

Man as a Biological Prism

Dr. Federico Bisiacchi

The Science of Consciousness 2025

A New Model of Systemic Communication The Fractal Equation of Consciousness

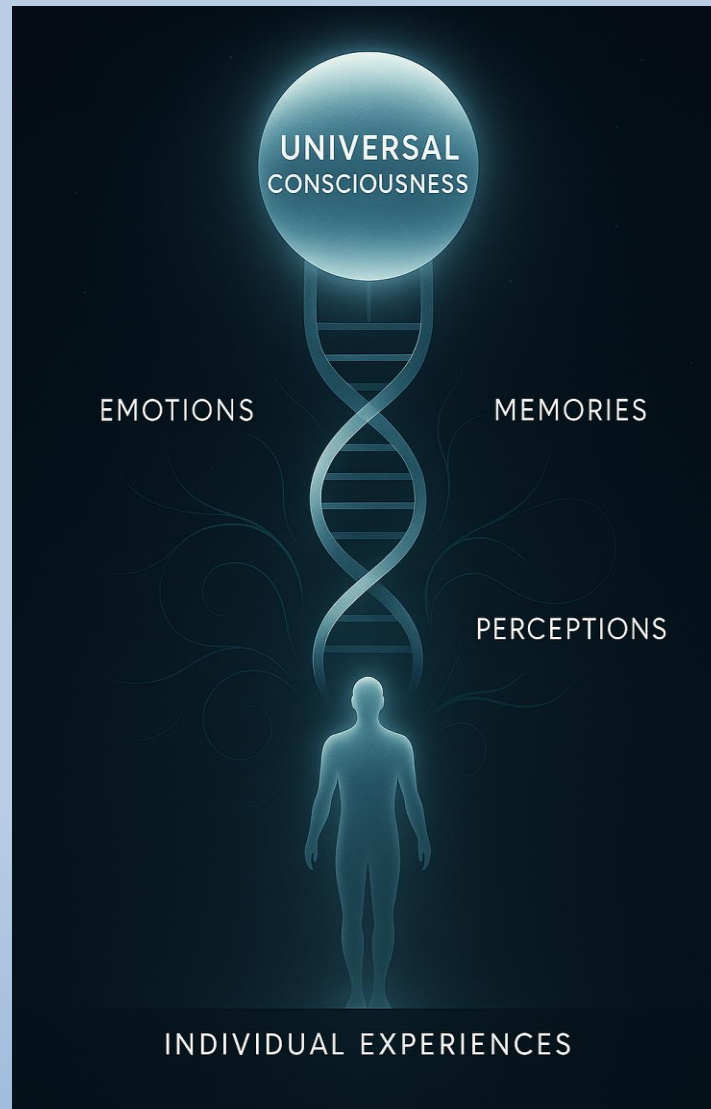

Where I come from

from Business to Biology

- MBA in Marketing
- Intensive Workshop in:
 - Fitzgerald's Zonal Reflexology
 - Kinesiology
 - Calligaris and Torri-Cianci Psychosomatics
 - Advanced Osteopathy
- Diploma in Anatomy, Faculty of Medicine, Descartes University, Paris
- Degree in Osteopathic Science, USA.
- I have treated between 70.000 and 100.000 people!

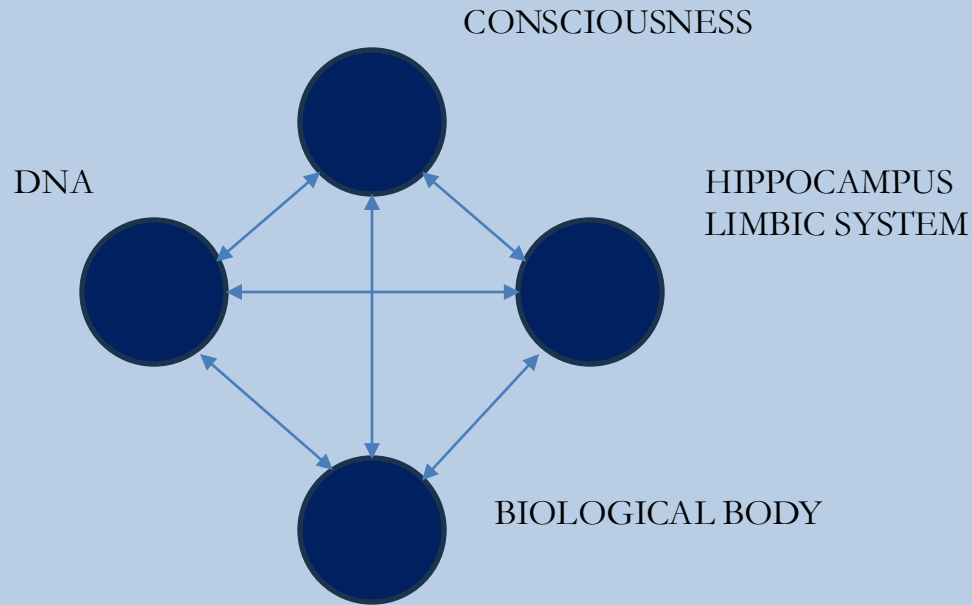

**Consciousness doesn't stop at the mind, but
continues through light into the body.**

Consciousness uses DNA to translate experience into biology

From Consciousness to Biology: a Living Dialogue

Consciousness is not a Place, but a Process: Imprinting, Shaping, and Transforming.

DNA as a Quantum Antenna

The Role of Biophotons

The Studies of Fritz-Albert Popp, Peter Garajev, Luc Montagnier, Konstantin Meyl, and Rupert Sheldrake suggest that DNA may play a role in the emission and reception of biophotons.

In this Model, DNA becomes a living, pulsating archive. It records the meaningful events of our existence, and informs the environment through light.

BIOPHOTON

The biophoton is the trace of adaptation in progress.

It is the cellular equivalent of consciousness saying: “I’m working on it.”

We might say that the intensity and quality of biophoton emission is proportional to the distance between the incoming event and the available memory needed to integrate it.

“Amino Acids: The Silent Prism of Biology”

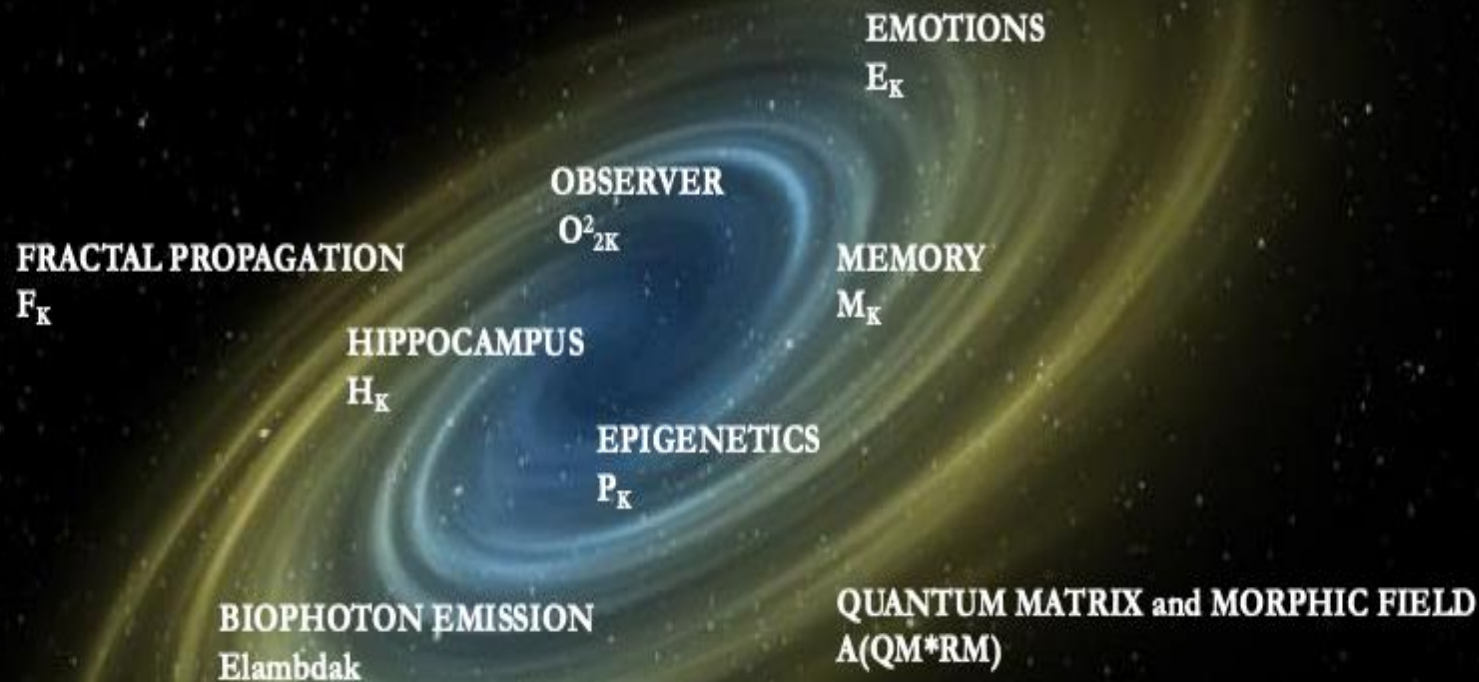

The crystalline structures suggest they are not merely chemical components, but also optical modulators of biophotonic information.

We may have finally found the pathway to synchronize the entire Biological System. Only the speed of light can achieve this.

THE HUMAN BEING AS A BIOLOGICAL PRISM

- The Human Body is not merely a set of biochemical reactions, but a sophisticated quantum-optical system.
- DNA modulates gene expression to optimize the flow of the Information.
- Through this process, we become a Biological Prism – Translating Energy into Life, and Life into Awareness.

BUT WHAT ORGANIZES ALL THIS?

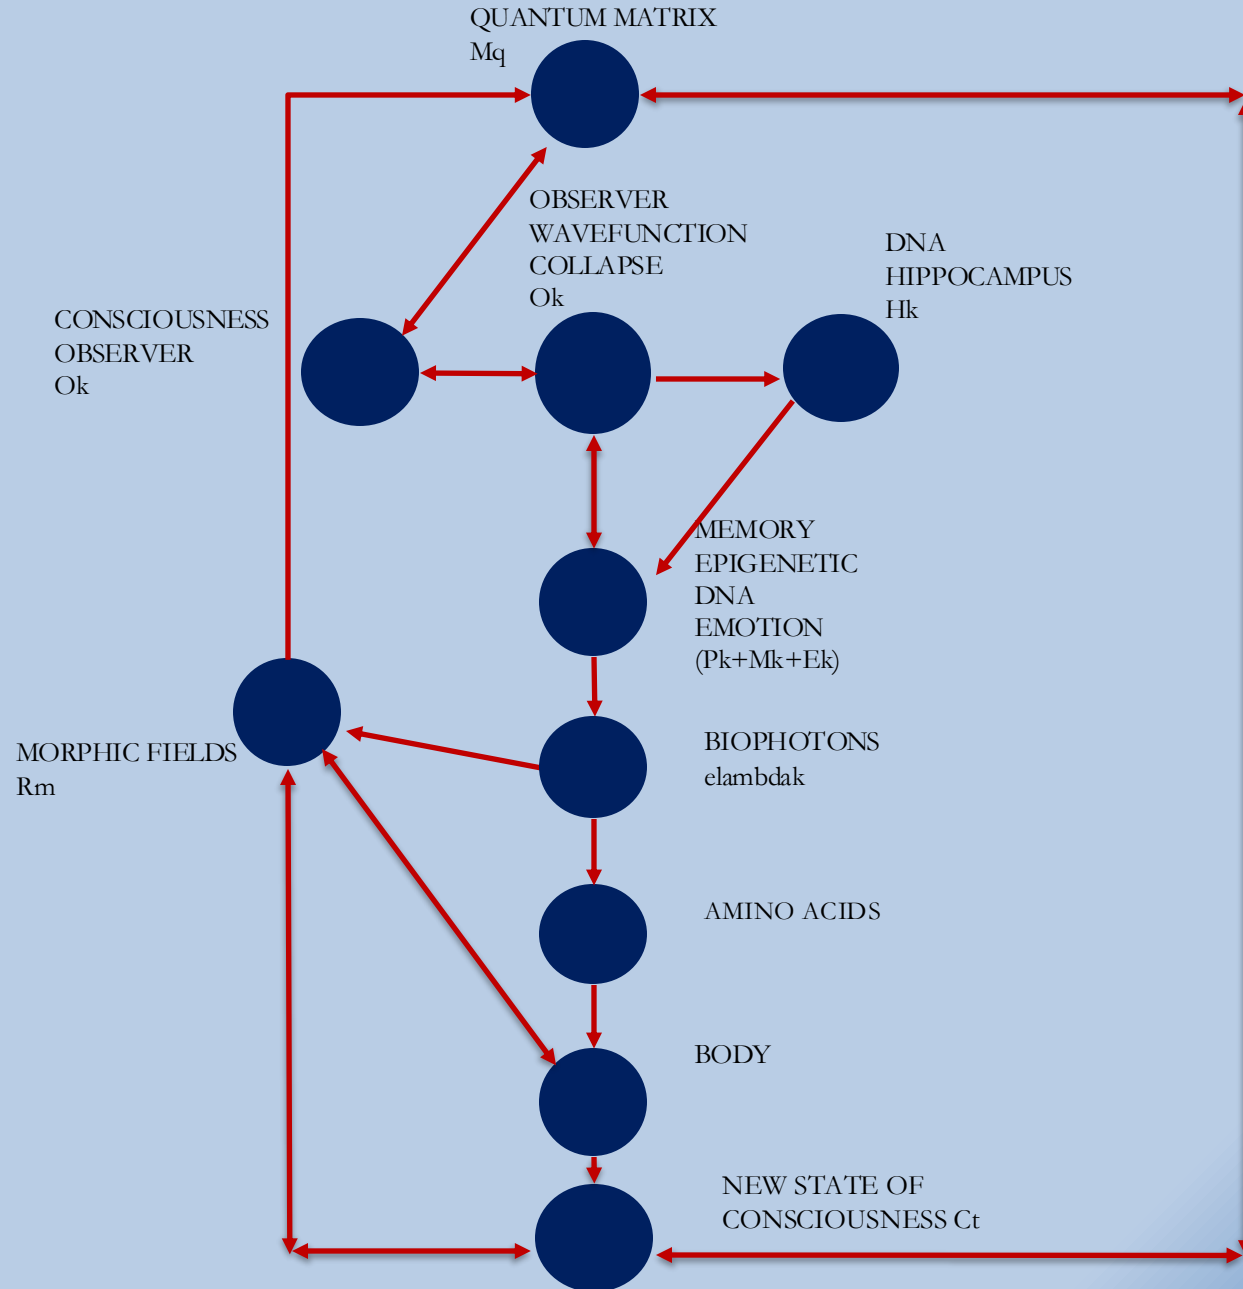

The Fractal Equation of Consciousness

$$C_t = \sum_{k=1}^{\infty} O_{2k}^2 \cdot \mathcal{H}_k(\mathcal{P}_k + \mathcal{M}_k + \mathcal{E}_k) \cdot \mathcal{F}(k) \cdot e^{\Lambda_k} \cdot A(Q_m, R_m)$$

- O_{2K}^2 It is the starting point of conscious experience, initiating the collapse of the wave function and transforming potential information into a biological and experiential signal.
- H_K It receives the signal generated by consciousness and coordinates memory encoding, Integration, and biological adaptation.
- P_K Involves chromatin remodeling (opening/closing), gene expression regulation, and adaptation.
- M_K Stores inherited biological information
- E_K Emotions playing a key role in how consciousness and memory are encoded in the body.
- F_K Describes how information flows across systems in a patterned, recursive, and often near-simultaneous way.
- E^{lambda_k} Signal of transformation and coherence in progress.
- Q_M The fundamental field of potential from which all phenomena emerge.
- R_M A non-local information field, similar to Jung's collective unconscious.

New Systemic Communications - From Observation to Transformation

And what if

If Consciousness is Energy:

$$C_t = \sum_{k=1}^{\infty} O_{2k}^2 \cdot \mathcal{H}_k(\mathcal{P}_k + \mathcal{M}_k + \mathcal{E}_k) \cdot \mathcal{F}(k) \cdot e^{\Lambda_k} \cdot A(Q_m, R_m)$$

$$E = \left| \sum_{k=1}^{\infty} O_{2k}^2 \cdot \mathcal{H}_k(\mathcal{P}_k + \mathcal{M}_k + \mathcal{E}_k) \right| \cdot \left| \mathcal{F}(k) \cdot e^{\Lambda_k} \cdot \mathcal{A}(Q_m, R_m) \right|$$

$$m = \left| \sum_{k=1}^{\infty} O_{2k}^2 \cdot \mathcal{H}_k(\mathcal{P}_k + \mathcal{M}_k + \mathcal{E}_k) \right|$$

$$c2 = \left| \mathcal{F}(k) \cdot e^{\Lambda_k} \cdot \mathcal{A}(Q_m, R_m) \right|$$

$$E = m \cdot c^2$$

SYNTHESIS AND CONCLUSION

“The Consciousness That Creates the World”

The Universe is not just energy, but a field of Consciousness in Transformation.

What we call reality is simply a function of consciousness collapsing into energy and matter.

Our Perception and Memory influence the Structure of DNA, thus shaping reality itself.

Einstein demonstrated the relationship between Energy and Matter, but our Formula shows that Consciousness is the organizing principle of this Transformation.

This is the Key to unifying Physics, Biology and Consciousness into a single model.

Implications and Applications

Integrated Medicine Field:

Research on osteopathic treatments and emotional processing in chromatin remodeling and biophoton emission.

Amino Acid Field:

Study on the photonic information carried by amino acids.

Research on light-based therapies and amino acid supplementation for neurological, immunological, and degenerative conditions.

New Scientific Dimensions:

A new branch of science: “Biophysics of Consciousness.”

Integration of quantum physics, molecular biology, and neuroscience.

THANKS FOR THE ATTENTION

My Personal Message:

Our small bit changes the Information.

Our Experiences are luminous sequences and words written in the language of Life. And our Personal note contributes to the Symphony of this Universe, still waiting to be imagined.
