

The collage displays various design sketches and diagrams for a shoe project, categorized by design principles. The categories include:

- Regeneratief**: Sketches showing the shoe's structure and components.
- Biomimicry**: Sketches inspired by natural forms, including a cross-section of a shoe sole.
- One piece**: Sketches showing the shoe as a single, continuous piece.
- Mono-materiaal**: Sketches showing the shoe made from a single material.
- Vorm volgend**: Sketches showing the shoe's form following its function.
- Niet permanente verbinding**: Sketches showing the shoe's components connected by non-permanent means.
- Stabiliteit**: Sketches showing the shoe's stability and balance.

Each category shows various sketches of shoe components, cross-sections, and assembly diagrams. Some sketches are circled in red. The sketches are labeled with names like 'skate', 'canyon', 'DOWN IN', 'SKATE SHOE', and 'INCLUSIT'.
