

Dynamic Workforce Management

Optko brings together two leading aviation software providers, WePlan and WorkAxle to offer the most dynamic below-wing solution on the market. Be it operational planning, day-of-ops real time scheduling or allocation of work to meet fluctuation in resource supply or flight demand, we have it covered.

Work Packages grouped by Flight Number

Real-Time Flight Integration

Integration to Flight Plans with real-time updates enables work loads to be managed based on “live situations”, optimising day of ops activities.

Automated Scheduling

Automation of roster and work-allocation based on changes in demand so that an optimised work schedule is instantly produced.

Compliance Management

Configurable rules for adherence to labour laws and industrial agreements, automatically ensuring rosters meet all rules.

Why Optko

- **Experienced:** We have deep knowledge in workforce management solutions.
- **Accountable:** We do what we promise so your objectives are met.
- **Organised:** Our projects are managed and governed, so that risks and issues are minimised.
- **Collaborative:** We listen, we communicate, we provide advice.
