# COMPANY PROFILE

In 2015, Shenzhen Hongsen Environmental Technology Co., Ltd. acquired a leading brand in the water treatment industry that had been established for 10 years and officially entered the water treatment industry. With a registered capital of 41 million RMB, the company is an environmental technology enterprise that develops water treatment equipment such as evaporators, ultrapure water systems, seawater desalination equipment, and industrial wastewater treatment systems. Hongsen has become one of the leading companies in the environmental industry.

Headquartered in China and serving the Asia-Pacific as well as the global market, the company owns more than 100 water treatment projects both domestically and internationally. It has branch offices or representatives in more than 30 cities in China, with over 50% of its products exported to Europe and America. All products and services are designed, manufactured, and customized according to international quality standards from the EU and North America.

Currently, the company has over 300 employees, with more than 90% holding bachelor's degrees or higher, including 6 PhDs, 25 master's degree holders, 5 senior engineers, and 56 professional researchers. The company's total asset value exceeds 500 million RMB. Its products are used in more than 300 industries, including optoelectronics, nuclear and thermal power generation, petroleum, chemicals, and semiconductors.

We always adhere to the philosophy of "Technology Creates High Quality" through the principle of "Technology Innovation, Product Innovation, and Service Innovation." With a long-term commitment to technology and product development, especially in the field of water treatment, we have developed a comprehensive product lineup, complete testing systems, strict quality assurance systems, and efficient and high-quality after-sales services.

Our main product lines include core water treatment equipment such as ultrapure water systems, wastewater treatment equipment, evaporators, MVR systems, used oil recovery systems, and high-grade salt recovery systems. We also emphasize long-term strategic cooperation with various research institutions and technical engineering departments.

## COMPANY QUALIFICATIONS

## CUSTOMER SERVICE

### 1. Investment and Construction

Serving areas such as large industrial zones, factories, companies, and public infrastructure supporting city life by developing comprehensive systems and facilities for industrial wastewater treatment, gas emissions, and domestic wastewater. The main service scope includes: production – installation – operations – handover – after-sales maintenance.

### 2. Technical Design

Providing optimized design solutions by considering the project characteristics of clients from various industries, production processes, liquid/gas waste emission standards, and investment budgets.

### 3. Equipment Supply

Supplying professional equipment and support systems for industrial/domestic wastewater treatment, industrial ultrapure water systems, and gas emission control. Additional services include installation, testing, and after-sales support for the equipment.

Hongsen Environmental Technology Co., Ltd.

## OUR CLIENT

## APPLICATION FIELDS

Chemicals, oil & gas, smelting, mining, silicon, rubber, food & beverage, pharmaceuticals, dyeing, textiles, renewable energy, new materials, automotive components, semiconductor chips, high-precision manufacturing, urban domestic wastewater treatment, and over 300 other industrial sectors.
