- Free revisit support during warranty period
- Better protection than one-time service

◆ 9 Month Warranty Plan (3 Services)

- Three planned services for long-lasting protection
- Breaks cockroach breeding cycle effectively
- 9 month extended warranty
- Priority service support
- Recommendation for recurring infestation issues

◆ 12 Month AMC Plan (4 Services – Best Value)

- 4 scheduled services across the year
- 12-month complete protection plan
- Covers all life stages of cockroaches
- Priority service with fast response
- Free complaint visits during AMC period
- Lowest cost per service
- Best for long-term prevention and peace of mind

Cockroach Control – Kitchen Item Removal Service Charges

This service is applicable when kitchen items (utensils, groceries, appliances, racks) are required to be removed, shifted, and placed back by our team before and after treatment.

| Kitchen Size / Condition | Service Charges (₹) | What Is Included |
|--|---------------------|--|
| Small Kitchen (1 Room / 1 RK) | ₹350 | Removal & replacement of basic utensils, dry items, and light shelves |
| Medium Kitchen (1 BHK) | ₹400 | Removal & replacement of utensils, grocery items, containers, and basic appliances |
| Large Kitchen (2 BHK) | ₹450 | Full kitchen item handling, including racks, containers, and appliance shifting |
| Extra Large Kitchen (3 BHK) | ₹500 | Heavy item handling, multiple cabinets, storage units, and organized replacement |
| Premium / Modular Kitchen (4 BHK) | ₹550 | Complete modular kitchen handling with careful placement and hygiene protocols |

- Kitchen item removal is **free if done by the customer prior to service**
- Charges apply **only when removal is done by our team**
- Fragile items (glassware, electronics) must be handled by the customer
- Service includes **basic rearrangement**, not deep cleaning or pest-proof packing
- Prices applicable per visit (if re-service is required)

Cockroach Control Procedure:

1. **Step 1 - Cockroach Spray (by Absolute Pest Control Services):** Commercially available cockroach sprays can be found at supermarkets and home improvement stores. These sprays are effective against various types of cockroaches and can also serve as a preventive measure against future infestations.
2. **Step 2 - Cockroach Gel (by Absolute Pest Control Services):** This involves applying small dots of a specialized gel in areas where cockroaches are frequently spotted, such as under appliances, around drainpipes, and on countertops. The gel is designed to be carried back to the cockroach nests by the roaches themselves, leading to their demise.
3. **Step 2.1 - Diatomaceous Earth (Optional only in open areas):** This is a natural, non-toxic substance that can be used to repel and kill cockroaches. It works by dehydrating the roaches, causing them to die. Diatomaceous earth can be sprinkled along baseboards, in cabinets, and behind appliances where cockroaches are likely to be present.
4. **Step 3 - Cockroach Control Through Drain Cleaning (Drenching):**
 - a) **Initial Drain Cleaning (by Customer):**
Begin by deep cleaning the drains to remove any built-up organic material that can attract cockroaches. This step is crucial as it often provides more benefit for cockroach control than the pesticide application itself.
 - b) **Pesticide Application (by Absolute Pest Control Services):**
After cleaning the drains, apply a suitable pesticide according to the label instructions.
 - c) **Post-Treatment Procedures (by Customer):**
After applying the pesticide, wait for it to dry completely before resuming normal activities in the treated area.
 - d) **Regular Maintenance (by Customer)::**
For ongoing maintenance, treat the drains monthly with a natural cleaner or a pesticide.

5. Step 4 -House Fly Pesticide Bait Treatment Procedure (by Absolute Pest Control Services):

Techniques include:

1. Banding: applying baits in a band or strip along walls or other surfaces
2. Baiting: placing baits in areas where flies are present
3. Specific granule placement: applying granules in specific areas where flies are present.
4. Seed treatments: applying baits to seeds to prevent fly infestations.
5. Weed wiping: applying baits to weeds to prevent fly infestations.

Here is a comprehensive checklist to help We prevent cockroach infestations in your home:

Sealing Entry Points:

1. Caulk holes and gaps around water pipes, baseboards, electrical fixtures, outlets, switches, doors, and windows.
2. Install screens over windows, vents, floor and sink drains, and ducts to prevent cockroach entry.
3. Repair any holes or gaps in walls, floors, and ceilings.
4. Seal cracks and crevices around doors and windows with weatherstripping.

Eliminating Food Sources:

5. Store food in tightly sealed containers or in the refrigerator.
6. Keep counters and tables clean and free of crumbs and spills.
7. Clean up dirty dishes immediately and avoid leaving them overnight.
8. Store pet food in sealed containers and clean up any spills promptly.
9. Avoid leaving trash or recyclables uncovered or unemptied for extended periods.
10. Rinse food and drink containers before throwing them away or recycling them.

Maintaining Cleanliness:

11. Regularly vacuum and mop floors, especially in areas where food is prepared or consumed.

Absolute Pest Control Services

12. Clean up spills and crumbs immediately to prevent attracting cockroaches.
13. Wipe down counters, tables, and appliances after use.
14. Keep your stove and oven clean and free of grease and food debris.
15. Empty trash and recycling bins regularly and keep them clean.

Inspecting Food and Containers:

16. Inspect all bags, baskets, or boxes of food brought into the house for signs of cockroaches or eggs.
17. Check food containers for any signs of cockroach infestation before storing them.

Managing Trash:

18. Use a trash can with a tight-fitting lid to prevent cockroaches from accessing food waste.
19. Avoid placing trash cans under sinks or near food preparation areas.
20. Empty trash and recycling bins regularly to prevent attracting cockroaches.

Additional Tips:

21. Fix leaky faucets and drains to prevent moisture accumulation.
22. Insulate pipes to prevent condensation and reduce moisture.
23. Avoid soaking dishes overnight, as this can attract cockroaches.
24. Store sponges and dishrags in airtight containers to prevent moisture accumulation.
25. Avoid overwatering plants, as excess moisture can attract cockroaches.

By following this comprehensive checklist, We can significantly reduce the risk of cockroach infestations in We home. Remember to stay vigilant and maintain a clean and hygienic environment to keep these unwanted pests at bay.

House Fly Treatment Precautions:

Here is a comprehensive checklist to help We prevent House Fly infestations in your home:

House flies can be a nuisance and a health hazard. To effectively control their population, a multi-step approach is necessary. Here is a step-by-step guide on how to use pesticide baits to control house flies:

Inspection

Before applying pesticide baits, it's essential to inspect your home or building to identify areas where flies are present. Look for signs of fly activity, such as live flies, eggs, larvae, or pupae. Common areas where flies are found include:

1. Trash cans and recycling bins
2. Decaying organic matter
3. Pet areas
4. Food and drink spills
5. Drains and sewers

Sanitation

Proper sanitation is crucial in controlling house fly populations. Remove any sources of food and water that may be attracting flies. This includes:

1. Regularly cleaning and sanitizing surfaces
2. Taking out the trash regularly
3. Cleaning up pet areas
4. Fixing any water leaks
5. Eliminating standing water

Exclusion

Exclusion involves preventing flies from entering your home or building. This can be done by:

1. Installing window and door screens
2. Sealing any cracks or crevices around windows and doors
3. Using door sweeps or weatherstripping to seal gaps under doors

Mechanical Control

Mechanical control involves using physical methods to trap or kill flies. This can include:

1. Using fly traps or sticky tapes
2. Installing air curtains in kitchen areas
3. Replacing or cleaning dumpsters and trash receptacles

Chemical Control

Chemical control involves using pesticide baits to kill flies. The following are some common methods:

1. Using odor-baited traps, such as those containing apple cider vinegar or sugar water
2. Distributing insecticide baits along walls, window sills, or other areas where flies congregate
3. Using powdered fly bait formulations, such as those containing azamethiphos

By following these steps and using pesticide baits as part of a comprehensive control program, We can effectively manage house fly populations and prevent infestations.

Terms and conditions

1. The customer understands that our technicians have instructions not to handle the customer's property to avoid any inadvertent damage.
2. A representative of the customer should be present during the pest management treatment to remove and shift all articles as necessary.
