

## TO WHOM IT MAY CONCERN

Siddharth Maskeri from Soulify has worked with THEIA INTERNATIONAL, Germany on an outstanding online program for school students from 3 continents.

THEIA INTERNATIONAL is a multi-awarded foundation and the global leader for vocational trainings on future skills and career capacity building in circular and regenerative economies.

You can do more than you think – change the world yourself". According to this motto, THEIA International teaches young people skills that still fall by the wayside unconventional education. and empower them in a practical way to use their creativity to achieve sustainable goals. An idea for which the Indian cineaste, animator and coach, Siddharth Maskeri, also stands. In cooperation with THEIA International, the partners designed an exclusive live MasterClass young people. For the first time school students from 3 continents (Asia, Africa, Europe) participated in a 8 days masterclass that connected storytelling, technical and global mindset skills.

Siddharth Maskeri is an extraordinary teacher in its best sense. He walks in the shoes of the youth and softly push their limits that they achieve successfully an objective that usually had been out of their reach. Besides his state-of-the-art knowledge in animation movie film making, Siddharth Maskeri shares highly valuable experiences of his global travels and multiply workshop experiences. The program was held in times of the corona lock down. I have been looking for a partner who is able to inspire the students, to set their hidden talents free and supports them in turning their feelings into powerful messages and short movies. The program was very successful. The schools took the idea and set up school hubs for animation movie film making.

Given these, I highly recommend everybody in exploring transformative learning to engage Siddharth to create a perfect environment for friendship, intercultural exchange and learning by experience alongside an open-minded, warm-hearted and highly professional teaching personality.

Sincerely yours,

Anja Tollhausen Carron  
Founder & CEO Theia International

THEIA INTERNATIONAL E.V.

Being original is a challenge. It's one of the best ways to improve the world around us.
