HI THERE!

At Al-Dawli & Partners, we strive to be more than just an auditing firm. From the moment you choose to work with us, our dedicated team commits to meeting your expectations, backed by deep expertise and extensive professional experience.

Our success is driven by a strong commitment to quality, adherence to core professional values, and a constant focus on delivering high-quality services on time and with the highest level of efficiency.

In addition to our accounting, auditing, and tax services, we provide a wide range of other offerings, including financial consulting, management consulting, economic advisory, and financial planning — all designed to meet the diverse needs of our clients.

Our credibility in this field is strengthened by the fact that our team is composed of highly qualified specialists who uphold the highest standards of professionalism and ethics, working collaboratively to meet the diverse needs and expectations of our clients. We are committed to providing effective solutions and practical alternatives to the various challenges our clients may face, helping them achieve their goals and aspirations in the business market.

We are always pleased to work with you, and we look forward to building a long-term partnership that contributes to a successful and prosperous future.

ABOUT COMPANY

Al-Dawli & Partners is a Kuwaiti firm established in 2014 and recognized as one of the leading companies in Kuwait, offering a comprehensive range of management, financial, and economic consulting services. The firm is led by a team of seasoned experts who, over the past decade, have successfully served more than 400 clients across various sectors within the Kuwaiti market.

VISION & MISSION

VISION

We are fully dedicated to becoming one of the most reputable and successful national accounting firms in Kuwait and across the GCC. Our goal is to excel in this field by providing the most effective solutions for our clients and to be recognized as a trusted leader in financial and economic consulting. In addition, we remain committed to our responsibility toward the community through continuous contribution and active engagement.

MISSION

We are a dynamic, results-driven firm in the auditing sector, committed to delivering a comprehensive range of services designed to enhance our clients' experience and support the quality of services they provide to their own customers.

OUR SERVICES

We proudly serve both the public and private sectors with a clear commitment to enhancing value and building lasting trust through the consistent application of our strategy and methodology. Our clients benefit from our distinctive capabilities, receiving effective, tailored solutions to the challenges they face. With unwavering professionalism and integrity, we deliver a wide spectrum of services designed to support organizations of every size and across all industries.

Financial Analysis Services

Before committing to any investment, conducting a thorough financial analysis of the project's financial statements is crucial. This ensures that potential risks are minimized while maximizing the opportunity for satisfactory returns. Our clients benefit from insights that empower informed, strategic, and operational decisions, giving them confidence and a competitive edge in achieving their business goals.

Tax Services

As businesses grow and financing options expand, tax processes have become increasingly complex. Over the years, we have developed extensive expertise and a deep understanding of the most effective approaches to delivering tax services. This has enabled us to assist our clients in navigating tax challenges and optimizing their tax positions in full compliance with applicable laws and regulations. Our team of qualified experts is equipped to provide comprehensive and strategic tax solutions, tailored specifically to meet the unique needs of each client.

External Audit Services

One of our flagship services is external auditing, involving a meticulous examination of financial statements by our highly experienced and skilled team. Our experts deliver high-quality results and practical solutions tailored to client needs.

We conduct audits in strict accordance with International Financial Reporting Standards (IFRS) and International Standards on Auditing (ISA), ensuring transparency, reliability, and compliance. The process culminates in an independent auditor's report, offering an objective opinion on the accuracy and fairness of the financial statements, as well as management's responsiveness to audit inquiries.

The first step in our auditing process is to gain a comprehensive understanding of the company's operations and activities. This is achieved through meetings with management, analysis of financial data, and performing preliminary procedures. These steps enable our team to develop an effective audit plan, tailored specifically to meet the client's needs.

An audit plan typically consists of two main components:

Technical Planning: This includes procedures that help us identify and focus on key areas that could have a material impact on the financial statements.

Administrative Planning: This covers administrative aspects such as establishing the audit budget, setting the timeline, and defining key milestones.

This structured approach ensures a thorough and efficient audit process, addressing both risk management and resource management effectively.

Monthly Financial Reporting Services

Accurate and timely financial reporting is the lifeblood of any business, regardless of its size or target market. Our Monthly Financial Reporting Services provide companies with clear, comprehensive, and actionable insights into their financial performance. By delivering precise reports on a regular basis, we empower businesses to manage their finances effectively, make informed decisions, and maintain full control over their operations.

With our expert team handling your financial reporting, you gain not just numbers, but a strategic tool that drives growth, enhances transparency, and supports sustainable success.

Investment Advisory

We offer a comprehensive range of investment advisory services, grounded in global standards and resources, coupled with a deep understanding of the regional market. Our team acts as trusted advisors on the legal and regulatory aspects of investment and business entity establishment, assisting our clients in obtaining the necessary approvals from relevant governmental authorities for their commercial projects.

In addition, we provide guidance on market risks, helping clients engage exclusively with credible and reputable partners to ensure the success of their investments and the stability of their operations.

Bookkeeping Services

Bookkeeping is a fundamental aspect of accounting, involving the accurate daily recording of all financial transactions within an organization, including sales, purchases, and revenue activities. This process ensures proper financial oversight and provides a solid foundation for making informed decisions based on precise data, while also ensuring compliance with regulatory requirements.

Effective bookkeeping allows you to continuously monitor the financial health of your business, providing a clear view of profits and losses. With this information, you can develop proactive strategies to avoid financial setbacks or potential insolvency, ensuring long-term financial stability and supporting sustainable growth.

Budgeting and Forecasting Services

Budgeting serves as a pivotal tool in financial management, enabling companies to plan their financial activities in advance and set strategic priorities. This service involves creating a comprehensive financial plan that estimates expected revenues, projects planned expenses, and allocates available resources in a way that balances short-term objectives with future growth requirements.

By implementing effective budgeting and forecasting, management can:

- Monitor financial performance regularly against the plan.
- Control expenditures and prevent financial waste.
- Support data-driven decision-making.
- Anticipate potential challenges and prepare to address them.

As such, budgeting is not merely an accounting tool—it is a strategic instrument that strengthens financial stability and contributes to the sustainable success of the organization.

Internal Audit Services

Internal auditing is a fundamental tool for enhancing governance and managing risks within organizations. Its significance lies in providing an independent and objective assessment of the efficiency and effectiveness of internal control systems and management processes.

Through this service, we:

- Review internal policies and procedures to ensure compliance with laws and regulations.
- Evaluate the effectiveness of internal control systems and identify potential gaps.
- Provide practical recommendations to improve operational performance and reduce risks.
- Support management in achieving strategic objectives and ensuring adherence to professional standards.

Internal auditing goes beyond merely detecting errors; it strengthens transparency, safeguards assets, and increases the confidence of shareholders and stakeholders alike.

Internal Control Services

Internal control is a cornerstone for ensuring the integrity of financial and administrative operations within organizations. It is a structured system of policies and procedures designed to safeguard company assets, ensure the accuracy and reliability of financial reporting, and maintain compliance with applicable laws and regulations.

Through this service, we:

- Design and develop effective internal control systems tailored to the client's business nature.
- Assess the efficiency and effectiveness of existing controls and identify potential weaknesses.
- Provide practical recommendations to address deficiencies and enhance performance.
- Support management in achieving transparency and strengthening the confidence of shareholders and stakeholders.

Our internal control services go beyond accounting—they enhance operational efficiency and reduce organizational risks, contributing to the overall stability and success of the business

OUR GOALS

At Al-Duwali & Partners, our vision, rooted in our core mission, is to become the most trusted and connected professional services firm—both locally and globally. We strive to attract top talent, leverage cutting-edge technologies, and empower organizations to build trust and achieve sustainable, long-term success.
