HI THERE!

At Al Dawli & Partners, we strive to be more than just an auditing firm. From the moment you choose to work with us, our specialized team is dedicated to meeting your expectations by leveraging its deep expertise and extensive professional experience.

Our success is driven by our unwavering commitment to quality, adherence to core professional values, and our dedication to delivering high-quality services in a timely and efficient manner.

In addition to accounting, auditing, and taxation, we offer a broad range of services including financial consulting, management consulting, economic advisory, and financial planning—tailored to meet the diverse needs of our clients.

Our confidence in this area is further reinforced by the fact that our team is composed of highly qualified, professional, and ethical specialists who work collaboratively to meet the diverse needs and expectations of our clients. We are committed to providing effective solutions and practical alternatives to the various challenges our clients may encounter, while helping them realize their goals and ambitions in the labor market.

We are always pleased to work with you and look forward to building a long-term partnership that contributes to a successful and prosperous future.

ABOUT COMPANY

Al Dawli & Partners is a Kuwaiti company established in 2014, recognized as one of the leading firms in Kuwait offering a comprehensive range of administrative, financial, and economic consulting services. The firm is led by a team of seasoned professionals who, over the past decade, have successfully served more than 400 clients across various sectors within the Kuwaiti market.

VISION & MISSION

VISION

We dedicate our full efforts to becoming one of the most reputable and successful national accounting firms in Kuwait and across the GCC member states. Our goal is to stand out in this field by delivering the most effective solutions to our clients and to be recognized as a trusted leader in financial and economic consulting. In addition, we remain committed to giving back to our community through continuous contribution and engagement.

MISSION

We are a dynamic and results-driven firm in the audit industry, committed to providing a comprehensive suite of services designed to enhance our clients' experience and support the quality of services they deliver to their own customers.

AL DAWLI & PARTNERS

OUR SERVICE

We provide our services to both the public and private sectors with the goal of enhancing value and building trust through the consistent application of our strategy and methodology. We are confident that our clients will experience the uniqueness of our ability to deliver effective solutions to any challenges they may face, as well as our professionalism and integrity across a broad range of services—regardless of the size or nature of their operations.

Financial Analysis Services

"Before committing any investment, it is essential to conduct a comprehensive financial analysis of the project's financial statements. This process helps mitigate potential risks and enhances the likelihood of achieving satisfactory returns. Moreover, businesses rely heavily on the outcomes of financial analysis to support informed strategic and operational decision-making."

Tax Services

With the growth of businesses and the increasing availability of financing options, tax operations have become significantly more complex. Over the years, we have amassed substantial experience and a deep understanding of the most effective methods for delivering tax services. This has enabled us to assist our clients in addressing tax challenges and enhancing their tax positions in line with the applicable laws and regulations. Our team of qualified experts is equipped to provide comprehensive and strategic tax solutions tailored to each client's specific needs.

External Audit Services

One of the key services we offer to companies is external auditing, which involves the thorough examination of financial statements by our highly skilled and experienced team. Our professionals are trained to deliver high-quality results and practical solutions tailored to client needs.

We conduct our audits in strict adherence to International Financial Reporting Standards (IFRS) and International Standards on Auditing (ISA), ensuring compliance, transparency, and reliability.

The outcomes of this process are summarized in the Independent Auditor's Report, which provides an objective opinion on the accuracy and fairness of the financial statements, as well as the responsiveness of management to audit inquiries and requirements.

Audit Planning Process:

The first step in the audit process involves gaining a thorough understanding of the company's business operations. This is achieved through meetings with management, analysis of financial data, and the performance of other preliminary procedures. These steps enable us to develop a tailored and effective audit plan.

The audit plan typically consists of two main components:

- **Technical Planning:** This includes procedures that help us identify and focus on key areas that may have a material impact on the financial statements.
- **Administrative Planning:** This covers logistical aspects such as setting the audit budget, defining the timeframe, and establishing key milestone dates.

This structured approach ensures a comprehensive and efficient audit process that addresses both risk and resource management.

Monthly Financial Reporting Services

Regardless of a company's type or target market, financial reports are the lifeblood of business operations. Without accurate and timely reporting, it becomes difficult for businesses to manage their finances effectively and maintain control over their commercial activities.

Investment Advisory

We offer a comprehensive range of investment consulting services that leverage global standards and resources, combined with deep regional insight. Our team serves as trusted advisors on the legal and regulatory aspects of investment and business entity formation, helping clients secure approvals from relevant authorities and government bodies for their commercial ventures. Additionally, we provide guidance on labor market risks and ensure that any third parties you engage with are reputable and reliable entities.

Bookkeeping Services

Bookkeeping is one of the most fundamental aspects of accounting. It involves the meticulous daily recording of all financial transactions within the organization, including sales, purchases, and revenue activities. This process ensures accurate financial tracking and forms the foundation for informed decision-making and regulatory compliance.

Bookkeeping allows you to continuously monitor your business's financial health, giving you clear insight into profits and losses. With this information, you can develop forward-looking strategies to prevent financial losses or potential bankruptcy and ensure long-term financial stability.

Budgeting services

Through effective bookkeeping, you can continuously monitor your business's financial position, accurately identify profits and losses, and develop proactive strategies to prevent financial setbacks or potential bankruptcy.

Internal Audit Services

Internal audit is a vital tool utilized by company management to carry out a range of essential functions. Among the most important roles of internal audit are:

1. Conducting a comprehensive internal review of all financial accounts.
2. Promptly identifying, assessing, and correcting accounting or numerical errors.
3. Detecting embezzlement and fraud in a timely manner.
4. Ensuring that the company's internal regulations and management policies are properly implemented and adhered to.
5. Analyzing and evaluating the effectiveness of the company's production and operational performance.

Internal Control Services

Reliable corporate entities establish clear boundaries and ensure they are not crossed. They are responsible for overseeing those in charge of managing the business, holding them accountable, and monitoring how financial resources are utilized. The internal control system plays a critical role in tracking the activities and decisions of the board of directors, and it ensures that any misconduct is met with appropriate consequences, including termination and potential legal action.

OUR GOALS

At Al Dawli & Partners, our vision driven by our core purpose is to become the most trusted and relevant professional services firm, both locally and globally. We aim to attract top talent, harness cutting edge technologies, and empower organizations to build trust and achieve sustainable, long-term success.

We refer to our refreshed global strategy as The New Equation, which addresses the two most pressing needs faced by clients and organizations today.

The first is the urgent need to adapt and respond effectively to the major transformations shaping our world—such as technological disruption, resource scarcity, demographic and social shifts, and the ongoing impact of the COVID-19 pandemic.

The second is the growing necessity to build and sustain trust at a time when it has become more fragile and increasingly complex to earn.
