entities that profit from misery, disaster, or environmental destruction.
2. The tax rates shall be structured as follows:
 - a. High taxes on products and services that exploit crises or environmental degradation.
 - b. Incentives and tax reliefs for businesses adopting sustainable and ethical practices.

Section 5: Transition And Implementation

1. A transition period of 12 months from the enactment of this law shall be provided for businesses to comply with the new regulations.
2. During this period, the ECC shall offer guidance and support to assist businesses in aligning with ethical standards.

Section 6: Enforcement And Penalties

1. Violations of this law shall be subject to penalties, including fines, sanctions, revocation of business licenses and, in severe cases, imprisonment.
2. Penalties shall be proportionate to the severity of the violation and the harm caused to individuals, animals, or the environment.

Section 7: Review And Amendments

1. This law shall be reviewed every five years to assess its effectiveness and make necessary amendments.
2. Public consultations shall be conducted to gather input from stakeholders, including businesses, consumers, and environmental groups.

Section 8: Title

This Act may be cited as "Greenhalgh's Law: Prohibition of Exploitation of Crises and Misfortune for Personal Gain."

By enacting Greenhalgh's Law, the UK will set a precedent for ethical governance, ensuring that economic activities contribute positively to society and the environment, rather than perpetuate a recipe for disaster, misery, and suffering.

CRIME & POLICING

We don't believe tackling crime is about creating more rules or taking away people's rights and freedoms. **Real crime prevention** means understanding why people turn to crime in the first place and tackling those problems head-on.

A Crime-Free Society:

The Outcome Of Visionary Stewardship

Crime rates in the UK have historically been linked to unemployment and economic crises. Many individuals classified as criminals often commit offenses in response to these challenges. What society defines as crime, some may view as a means of survival. This is because, when money, opportunity, and a sense of hope are scarce, people often feel that crime is the only answer. And often without a solid education or happy childhood, the chances of turning to a life of crime become ever greater.

We regard every crime as a failure of current leadership and policy. The persistence of societal issues and rising crime statistics reflect a lack of effective governance and a failure to address underlying problems. Some would even argue this is done intentionally to perpetuate a totalitarian police state and justify ever-growing budget allocations for despotic authoritarian measures.

Prevention Rather Than Cure:

Addressing The Root Cause Of The Problem

The need to address the issue of crime never goes away and over the years we have seen it invade our schools and homes to a staggering degree. We can stop this self-destructive cycle by fulfilling our promises; by investing in the things that really matter, by managing our economy sensibly, by improving everyone's standard of living and by giving everyone the opportunities and support they need to achieve their life goals and ambitions.

If we are to significantly reduce crime we must turn to the root of the problem and put preventative measures in place. To ultimately eradicate crime, we must completely eliminate the reasons people turn to crime to begin with. We will begin to avert any further social and economic crises simply by providing people with a secure home and safe community in which to live.

“Eradicate the causes of crime and you eradicate crime.”

To address these issues, we propose:

- **Better Education:** Made freely available to everyone, without exception.
- **Economic Empowerment:** Implement policies that create employment and alleviate economic hardships—the root cause of crime.
- **Reformative Justice:** Shift focus from punitive measures to rehabilitation and reintegration, reducing recidivism and fostering societal harmony.
- **Comprehensive Social Programs:** Invest in counselling and mental health services, interventions, and community development to provide support and opportunities for all citizens.
- **Opportunities For Young People:** Invest in reintroducing sports and arts activities, youth programmes, apprenticeships, summer camps, further education, vocational learning, and mentorships.

By adopting these strategies, we aim to create a society where crime is not a response to unmet needs but a rare occurrence, reflecting the success of visionary stewardship and effective policy.

Transforming UK Policing:

A Vision For Integrity, Unity, And Community Trust

To address pressing issues within UK policing, we propose a comprehensive reform strategy focusing on recruitment, integrity, structural consolidation, authority reassessment, and community relations.

Recruiting The Right Candidates

We aim to attract individuals who embody the qualities of peacemakers, diplomats, and those with a genuine commitment to public service. To achieve this, we will implement comprehensive psychological assessments for all applicants and existing officers. These evaluations will assess candidates' mental resilience, emotional intelligence, and capacity for empathy, ensuring they are equipped to handle the complexities of modern policing.

While the Myers-Briggs Type Indicator (MBTI) is a widely used tool for understanding personality types, its application in police recruitment is limited. More commonly, psychological evaluations focus on assessing candidates' ability to cope with stress and their overall mental fitness for the demands of law enforcement.

Eradicating Corruption

We are committed to eliminating corruption within the police force. Only individuals of the highest moral standing will be entrusted with the responsibility of upholding the law. This entails rigorous vetting processes, continuous monitoring, and a culture that promotes transparency and accountability. The Angiolini Inquiry has highlighted the need for enhanced vetting and aftercare to maintain public trust.

Source angiolini.independent-inquiry.uk

Unifying The Police Force

To enhance efficiency and resource allocation, we propose consolidating the existing fragmented forces into a single national police force. Furthermore, integrating the UK's police force under the British Army's remit, including funding, aims to enhance efficiency and accountability through shared resources. This consolidation seeks to streamline operations, reduce administrative overhead, and foster a unified command structure, ultimately improving public safety and trust.

This unification aims to reduce administrative costs, streamline processes, and improve coordination in combating crime. The new structure will consist of one UK Commissioner, four Deputy Commissioners, and 48 regional Chief Constables, ensuring both national oversight and regional representation. Discussions around police force mergers have been ongoing, with considerations of improved efficiency and service delivery.

Re-evaluating Police Powers

We will implement a policy where officers must establish solid cause before taking action, including stop and search procedures. Once justified, officers will be granted the necessary authority to apprehend and detain individuals. This approach balances civil liberties with effective law enforcement, ensuring actions are justified and proportionate.

Fostering A New Policing Mentality

Our goal is to cultivate a police force that communities welcome and trust. Officers will be retrained to embrace the principles of 'serve and protect,' emphasising their duty to all citizens—not just those in positions of power or influence, who often hide behind their titles to avoid the scrutiny of the law.

By addressing the root causes of social unrest through effective governance, we anticipate a significant reduction in riots and demonstrations. As crime rates decline overall, the role of the police will evolve towards guardianship and stewardship. Integrating police and army training will allow personnel to transition between roles as needed, enhancing flexibility and operational effectiveness.

Through these reforms, we aim to build a policing system that embodies integrity, unity, and a steadfast commitment to serving the public.

*“There is a crisis of public morality.
Instead of policing bedrooms, we ought to be
doing a better job policing boardrooms.”*

Robert Reich

LOCAL AUTHORITIES

We envision a future where Local Authorities are at the forefront of community development, empowered to drive positive change and shape our nation's policies and infrastructure, free from budgetary constraints.

Streamlining Efficiency:

A Unified Software Solution For Local Authorities

Over the years, collaboration with many of the UK's 153 Local Authorities has revealed a significant obstacle to operational efficiency: the disparate array of software systems employed across departments. Currently, each Local Authority utilises a unique combination of software for Accounting, Customer Relationship Management (CRM), Content Management (CMS), Marketing & Communications, Timekeeping, and Scheduling.

We propose a transition to a unified software system for all Local Authorities.

This standardisation aims to enhance efficiency, reduce costs, and foster better collaboration across regions. By adopting a single, integrated platform, Local Authorities can streamline processes, improve data sharing, and ultimately deliver more consistent and effective services to the public in a fraction of the time, and with minimal effort and error.

Empowering People to Self-Govern: Introducing General Public Committees (GPC's)

Take Control Of Your Life:

Join Your Local GPC

We believe in the power of the people to shape their communities and hold their councils accountable. That's why we propose the establishment of a General Public Committee (GPC) in every borough, inviting members of the public to actively participate in local governance.

Members of the public would be invited to join the GPC for their respective borough.

Each committee would be responsible for ensuring their councils are fulfilling their duties, that budgets are being spent appropriately, and that there is no conflict of interest when it comes to development, investment, or planning.

Committees would also be responsible for handling any and all complaints made against their Local Authority and its members.

As a GPC member, you will have a crucial role in ensuring transparency, fairness, and effectiveness in your council's operations. Each GPC will diligently oversee the responsible allocation of budgets, preventing conflicts of interest in development, investment, and planning decisions.

Improved Complaints Procedures

Moreover, each GPC will be the platform for addressing any grievances or complaints against the Local Authority and its members. Your voice will be heard, and your concerns will be taken seriously and addressed quickly and competently.

Together, we can build a future where local voices have a significant impact on national policies, and where the power to shape our collective future lies in the hands of those who understand the unique needs and aspirations of each locality.

Openness and Responsibility:

Full Transparency and Accountability

We believe local authorities should be accountable to the residents and businesses under its remit. To ensure transparency and uphold the highest standards of accountability, we propose a system of full disclosure and public access.

Under our plan, all complaints received by the General Public Committee (GPC) will be promptly and openly published on the respective Local Authority's website in real time. This ensures that every member of the community has visibility into the concerns raised and the actions taken to address them. Moreover, the decisions and actions of the GPC will be made fully public, providing citizens with an opportunity to understand and evaluate the process by which local governance operates.

We believe in an open and transparent government that is accountable to you, the people. Together, let's create a system that promotes trust, integrity, and active participation, fostering a stronger and more inclusive democracy for all.

Local Authorities Responsibilities:

- Environmental health
- Housing, planning, and development
- Leisure and recreation
- Local social and healthcare services, in partnership with the NVN (Pg.97)
- Public transport

Working as part of a national consultancy group, Local Authority would oversee:

- Energy and utilities
- Learning hubs
- Social policy
- Waste management

In partnership with the UK Defence League, Local Authorities would help tackle:

- crime prevention
- emergency planning
- highways and traffic

Read more on **National Defence League Policy** [Page 90](#).

No More Cuts:

Protecting And Improving Public Services

Our public services are the backbone of our society, providing essential support and care to all citizens. Yet, we have witnessed a concerning trend of budget cuts that threaten the very fabric of our communities, while council leaders take home up to £650,000 a year.

It's time to question the priorities of our leaders. If we can allocate billions to interest repayments and extravagant ceremonies, why are our public services bearing the brunt of austerity measures? It's not a matter of affordability but rather the mismanagement of public funds—yet again.

A New Approach

We believe in a different approach—one that prioritises the well-being and needs of our people. We will fight against further cuts to public services and ensure that every pound is spent wisely and effectively. Together, we can build a future where our public services receive the investment they deserve, providing the support and opportunities our communities need to thrive.

To ensure efficient governance and effective service delivery, local authorities and GPC's will collaborate closely with a new Department for Public Services.

Any misappropriation of public funds will be dealt with swiftly. Council leaders will be stripped of office, lose all benefits, and replaced with immediate effect.

Safeguarding The Public Purse

We are committed to ensuring that suppliers to the public sector adhere to fair pricing practices. Products and services must not be priced higher simply because they are funded by the state. To prevent such exploitation, we will implement stringent oversight measures and maintain a blacklist of any providers attempting to overcharge or defraud the public sector.

This initiative aims to uphold the integrity of public procurement and ensure value for money for taxpayers.

HEALTHCARE (NHS)

We will overhaul the National Health Service (NHS), dismantling the corrupt pharmaceutical industry's stranglehold that prioritises profit over patient well-being. By exposing and eliminating the pervasive influence of these corporate criminals, we will reduce dependency on their harmful products. Instead, we will champion suppressed natural and holistic remedies, empowering individuals to take back control of their health and break free from Big Pharma's manipulative grasp.

Image by Alexander Gray

Setting New Standards:

Building A World-Class Preventative Healthcare System

True Healthcare means caring for people's health in order to *prevent* illness and prolong life. The current health system—and much of the medical profession—relies on illness in order to thrive, thus incentivising negligence, misdiagnosis, and harmful behaviour that might prove profitable to those selling the 'cures'.

Under Visionary stewardship, public healthcare funding would only be granted to those offering preventative care, fitness and therapy products and services, organic nutrition, and wellness education.

Commercial opportunities would continue to be created through preventative products and services, thus incentivising industry to support the genuine well-being of the population rather than perpetuating illness and disease.

Healthcare Is A Basic Human Right

To oppose this principle is to suggest that a sick person who has no money should be left to suffer and die. Only the most repugnant individuals would allow this.

Two key factors hugely influence the healthcare industry and the laws that govern it presently, namely:

1. the massive profits earned from selling healthcare services, equipment, insurance, vaccines and medicines, and
2. the political control that can be exercised over people by using the fear of disease and death against them.

We consider polluting the very world we rely on as our life support system a crime against humanity. To then take away our basic freedoms, suppress natural and holistic remedies, and levy extortionate insurance premiums and medical bills on the promise that doctors will cure us of the ailments their financiers created through malicious intent and neglect is absolutely unforgivable. Those responsible for perpetuating these crimes against us will be held to account. Furthermore, "Greenhalgh's Law" would prevent any company or individual from profiting from the sale of any kind of medication, cure or remedy that produced harmful side-effects.

Read more on **Greenhalgh Law** [Page 100](#).

Revitalising Healthcare:

Empowering Doctors Beyond Pharmaceuticals

To transform our healthcare system into one that prioritises prevention and holistic well-being, we will collaborate closely with the medical community to re-educate professionals on non-pharmaceutical approaches to treatment. This initiative aims to reduce dependency on the pharmaceutical industry and revive suppressed medical knowledge, empowering healthcare providers to explore and implement alternative therapies accessible to all.

Educational Integration

We will develop comprehensive training programs for medical professionals, focusing on evidence-based natural therapies such as light therapy, frequency therapy, and the use of natural herbs and oils. Incorporating these modalities into medical curricula will equip practitioners with a broader spectrum of treatment options. Studies have shown that educating healthcare providers about complementary and alternative medicine (CAM) enhances their ability to integrate these therapies into practice effectively.

Unearthing Suppressed Knowledge

By establishing research initiatives dedicated to investigating historically overlooked or suppressed treatments, we aim to validate and reintroduce effective natural remedies into mainstream healthcare. This includes revisiting therapies like photodynamic therapy, which has shown promise in treating certain skin conditions.

Patient-Centered Care

By broadening treatment options beyond pharmaceuticals, healthcare providers can offer personalised care plans that align with patients' preferences and cultural beliefs. This approach not only respects individual autonomy but also enhances treatment adherence and outcomes.

Through these collaborative efforts, we aim to cultivate a healthcare environment that values prevention, embraces holistic treatments, and diminishes reliance on pharmaceutical interventions, ultimately fostering a healthier society.

Empowering Medical Professionals

We will create platforms for continuous professional development, allowing doctors to stay informed about advancements in alternative treatments. Workshops, seminars, and conferences will facilitate knowledge exchange and encourage the adoption of holistic practices. Emphasising an integrative approach, where conventional medicine collaborates with alternative therapies, can lead to more comprehensive patient care.

Support Services For Doctors In Distress

Addressing physician mental health is crucial, as many face barriers such as confidentiality concerns and fear of negative repercussions, which deter them from seeking help.

Recognising the profound psychological distress experienced by medical professionals who, upon reflection, acknowledge the detrimental impact of their reliance on pharmaceutical interventions, we are committed to providing comprehensive mental health support and suicide prevention services. These services will offer a confidential environment where affected doctors can process their experiences, receive counselling, and access peer support networks to facilitate healing and professional reintegration.

Licence Revocations For Persistent Offenders

Conversely, medical practitioners who persist in endorsing and perpetuating unethical pharmaceutical practices, thereby compromising patient welfare, will face stringent professional scrutiny. Such individuals may encounter significant restrictions on their medical practice, including the potential revocation of their licences, to uphold the integrity of healthcare delivery and ensure patient safety. Unethical drug promotion poses risks to patient health, underscoring the need for strict enforcement to maintain public trust in the medical profession.

By implementing these measures, we aim to foster a healthcare environment that supports ethical medical practice, prioritises patient well-being, and provides necessary assistance to practitioners confronting the moral implications of their past actions.

Prevention Is Better Than Cure

Being overweight, a lack of exercise, poor diet, and excessive consumption of drugs and alcohol, shortens life expectancy, exposes us to a greater risk of illness and infection, and costs the NHS over £6 billion a year.

We can't force people to join a gym, but we can make sure that the support they need is available and that they are not exposed to poor quality food or unnecessary health risks.

We will achieve this in two key areas.

1. A National Network Of Lifestyle And Fitness Venues

We believe sports and recreation venues, and accredited influencers can provide the people of Britain with accessible and affordable, year-round fitness facilities and activities.

Sports venues up and down the country hold the key to providing the people of Britain with accessible and affordable year-round activities that will help them improve their physical and mental well-being and maintain an optimum level of overall health and fitness.

Subsidised by the **Vicontenate**, a national network of free lifestyle and fitness venues will open up a range of facilities and classes to support today's diverse and alternative lifestyle choices. By providing free access to sports activities, preventative therapies and other proven treatments, we will help people conquer their addictions and health-harming habits.

Venues would form part of an upgraded National Health & Social Care Service that would integrate:

- Existing national health services
- Gym and leisure facilities
- Medications and prescriptions
- Organic food outlets supplied by inner-city Skyscraper Farms
- Counselling, advisory and support services
- Members of the national volunteers network
- Lifestyle management support

2. Reducing Processed Food In The Food Chain

Reducing the prevalence of processed foods in our food chain is essential for improving public health and decreasing the burden on the NHS. Diets high in ultra-processed foods have been linked to an increased risk of health conditions such as obesity, type 2 diabetes, and heart disease.

Source [nhs.uk](https://www.nhs.uk)

To address this issue, we propose the following strategies:

- **Incentivising Healthy Eating:**
 - Introduce higher taxes on processed food manufacturers and fast food outlets.
 - Offer subsidies or tax incentives for businesses that produce or sell natural and organic foods.
 - Implement pricing strategies that make healthier food choices more economically attractive to consumers.
- **Implementing Stricter Regulations On Processed Foods:**
 - Introduce tobacco-style labeling requirements to inform consumers about the levels of processing and additives in food products.
 - Set strict limits on harmful ingredients, such as trans fats and excessive sugars, commonly found in processed foods.
 - Place 18+ age restrictions on processed and fast foods.
- **Promoting Access To Whole And Minimally Processed Foods:**
 - Support local farmers and markets to increase the availability of fresh produce in both urban and rural areas.
 - Encourage retailers to stock affordable, minimally processed food options.
- **Educational Campaigns:**
 - Launch public health campaigns to raise awareness about the risks associated with processed food consumption and the benefits of a whole-food-based diet.
 - Provide resources and workshops on meal planning and preparation using unprocessed ingredients.

By enacting these measures, we aim to reduce the consumption of processed foods, thereby improving the nation's health and alleviating the financial strain on our healthcare system.

Tackling Substance Misuse

Asking Difficult Questions:

Dealing With Difficult Answers

What drives individuals into the destructive grip of addiction? What compels them to seek solace in substances? We must recognise that not all addicts are criminals; they are victims of a society that has been shattered, where economic disparities and an unjust system prevail.

*“Address the need for substance use
and you will reduce dependency.”*

We will do more to help and protect people by legalising and controlling recreational drugs, than we will by creating a black market that funds crime, or depriving addicts of the care and support they need.

Ending The Cycle Of Addiction:

A Path To Hope And Real Opportunities

It is crucial to acknowledge that addiction doesn't solely stem from illegal drugs. Many become ensnared by readily available substances sold online or over the counter.

To address the complex issue of substance misuse, we must confront the uncomfortable truth: we contribute to the dependency of those who have been cast aside by an unforgiving world, those who reject playing by its cruel rules.

The profitable nature of addiction feeds on corporate greed and political interests, often exploiting these crises for personal gain and electoral victories. The incentive to solve the problem is lacking when it serves multiple agendas and generates substantial profits.

Creating A Positive Environment

To foster a harmonious society where individuals can experience genuine happiness, we need to cultivate a world that offers the joy and fulfilment they seek without resorting to synthetic and life-threatening means.

By restoring balance to our justice system and lifting everyone out of poverty through fair wealth redistribution and resource allocation, we can forge tangible opportunities for those in need. By giving them hope and a renewed sense of purpose, we can break the chains of substance dependency and addiction.

Together, let's put an end to the cycle of addiction, offering a pathway to a brighter future filled with real opportunities for all. Addressing the root causes of substance misuse means we can build a society where hope triumphs over despair and where no one is left behind.

Image by Spacedezert

SOCIAL CARE

Your independence and well-being should never be compromised. Under Visionary stewardship, social care would be a basic human right afforded to everyone in the UK as and when they needed it.

We Care:

A Future We Can All Look Forward To

Combining Healthcare, Social Care, And Third Sector Services

The state of the mind and the state of the body; these two things lie at the core of our healthcare and social care systems. One attempts to help us preserve our physical health, whilst the other attempts to help us develop and sustain social skills and independence. Social care and healthcare are intrinsically linked but for many decades have been administered separately. It's only been in recent years that the two departments have openly discussed integration as a means of reducing costs and boosting competences. That integration must not only continue but also be accelerated, by centralising healthcare and social care departments and providing easy access to information and support services in city centres, high-streets and rural areas.

Simply by streamlining and integrating existing services, we will improve efficiencies and reduce costs exponentially.

Introducing:

A New, National Volunteers Network

Both our healthcare and social care systems are supported by a nation of volunteers, charities, community centres, advisory services, and support groups. Without that additional resource a crucial component of our nation's infrastructure would collapse.

But that may well happen if we don't prepare; as the population continues to grow, people live longer and the demand for those services increases. We must act now in establishing a stable system that delivers quality services as a direct result of streamlining working processes, reducing operational costs, and increasing efficiencies across the board.

We propose the merging of all health authority departments and registered third sector health and welfare organisations to roll out a new Social Care System; a system that would utilise a single platform to manage and operate all public health services and enable greater knowledge sharing and communication across the UK.

The National Volunteers Network (NVN)

The NVN would be open to all non-profit organisations, charities and community groups and their members.

By registering, organisations would have the opportunity to offload assets in exchange for access to operational facilities and healthcare resources that would better help their volunteers to serve their communities.

Not only that, but donations and funds—raised through the sale of assets—would go further, and more people would receive the help they so desperately needed.

Each NVN county division would fall under the remit of their respective local authorities.

The NVN Would Utilise:

- National Health Service (NHS) hospitals, GP practices, and dental clinics
- Local authority town halls and offices
- Council housing
- Libraries
- Community centres
- Vacant or under-utilised council buildings
- Vacant and derelict shops, homes, and warehouses

Benefits:

Enhanced Service Delivery: By integrating opt-in third sector organisations, healthcare charities, and the National Health Service, we can help more people in less time. Leveraging existing facilities such as NHS hospitals, GP practices, dental clinics, and community centers also allows for the efficient provision of services without the need for new infrastructure. This approach also ensures that resources are utilised effectively, leading to improved access and quality of services.

Economic Revitalisation: Transforming vacant and derelict properties into functional spaces will stimulate local economies. For example, adaptive reuse of commercial real estate has been shown to increase property values and attract businesses, thereby boosting local tax revenues.

Environmental Sustainability: Repurposing existing buildings reduces the environmental impact associated with new construction, including the consumption of resources and energy. It will also result in long-term cost savings through energy and water efficiency and improve the appearance of our high streets.

Cost Savings From Adaptive Reuse: Repurposing vacant properties can lead to significant cost savings. For instance, a study on supportive housing found that providing housing to chronically homeless individuals resulted in a net savings of nearly £30,000 per person per year in publicly funded services.

Public Infrastructure Savings: Implementing sustainable practices in public buildings can result in annual savings of approximately £3.7 billion through a 20% improvement in energy efficiency.

LIFE ESSENTIALS

DID YOU KNOW?

21% of the UK's population—around 14.3 million people—are living in poverty. This includes 8.1 million working-age adults and 1.9 million pensioners. Most appalling, 30% of all children (4.3 million) are included in that figure.

Source jrf.org.uk

Building A Fairer Future For All: Challenging The Ills Of Capitalism

In a so-called civilised society, it is unjustifiable that over 20% of our people endure the grip of poverty. Poverty breeds despair and fuels a rise in crime and anti-social behaviour. Problems that our current use to justify exorbitant military budgets and draconian surveillance.

We must confront the root causes of this social and economic exclusion, which lie within the flawed foundations of capitalism and an inequitable fractional banking system. Together, we can pave the way to a more equitable society.

“The profit motive of a capitalist society, in conjunction with competition among capitalists, leads to unnecessary cycles of booms and depressions, and ultimately encourages selfishness instead of cooperation.”

Albert Einstein

Introducing:

The LifEssentials Initiative

Empowering Every Individual:

Technology has revolutionised our lives, offering time-saving conveniences, cost reductions, and improved well-being.

The Visionary LifEssentials Initiative ensures social inclusion and independence through the provision of essentials that foster efficiency and empowerment.

- From birth, access to a UK current banking and savings account
- From birth, annual medical check-ups
- From age 5, annual sight tests
- From age 8, annual dental check-ups
- At 16, a smartphone or optional upgrade
- At 16, a hybrid bicycle
- Up to 18, free public transport
- At 21, driving courses (up to 45 hours) including one practical and theory test

One Membership Covers It All

With a single, optional membership, everyone would have unlimited access to:

- National Lifestyle & Fitness Centres
- National Vocational Learning Academies (NVLA)
- Driving course, including first practical and theory tests
- Current and Savings Accounts
- Smartphone (or an optional upgrade at 16)
- Annual medical check (including dental, sight, and hearing)
- Comprehensive healthcare until earning more than £37,430*

*UK national average, 2024

RETIREMENT, PENSIONS & OLDER PEOPLE

We pledge to establish a new state pension model, initiating a fund for every citizen from birth, ensuring financial security and healthcare from retirement until life's end.

A New Pension Model

Old Age In The Modern Age

A steadily ageing population, combined with longevity and a greater demand for care services means that the UK will continue to come under tremendous pressure to support a growing community of older people. That community will one day include all of us; you and I, our children and theirs. No one can avoid old age, but we can avoid the trauma and discomfort so many old people suffer today because we as a society refuse to provide adequate care and security.

That kind of security depends on our early incentive to start saving as soon as possible, but it's often something we put off or ignore altogether. For most of us however, the reason is simply because we are never left with enough money to invest in a pension, when the small amount we can spare makes such a big difference to the immediate future. Choosing between food on the table today or a roof over our head in forty years time is not a concern we should ever have to live with. Especially when we pay into a system that was set up to do one simple thing: Provide.

If there's one thing we all know, it's that—when it's not being raided by corrupt politicians—the current state pension is insufficient to support an elderly person in the modern world. It's not because there is insufficient money in the system, it's because public money is misspent by the government, leaving people like you to pick up the tab.

Financial Security In Old Age

Under Visionary stewardship, you will have a pension, acquired and grown from the day you're born, that guarantees an income and healthcare from retirement until the day you leave us.

*“A pension is not just a number,
it's a promise of security and freedom
to enjoy the fruits of your labor in retirement.”*

Under The Proposed New System:

The new state pension model will see every citizen given a 100% guaranteed and protected pension fund from the day they are born that will pay out a minimum income from the day they retire.

- The pension age will be set at 62 for men and women.
- A state pension account will be opened for everyone from the day they are born, provided the birth is registered.
- Every month, each parent would pay a compulsory minimum contribution of 2% of their salary or into each pension fund.
- At the end of each calendar year, the state would match contributions made.
- Contributions would be held in a secure national savings account — guaranteed and protected, but earning no interest.
- From the age of 21, and upon entering part or full-time employment, account holders would inherit their state pension account.
- Upon inheriting the account, they would be given the option to use up to 50% for investment. This would include property, shares, or **Vicontenate** Bonds.
- The remaining balance would be locked until retirement.
- Account holders would be required to maintain monthly contributions in order to receive matching state contributions.
- Minimum contributions would rise to 10% on inheritance and would remain fixed until retirement.
- Optionally, larger contributions could be made and the state would continue to match up to 25% of each contribution above the 10% base rate.
- Upon retirement, account holders could opt for a single sum or fixed monthly payments.
- Monthly pensions payments would be made in addition to any form of UBI (Universal Basic Income).

*“Don't simply retire from something;
have something to retire to.”*

Harry Emerson Fosdick

The 21st Century Pensioner

For people paying into this system for the first time there will be no state pension fund to inherit on retirement. We would therefore propose a pro-rata contribution is made by the state to everyone in the UK whose year of birth falls within an elected period.

Based on the national averages at the time of implementation, the contribution made would be equal to the amount each person would have received had the system been in place when they were born.

Introducing this change immediately will give us an opportunity to learn important lessons now, rather than in a generations' time.

This structured approach ensures that from birth, individuals have a secured financial foundation, bolstered by both parental and state contributions, leading to substantial financial security upon retirement.

UK state pension funds would be made available in addition to the UK state UBI (Universal Basic Income).

Case Study:

A Single Parent Family

Under the proposed new pension system, let's examine the scenario for a single-parent family with a below-average annual income of £28,000:

Parental Contributions:

- Annual Contribution: 2% of £28,000 equates to £560 per year.

State Matching Contributions:

- Annual Match: The state matches the parent's annual contribution of £560.
- Total Annual Contribution: Combining both contributions is £1,120 per year.

Total Contributions Over 18 Years:

- Over 18 years, the fund accumulates £20,160.

Inheritance of Pension Account:

- Upon entering employment at age 21, the individual inherits their pension account, which has accumulated £20,160.

Investment Option:

- Available for Investment: The individual can opt to use up to 50% of the fund, which is £10,080, for investments such as a home deposit, shares, or **Vicotenate** bonds.

Continued Contributions Post-Inheritance:

- Assumed Annual Salary: Upon employment, the individual earns the average UK salary, which was £34,963 for full-time employees in 2023.
Source ons.gov.uk
- Contributing 10% of this salary equates to £3,496.30 per year.
- State Matching Contribution: Assuming the state matches 25% of the individual's contribution, this adds £874.08 annually.
- Total Annual Contribution: The combined annual contribution is £4,370.38.

Total Contributions Over 41 Years (Ages 21 to 62):

- Accumulated Contributions: Over 41 years, the total contributions amount to £179,195.58.

Total Pension Fund at Retirement (Age 62):

- Final Pension Fund: Adding the initial inheritance of £20,160 to the accumulated contributions results in a total pension fund of £199,355.58.

HOUSING & CONSTRUCTION

We will raise housing standards, slash ownership costs, and end the grotesque contradiction of rising homelessness in a country lined with empty, decaying properties.

Transforming The Housing System

The quality of our living spaces directly impacts our mental and physical wellbeing. This includes the homes we build, the spaces we shape, and the environments we inhabit.

Superior Standards

New planning laws will introduce minimum standards for room size, ceiling height, and architectural design — rejecting cramped, profit-driven layouts in favour of intelligent, health-affirming spaces that allow energy to flow.

Modern, Planet-Friendly Materials

Hemp will be legalised and elevated — establishing Britain as a global leader in the production of eco-conscious materials, from breathable hempcrete and thermal cladding to low-VOC paints, insulation, wall panels, and structural composites.

Read more on **Environment Policy** [Page 73](#).

Future-Proof Homes

Modern homes will be beautiful, functional, and self-sustaining. All new-builds will be fitted with silent wind turbines, battery storage systems, and geothermal piping to reduce dependence on fossil fuels and centralised energy monopolies. Water independence will be encouraged through potable water tanks and underground collection systems.

Better Planning

We will outlaw the banality of modern urban design. Beauty, individuality, and bio-integrated architecture will be brought to the fore. Planning regulations will reward innovation over repetition.

Off-road driveway turntables will become standard for all new homes with vehicle access — reducing accidents and street congestion. Homeowners will be eligible for grants to retrofit these via the new Highway Commission.

Read more on **Highways Policy** [Page 100](#).

Ending Homeless Hypocrisy

Britain is awash with unused homes—nearly 1 million vacant dwellings in England alone, with approximately 272,000 long-term empties not lived in for more than six months.* Meanwhile, 1.2 million people are on council housing lists, and rising homelessness haunts our streets and public spaces..**

This grotesque paradox—empty homes standing while people sleep rough—is a moral and tactical failure we will fix. The time to act is now. There are more than enough empty homes to end homelessness **overnight**.

International Covenant on Economic, Social & Cultural Rights

The UN recognises the right to adequate housing as fundamental. Though not yet legally binding in UK courts, it must guide our moral and political will.

Reclaiming The Empty To House The Homeless.

Under the Housing Act 2004, local authorities have the power to deploy Empty Dwelling Management Orders (EDMOs) to bring long-term vacant properties back into use. Where necessary, councils may compulsorily purchase derelict sites under the Town and Country Planning Act 1990, the Land Compensation Act 1961, and related statutes — provided the action serves a compelling public interest.

To tackle homelessness head-on, we will:

- Swiftly identify and reclaim vacant housing stock.
- Use **EDMOs** within six months of vacancy and convert suitable homes into secure accommodation.
- Where owners refuse to co-operate, councils will **compulsorily purchase** properties at market value and allocate them immediately for housing.
- **Prioritise transitional support** for individuals and families as homes become available — ending rough sleeping with stability, not slogans.

We pledge to reclaim these homes, restore community life, and ensure that every person has the security, dignity, and belonging they rightfully expect.^

Buying A Home

With Ownership Comes Pride — And With Pride, Passion.

When people own their homes and belong to a place, they care more deeply about their surroundings, and communities thrive. We see it time and again: clean streets, tended gardens, less crime, and a shared sense of guardianship over public space.

But Britain has lost that sense of ownership. Pride is now reserved for football matches. Passion is in retreat. No one has a stake in the future anymore — because no one has a stake in where they live.

We will change that.

First-time home ownership will be **state-funded** through the issuance of a new **interest-free sovereign currency**. If you borrow £250,000, you will repay £250,000 — not a penny more. No compound interest. No inflationary profiteering. Just fair access to the foundational right of belonging.

The housing revolution is not about more of the same — it's about creating future heritage: homes that honour the past, meet the demands of the present, and anticipate the world to come. It's about rekindling national pride, restoring economic sanity, and giving people something real to protect and believe in.

DRAFT BUDGET

Reconstructing the UK's budget to prioritise renewable energy, education, healthcare, social care, housing, and infrastructure, while eliminating government loan interest payments and consolidating defence and emergency services, requires a comprehensive approach. Additionally, considering a £4.2 trillion rebate from the Bank of England for historical interest payments backdated to 1694 would significantly impact fiscal planning.

Key Assumptions:

1. **Elimination Of Government Loan Interest Payments:** Redirecting funds previously allocated for interest payments into priority sectors.
2. **Consolidation Of Armed Forces, Defence, Police, And Emergency Services:** Streamlining these services into a unified expenditure category to enhance efficiency and reduce costs. Merging defence and emergency services must be managed carefully to maintain operational effectiveness.
3. **£4.2 Trillion Bank Of England Rebate:** Utilising this rebate to offset existing national debt and fund strategic investments.

Debt Reduction Strategy:

- **Application Of £4.2 Trillion Rebate:** Allocate the £4.2 trillion rebate directly to national debt reduction. With the UK's national debt approximately at £2.9 trillion, this rebate would not only eliminate the debt but also provide a surplus of £1.3 trillion.
- **Investment Of Surplus:** The surplus can be invested in a sovereign wealth fund, generating returns to support ongoing and future public expenditures, further reducing the need for borrowing.

Revised Budget Outline:

Department/Expenditure Category	Outturn 2023-24 (£bn)	Baseline 2024-25 (£bn)	Plans 2025-26 (£bn)	Average Annual Real Terms Growth 2023-24 to 2025-26 (%)
Health and Social Care	188.5	210.0	230.0	5.0
Education	87.9	100.0	115.0	7.0
Unified Defence and Emergency Services	90.0	95.0	100.0	3.0
Housing and Infrastructure	40.0	50.0	60.0	8.0
Renewable Energy and Environmental Initiatives	30.0	40.0	50.0	10.0
Justice and Law Enforcement	30.0	32.0	34.0	3.0
Science, Innovation, and Technology	12.7	15.0	18.0	7.0
Transport	30.0	35.0	40.0	5.0
Foreign, Commonwealth, and Development Office	11.1	12.0	13.0	3.0
Work and Pensions	9.0	10.0	11.0	4.0
Other Departments and Reserves	30.0	32.0	34.0	3.0
Total Departmental Expenditure Limits (DEL)	559.2	631.0	705.0	5.0

This revised budget framework aims to strengthen key public sectors while addressing national debt, contingent upon the realisation of the hypothetical rebate and successful policy implementations.

SUMMARY OF POLICIES & PLEDGES

ANTI-CORRUPTION

We will keep politics free from financial coercion and bribery.

SYNAPTOCRACY

We will establish a fair governance model that replaces traditional democracy.

ECONOMY

We will redefine financial ethics, outlaw interest, and quash all UK debt.

UNIVERSAL INCOME

We will trial an opt-in UBI scheme to measure effectiveness and viability.

INFRASTRUCTURE & NATIONALISATION

We will prioritise public welfare over privatisation to deliver world-class services.

ENERGY

We will invest in suppressed technology to provide cost-free energy to the nation.

HIGHWAYS

We will introduce a new and efficient intelligent roads network grid, powered by AI.

VEHICLES

We will create new British car plants to convert existing vehicles to run on water.

SCIENCE & TECHNOLOGY

We will invest in the latest technology applications to improve quality of life.

EDUCATION & PERSONAL DEVELOPMENT

We will overhaul the education system and provide free, lifelong learning for all.

ARTIFICIAL INTELLIGENCE

We will harness the power of A.I. to emancipate, empower and unite humanity.

ARTS & CULTURE

We will prioritise creative funding equally alongside other essential infrastructure.

ADVERTISING STANDARDS

A new regulation body will uphold the highest standards to protect consumers.

MEDIA & JOURNALISM

We will bring an end to whitewashing, fear-mongering, and propaganda.

MEDIA CONTENT REGULATION

A new media regulatory body will protect young people from harmful content.

ENVIRONMENT

We will impose taxes, tariffs and embargoes on all products harmful to our planet.

FARMING & AGRICULTURE

We will invest in 379 vertical inner-city farms and abolish food chain monopolies.

INTERNATIONAL DEVELOPMENT

We will end world hunger within three years.

FOREIGN AFFAIRS

We will reset foreign relations, investing in restitution, reparation, and reconciliation.

IMMIGRATION

We will introduce a single visa system for all visitors and settlers coming to the UK.

NATIONAL SECURITY & DEFENCE LEAGUE

We will fund diplomacy not conflict, redirecting defence budgets into peacekeeping.

PUBLIC & EMERGENCY SERVICES

There will be no more cuts to public services. They will become a basic human right.

LAW & THE JUSTICE SYSTEM

We will overhaul the British legal system, abolishing antiquated and unjust laws.

CRIME & POLICING

We will address the root causes of crime and, in doing so, eradicate crime.

LOCAL AUTHORITIES

We will streamline local authorities, making them more efficient and effective.

HEALTHCARE

We will overhaul the NHS, dismantle big-pharma's stranglehold, and retrain doctors.

SOCIAL CARE

Social care will be a basic human right, afforded to everyone as and when required.

RETIREMENT, PENSIONS & OLDER PEOPLE

We will establish a new pension model guaranteeing financial security until life's end.

HOUSING & CONSTRUCTION

We'll raise standards, cut costs, and reclaim vacant property to fight homelessness.

For more information, visit: www.TheVisionaryMovement.org

The Time For Change Is Now

For generations, successive governments have entrenched themselves in corruption, coercion, and criminal negligence, betraying the trust of the people they vowed to serve. They have operated with impunity, cloaked in arrogance, believing themselves beyond reproach.

This manifesto lays bare their systemic failures — and the depth of their wilful corruption and incompetence.

Moreover, secret societies, black-ops, shadow governments, a malicious corporatocracy, and organisations such as BlackRock believe they have a stranglehold on the world — and that we, the people, are powerless to change it. The time has come to dismantle this legacy of deceit and hold these rapacious parasites to account.

Support the Visionary Movement.

Support a new **Vicontenate**.

We pledge to strip these self-appointed elites of their undeserved power and hollow titles. They will face the severest penalties the law permits, and together we shall forge a future defined by integrity, justice, and unwavering commitment to the common good.

The era of exploitation ends now.

Stand with us — and let us reclaim our nation's honour and prosperity.

Uriel Lux Dei Enki

The Visionary Movement

A Political Manifesto for Planet & People
