About Us

Earthen Exports: A Legacy of Natural Beauty

For over 50 years, Earthen Exports has been crafting sustainable and stylish home goods. Rooted in India's rich artisanal traditions, we use natural fibers like jute, hemp, and seagrass to create unique and eco-friendly products.

From our Jaipur headquarters, we source the finest materials and collaborate with skilled artisans across India. Our commitment to sustainability and timeless design ensures that your home is both beautiful and eco-conscious.

Our Vision & Mission

Vision: To be a global leader in sustainable home decor, renowned for our commitment to ethical sourcing, exceptional craftsmanship, and innovative designs. We aim to inspire a new generation of consumers to embrace eco-friendly living and appreciate the beauty of handcrafted products.

Mission: To cultivate a sustainable business model that empowers artisans and promotes the use of natural fibers, while offering unique and high-quality handcrafted products that contribute to a healthier planet.

Crafted by Nature, Curated by Us

We've harnessed the power of nature to create beautiful and sustainable home goods. Our products feature a range of natural fibers, including water hyacinth, jute, rice grass, banana fiber, seagrass, and hemp. We also work with other exceptional fibers like Korra, Nettle, Kenaf, Sisal, and Coir. Interested in learning more about our materials? Request our materials catalog today.

WATER HYACINTH

Water hyacinth is a natural fiber made from the leaves of the water hyacinth plant. It is known for its durability and resistance to mold and mildew. It is often used in weaving and basketry.

JUTE

Jute is a natural fiber made from the jute plant. It is known for its strength and durability. It is often used in weaving and basketry.

RICEGRASS

Ricegrass is a natural fiber made from the leaves of the rice plant. It is known for its softness and durability. It is often used in weaving and basketry.

SEAGRASS

Seagrass is a natural fiber made from the leaves of the seagrass plant. It is known for its softness and durability. It is often used in weaving and basketry.

HEMP

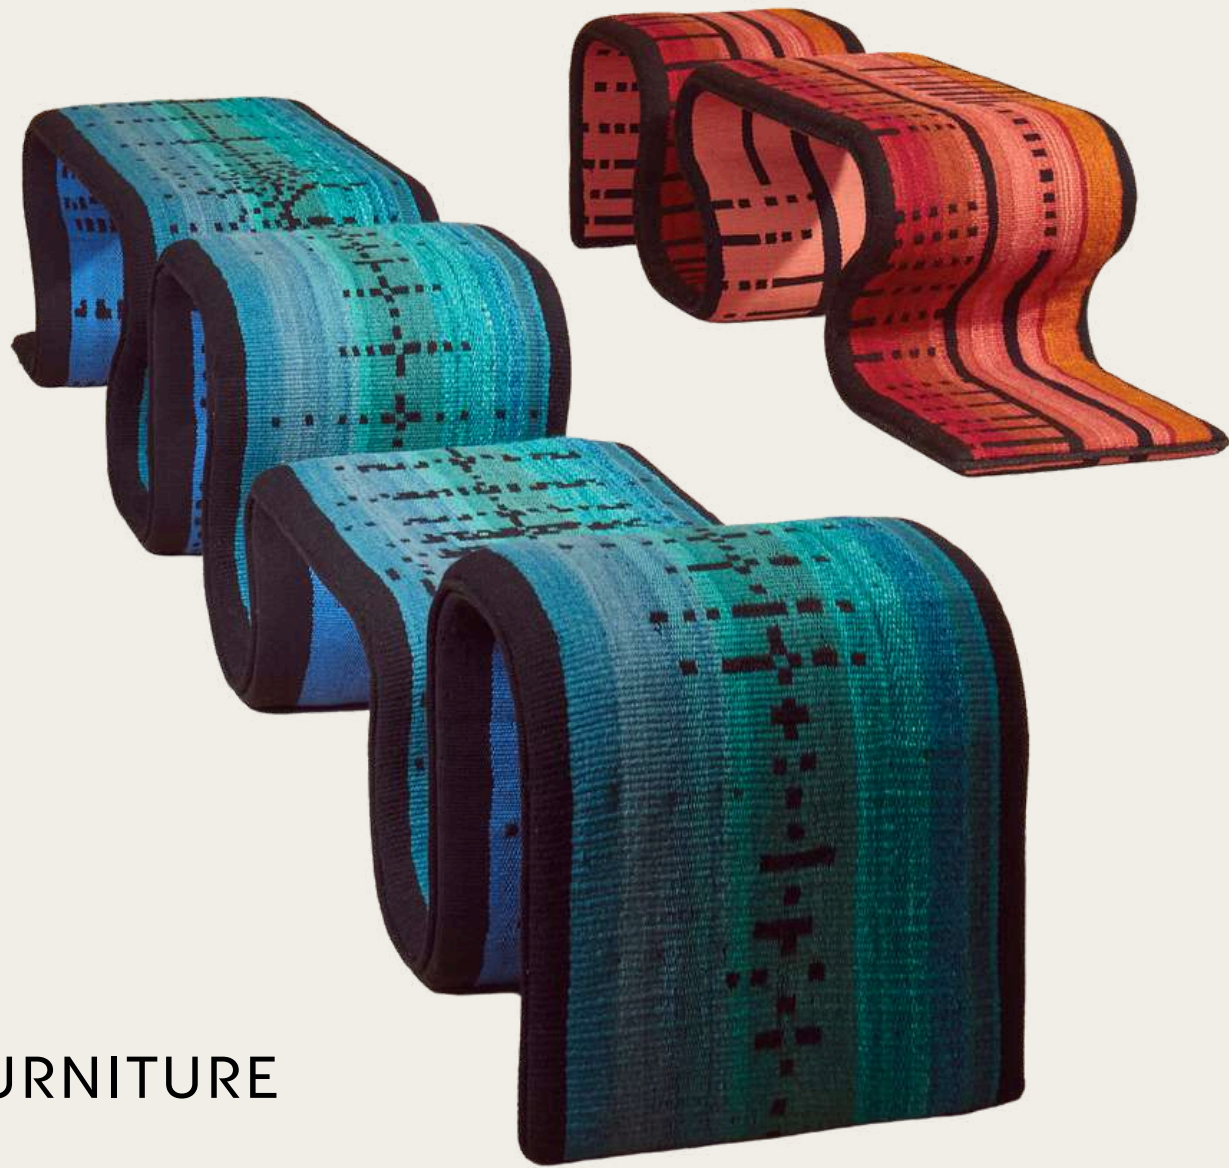

Hemp is a natural fiber made from the leaves of the hemp plant. It is known for its strength and durability. It is often used in weaving and basketry.

BANANA

Banana is a natural fiber made from the leaves of the banana plant. It is known for its softness and durability. It is often used in weaving and basketry.

Acacia Banana Sofa Chair

Experience the ultimate in comfort and style with our handcrafted acacia wood sofa chair. This luxurious piece combines the durability and beauty of acacia wood with the natural texture and sustainability of banana fiber.

Key Features:

- **Sustainable Acacia Wood:** Crafted from premium acacia wood, known for its strength, durability, and beautiful grain.
- **Luxurious Upholstery:** Choose from a variety of high-quality upholstery options to match your personal style and preferences.
- **Banana Fiber Braided Back:** The chair's backrest features intricate banana fiber braids, adding a unique and sustainable touch. Banana fiber is a byproduct of the banana industry, making it an eco-friendly and sustainable material.
- **Comfortable Design:** The chair's ergonomic design provides optimal comfort and support, making it perfect for relaxing or entertaining guests.

Indulge in the luxury and sustainability of our acacia wood sofa chair, a timeless piece that will elevate any living space.

Seagrass Collection

Discover the beauty and versatility of our handcrafted seagrass furniture collection, featuring a stylish chair and stool. Made from sustainable materials like mango wood, acacia, and sheesham, these pieces offer both durability and elegance.

Key Features:

- **Sustainable Seagrass:** Our furniture incorporates beautiful seagrass accents, a natural and renewable resource that is harvested sustainably from coastal ecosystems. Seagrass provides a valuable habitat for marine life and helps to improve water quality.
- **Customizable Options:** Choose from a variety of sizes and designs to create a truly personalized piece that complements your space.
- **High-Quality Woods:** The chair is crafted from durable mango wood, while the stool is made from a combination of acacia and sheesham. These woods offer a natural and timeless look.

Experience the comfort and sustainability of our seagrass furniture collection, a perfect addition to any home or office.

**FR-5003
LOUNGE CHAIR**

Dimensions:
28 inches x 26 inches x 24 inches

Banana Rugs

Banana fiber and bark, derived from the pseudostems and outer layers of banana plants, offer a sustainable alternative for various products. Banana fiber is known for its strength, flexibility, and biodegradability, making it an ideal material for textiles, ropes, and paper.

Kenaf

Kenaf fiber, derived from the Hibiscus cannabinus plant, is a versatile and sustainable material with a wide range of applications. Known for its exceptional strength and durability, kenaf fiber is increasingly popular in industries such as textiles, automotive, and construction. Its natural resistance to pests and diseases makes it an environmentally friendly alternative to synthetic fibers.

Water Hyacinth

Water Hyacinth is known to be a problematic plant that damages the water ecosystems across the world. Governments are appropriating huge budgets to eradicate this epidemic. Through rigorous experimentation, we have successfully converted this problem into an opportunity by delivering beautiful and consumer friendly fibres derived from the Water Hyacinth plant. This has also resulted in increased employment for the unskilled laborers of India

Rice Grass Rugs

Rice grass, a resilient and fast-growing plant, often overruns agricultural fields in India, causing significant damage. Traditionally, farmers have resorted to burning this invasive species as there's no efficient disposal method. By transforming rice grass into beautiful and durable rugs, we're not only providing a sustainable solution but also contributing to a cleaner environment.
